# GENERAL INFORMATION

## ● PLASTICS & RUBBER INDONESIA 2023

Plastics & Rubber Indonesia is now the only dedicated plastics and rubber event in Indonesia with the sole focus of serving the needs of those industries.

Plastics & Rubber Indonesia 2023 is scheduled for 15 – 18 November 2023 at the Jakarta International Expo Kemayoran, Indonesia. The event will feature a physical exhibition with various activities and networking opportunities.

In our new digital series, we intend to unlock your digital potential and build your product's digital DNA, ahead of your competitors by getting connected to worldwide networks with our new selection of digital products. Our 360-degree online marketing solutions offer exhibitors maximum exposure for their products and services, making sure your target audience's eyeballs stay on your products and services even before the show.

The show will be co-located with other established events: Plaspak Indonesia, Mould & Die Indonesia, and Plastic Recycling Indonesia.

We've been preparing several onsite activities for you so we can provide the best experience at our exhibition – all under one roof! Take a look at our list\*:

- Hosted Buyers Program
- Live Demo Product
- Circular Economy Zone in Collaboration with Indonesian Plastics Recyclers (IPR)
- Packaging Association Gathering
- Seminar Series
- Students Collaboration
- Waste-to-Art Gallery
- Sustainability Zone
- and more..

*\*update as of 5 October 2023, subject to change without prior notice*

## ● EVENT INFORMATION

Edition	: The 34th International Plastics and Rubber Machinery, Processing and Materials Exhibition
Date	: 15 – 18 November 2023
Opening hours	: 15 – 17 Nov (Wednesday – Friday) : 10.00 – 18.00 WIB 18 November (Saturday) : 10.00 – 17.00 WIB
Venue	: Jakarta International Expo, Kemayoran – Indonesia Hall A1, A2, A3, D1 & D2

## ● READY TO JOIN US?

**Why (pre) register online to visit the 34th edition?**

- Become part of Indonesia's Plastics & Rubber community and get connected to the decision-makers, sales, purchasers, engineers, potential agent/vendors – the key trade buyers in the plastics & rubber industry.
- Brainstorm with the key players in the industry – nothing beats the feeling of meeting your guru/clients onsite!
- As part of our sustainability program we no longer provide the onsite old-school printing registration form.

Scan the barcode here or register here: <https://qrco.de/PRI2023-PREREG>

Plastics & Rubber Indonesia is strictly open to trade professionals and business visitors only

# GENERAL INFORMATION

## HOW TO VISIT THE SHOW

WE PROVIDE VARIOUS WAYS TO HELP YOU REGISTER TO OUR SHOW!

If you are our gold visitor, you may collect your visitor badge upon presenting your visitor pre-registration code to our team at the **GOLD REGISTRATION** booth.

Please go to the **ONSITE REGISTRATION** booth to do the self-registration by using the laptop we provide at the venue.

If you have any problems during the online registration, please go to the **HELP DESK** booth, so we can help you to check your data.

Admission to trade and business visitors only

Visitors in shorts, bermudas, singlets, slippers or sports sandals will not be allowed entry

No children under 18 years will be admitted

## SUSTAINABILITY AT PLASTICS & RUBBER INDONESIA

Better Stands and sustainable options

At Plastics and Rubber Indonesia we are committed to delivering a sustainable event for both exhibitors and attendees. Disposable, single-use stands account for around 80% of the total waste from our event, which is why we are launching the Better Stands Programme.

Better Stands is about moving away from the use of disposable stands to not only vastly reduce waste, but also improve the ease, quality, safety and sustainability of the exhibitor experience at our events. We believe that sustainable, reusable stand options offer a better way forward for the events industry. As an exhibitor you can work with your Exhibitor Appointed Contractor to design a stand that fits this criteria. If you're unsure of where to start? Consult our Better Stands procurement guide for help when choosing a reusable stand.

## INFORMA ALLSECURE

Your safety is our utmost concern! We have safety standards at our events and we are committed to bringing the best services to the industry. Whether they are our exhibitors, visitors, speakers, sponsors, media, all customers can come to our events to connect, learn, know more, and as well as do more business – effectively, safely, and with confidence.

# PROGRAM & ONSITE ACTIVITIES

## ✓ HOSTED BUYERS

Take advantage of our Hosted Buyers program to schedule meetings with your chosen exhibitors at the show. This matchmaking service is expected to enhance your on-site experience and get the most out of your visit to Plastics & Rubber Indonesia.

## ✓ LIVE PRODUCT DEMOS

See the latest technology and products from our key players in four days exhibition.

## ✓ CIRCULAR ECONOMY ZONE

## ✓ ASSOCIATION MEMBER GATHERING

## ✓ SEMINAR SERIES BY EXHIBITORS & PARTNERS

## ✓ CIRCULAR ECONOMY TOUR

## ✓ WASTE TO ART GALLERY

And more..

# SEMINAR SCHEDULE

DAY 1 - 15 NOVEMBER 2023

TIME	AREA	MAIN TITLE	HOST/ASSOCIATION/COMPANY	SPEAKER	PRESENTATION TITLE
09.00 - 11.00	MAIN STAGE	OPENING CEREMONY PRESS CONFERENCE & CIRCULAR ECONOMY TOUR	PT Pamerindo Indonesia Indonesian Plastics Recyclers Indonesian Packaging Federation		
11.00 - 12.20	MAIN STAGE	MoU PAN ERA - Milliken	PAN ERA		
13.00 - 14.30	MAIN STAGE	ENHANCING QUALITY: Control & Automation in Plastic Injection Molding	PT NIRWANA PERSADA CIPTA	<b>Jimmy Teo</b> Managing Director Sepro Group Southeast Asia	"SEPRO - Let's Mould The Future"
				<b>Mr. Co BH</b> CTO - Motan Group Southeast Asia	"Swift by Motan - Technology Fit for Future"
13.30 - 16.00	ROOM 104	IPF MEMBER GATHERING	Member Gathering IPF		
15.00 - 16.30	MAIN STAGE	Victory Blessing Seminars kategori packaging/flexible packaging		<b>Roberto Campora</b> Sales Manager - Global Chemindo Megatrading (GCM)	"Barrier OX"
				<b>Matteo Trombetti</b> Global Chemindo Megatrading (GCM)	
				<b>Reynard Tanuprayogi</b> Manager - Sumitomo Heavy Industries Modern	"Smart Flipper new automatic thickness correcting T-die for extrusion coating line and cast film/sheet production line"

DAY 2 - 16 NOVEMBER 2023

TIME	AREA	MAIN TITLE	HOST/ASSOCIATION/COMPANY	SPEAKER	PRESENTATION TITLE
10.00 - 13.00	ROOM 104	Brand Protection - Embracing a Circular Future with Packaging	Indonesian Packaging Federation (IPF)	<b>Henky Wibawa</b> Executive Director Pura Group	"Brand protection solution ensures that products are safe from counterfeiting across the supply chain"
				<b>Pratheep</b> ePS Packaging	"eProductivity Software, Trailblazers in Sustainability Packaging"
				<b>Riana Husen</b> DIC Graphic	"Designing packaging with embracing sustainable materials"
10.00 - 13.00	ROOM 102-64	IMDIA Sertifikasi CAD Drawing	Indonesia Mold & Dies Industry Association (IMDIA)	IMDIA	
10.30 - 12.00	MAIN STAGE	Collaboration Between the Industrial World and Universities in Accelerating the Petrochemical Industry	Muhammadiyah Jakarta University	<b>Ummul Habibah Hasyim, ST., M.Eng</b> Head of the Chemical Engineering Undergraduate Study Program, Faculty of Engineering Muhammadiyah Jakarta University	"University contribution to accelerate petrochemical industry"
			POLYTAMA PROPINDO	<b>Burhanuddin</b> Project Director PT Polytama Propindo	"Polytama's Contribution to Accelerating Petrochemical Industry"
13.00 - 14.30	MAIN STAGE	Innovations in Medical Plastics: Expanding Beyond Prosthetics and Custom Implants	BP Jamsostek	<b>Luki Agustin</b> (Moderator)	
			Orthocare	<b>Fidyanto AW, Ortho. Tech Cat II ISPO, SE, M.buss, C.HAL</b> Business Development Director Orthocare Indonesia	"The application of Medical Plastic and Gel Silicone on Prosthetic Orthotic Technologist Supporting Return to Work Bpjsamsostek Program"
			BP Jamsostek	<b>Rachmat Ferdian</b> Area Sales Manager (Indonesia) - Roechling Industrial (Singapore) Pte Ltd	"High Performance Thermoplastic Innovation on Orthopaedic and Prosthesis Application"

# SEMINAR SCHEDULE

DAY 3 - 17 NOVEMBER 2023

TIME	AREA	MAIN TITLE	HOST/ASSOCIATION/COMPANY	SPEAKER	PRESENTATION TITLE
13:00 - 14:30	MAIN STAGE	<b>Charting a Course for Biodegradable Additives: Challenges and Future Prospects</b>	Badan Riset dan Inovasi Nasional (BRIN)	<b>Dr. Frita Yuliati</b> (Moderator) Pusat Riset Teknologi Polimer- BRIN	
				<b>Joddy Arya Laksmono</b> Kepala Pusat Riset Teknologi Polimer- BRIN	"Introduction to Bioplastics in General and Product Packaging Uses"
				<b>Prof. Dr. M. Chalid, M. Eng. Sc.</b> Global Chemindo Megatrading (GCM)	"Plastic Packaging in The Future"
15:00 - 16:30	MAIN STAGE	<b>Sustainability Development in Plastic Industry</b>	PRM - TAIWAN	<b>Ivan Pan</b> Regional Sales Manager	"Riding the Global Green Wave: Plastic Industry Showcasing the Value of Sustainable Development Goals"
				<b>Harvard Lim</b> sales executive from EVER POLYMER CO., LTD.	"Exploring Recyclable Solutions and Sustainable Practices in the Plastic and Rubber Industries for Eco-Friendly Impact"

DAY 4 - 18 NOVEMBER 2023

TIME	AREA	MAIN TITLE	HOST/ASSOCIATION/COMPANY	SPEAKER	PRESENTATION TITLE
13:00 - 14:30	MAIN STAGE	<b>Manufacturing with Purpose: Bridging Art, Sustainability, and Innovation</b>	IPF GUDRND KASAKATA KIMIA UNIVERSITAS PARAMADINA	<b>Ariana Susanti</b> Business Development Director of Indonesia Packaging Federation (IPF)	"Packaging Design Innovation around the World and Sustainability Awards"
				<b>Untung Sugiarto</b> CO-Founder - GudRnD	"How Art be able to be educative media to promote sustainability"
				<b>Ulyy Christianti</b> Sales Account MGR PT Kasakata Kimia	"Masterbatch Product Innovation Towards Sustainability"
				<b>Hendriana Werdhaningsih, PhD.</b> Lecturer in Product Design, Craft, and Fashion Universitas Paramadina	"Design Education for Innovation and Sustainability"

# CIRCULAR ECONOMY ZONE

For illustration only

Share your sustainability activities with the specific attendees/media by joining our Circular Economy Zone. Successfully held the first time in 2022, this year the Circular Economy Zone returns in a bigger space and with more detailed, state-of-the-art industry-targeted content. Join us, take Indonesia's sustainable circular economy to the next level and be part of the strategic issue interpreter!

The first Circular Economy Zone images from Plastics & Rubber Indonesia 2022

## Meet this year participants

**9 companies** participated in this newly created, dedicated area showcasing the latest development of sustainable products in the plastics' sector.

### CIRCULAR ECONOMY ZONE TALK

Features 4-days thought leadership sharing session, where visitors can tap in and will gain many insights & knowledge from industry experts.

Part of:

# CIRCULAR ECONOMY ZONE TALK

DAY 1 - 15 NOVEMBER 2023		CIRCULAR ECONOMY ZONE AREA		HALL D2
TIME	TITLE & MODERATOR	COMPANY	SPEAKER	PROPOSED TITLE
13.00 - 14.30	<b>Circular Economy Landscape in Indonesia</b>  Moderator: Reymund Levy CEO PT Multidaya Prima Selaras Plastic	Polytama Propindo	Fajar Budiyo	Petrochemical Industry as the Starting Point of Circular Economy
		Indonesian Plastics Recyclers	Ahmad Nuzuluddin	Challenges in Driving Circular Economy in Indonesia
		Tokoplas	Lukito Hadisaputra	Accelerating the Transition Towards Circular Economy through Technology

DAY 2 - 16 NOVEMBER 2023		CIRCULAR ECONOMY ZONE AREA		HALL D2
TIME	TITLE & MODERATOR	COMPANY	SPEAKER	PROPOSED TITLE
10.30 - 12.00	<b>Overcoming the Challenges in the Transition towards Circular Economy - How Each Links in the Value Chain can Play a Part</b>  Moderator: Antonio Hazman Technical Committee Member IPR	Plastic Credit Exchange	Faisal Yusuf	Plastic Credit as a Means to Assist the Implementation of Indonesia's EPR Law
		Erema	Emir Melkić	Giving Value to Plastics Waste through Our Innovative Solutions
		Ampacet	SokeMeng Chan	Food Security and Packaging Design for Circularity
14.00 - 15.30	<b>Driving Circularity through Real Sustainable Actions</b>  Moderator: Endra Marsudi CEO & Founder Bantu Bumi	Pan Era Group	Suwandi Budinata	Collaborative Efforts to Close the Loop on Plastic Waste: Success Cases
		REBOUND Plastic	Yunn Tuck Choo	Global Trans Border Circularity - Let's Act Beyond Border
		Engel Singapore	Roger Bitterlin	Closing Material Cycles Together

DAY 3 - 17 NOVEMBER 2023		CIRCULAR ECONOMY ZONE AREA		HALL D2
TIME	TITLE & MODERATOR	COMPANY	SPEAKER	PROPOSED TITLE
10.30 - 11.30	<b>Challenges for Circularity</b>  Moderator: Antonio Hazman Technical Committee Member IPR	PT Finson Indomas	Gerry Darmawan	Recent Technological Developments for Higher Quality Recycling
		Kasakata Kimia	Diana Anggraini	Minimizing Environmental Impact Using Additive Masterbatch as a Sustainable Solution to Support Circular Economy
14.00 - 15.30	<b>Plastics Recycling Worldwide</b>  Moderator: Reymund Levy CEO PT Multidaya Prima Selaras Plastic	Polystar	Jack Lin	Plastics Recycling in Asia: Current Condition and Future Outlook
		Control Union	Hasan Bisri	Certification and Plastic Credit in Advancing Circular Economy
		Argus Media	Akash Ravinran	Plastic Recycling Global Landscape - Market Updates and Outlook

LeadGrab by Informa

# Scan, Qualify, and Manage Your Leads With LeadGrab!

**Scan Leads:** Scan and collect all your leads' contact information, including name, email address, geography, company name and job title.

**Qualify Leads:** Determine the criteria for the leads you want to process, by tagging them:

- Hot Leads (highly interested and ready for conversion).
- Warm Leads (show interest but need more information or action).
- Cold Leads (have not shown significant interest).

**Organise Leads:** Categorise your leads based on qualification criteria, demographics, or interest level, so you can plan the next steps.

Scan to download

Google Play Store  
(Android)

Apple App Store  
(iOS)

## How to Get Started

1

### Download the App:

Visit the App Store or Google Play, search for “LeadGrab by Informa” and install the app on your mobile device.

2

### Log in the App:

Use your exhibitor credentials that was sent to your inbox to log in the app. Look for the subject line: **Your Password for LeadGrab by Informa**

3

### Scan & Qualify Leads:

Scan visitor badges to instantly capture detailed information and start qualifying your leads for easier follow-up.

4

### Export Data:

Manage and export the data you collected to facilitate your marketing and sales efforts.

## Support

Our support team will be available at the event for any assistance.

Contact our support team at:

# EXHIBITING COMPANIES

ADI NUSA GLORY, PT

D1-8217

PT. ADI NUSA GLORY Official agent for plastic molding machines CHEN HSONG, CHEN HSONG's plastic molding machine is a pioneer of plastic molding machines in Indonesia which has existed for several years. With the best quality and innovation, CHEN HSONG's plastic molding machines still exist today. And now, PT. Adi Nusa Glory has built its presence and reputation in this sector with a strong emphasis on after sales service.

## JET MASTER MK6MAX

MK6 max (the Luxury model) Luxury Configuration for Maximum Satisfaction The MK6 max is a new member of the world-renowned MK6 series, which was originally created by Chen Hsong and Japanese engineers through combining half a century of applications experience with top-of-line advanced technology and controls expertise. With "all frills included", it provides the maximum configuration, almost luxurious, to cater for all your various moulding needs. The MK6 max starts from the solid base of the ultra-popular MK6, which was world renowned for rock-solid stability, high yields, and high efficiency, but adds on top all the "fills and options" that make your moulding tasks just so much more pleasant. It is the "luxury model" of the MK6 family. Redefining Professionalism, Performance and Value for The Plastics Industry. - Luxury ergonomics - Luxury controller - Luxury configuration - Luxury specifications - Luxury performance - Luxury experience

## JET MASTER MK6

All aspects of the MK6 engine (including the clamping mechanism, engine base and injection unit) have been improved and strengthened to make the engine more reliable and more stable. We always optimize the control system and hydraulic system so that the performance and energy efficiency of the JM-MK6 engine are even better. More Precision Dual balanced cylinder injection carriage combined with linear guide rails makes injection control friction free and more precise. More Sophisticated Machine Control Equipped with more sophisticated and easy-to-use engine controls, namely the new intelligent CPC 6.0 control from Japan Increase Profits More workspace with Euromap Ejector. All engine parts are wider and easier to reach for engine maintenance. Very Stable More optimal hydraulic control so that during the production process machine control is smoother and more stable Ultra Stable The Servo system and hydraulic system are more sophisticated so that the machine is smoother and more stable during production

## JM MK6.6/A

The MK6.6/A series is a new offering from the same team who developed the industry leading MK6 series. It is a product of decades of application experience coupled with technical excellence, engineering savvy, and years of deep research on the needs of actual users. Chen Hsong engineers took 60 years of expertise, enhanced by modern design concepts, and unified it with the proprietary Japanese Precision Hydraulics technology to enable low-friction, silky-smooth, high-speed motion, making the MK6.6/A faster, more stable, and more reliable than ever. MK6.6/A "A" for "Artisan" is homage to the unsung heroes of the industrial age the tradesmen and craftsmen whose relentless pursuit of perfection created the modern world. -Brain of the machine - superiority guaranteed New CPC6.6 professional controller - power and ergonomics perfected -Advanced toggle design from decades of experience Optimised motion control profile guarantees high speed with high stability -High-strength platens ensure high-quality precision parts Patented high-strength platens have low deformation -Perfect parts from perfectly-designed screws Profesional Japanese screw designs are well-suited for most resins and mixing needs

AIRINDO MITRA UTAMA, PT

ALMEGA SEJAHTERA, PT

D2-914

PT Almega Sejahtera is a part of Almega Group. Established in 1993, Almega Group focuses its business on a sole agency which is specialized in laboratory precision instruments and services for professional use, pharmaceutical-testing equipment, industrial weighing applications and total solutions in color and light measurement technology. With over 20 years of experience, PT Almega Sejahtera is the sole agent and authorized service center of Konica Minolta,

## KONICA MINOLTA

PT Almega Sejahtera is exclusive agent for color and light instruments of Konica Minolta Inc. The instruments such as spectrophotometer, colorimeter, luminance meter, illuminance meter, light sensor, chromameter, spectroradiometer, chlorophyll meter, display color analyzer and 2D color analyzer. Furthermore we have calibration laboratory for chromameter to prove our commitment for after sales services. With our experience, We are the best color and light consultant for your partner.

# EXHIBITING COMPANIES

ALPHA ENGINEERING CO., LTD

A2-212

Alpha Engineering has been invested, since founded in 1989, its resource and energy continuously in engineering research and development for the enhancement of the various precision measuring industry applied in domestic and foreign petrochemical resin [plastic injection raw material compound]. Especially in the compound production process, Alpha Engineering is keeping the leading position in the smart factory industry with outstanding automation of data feedback and monitoring per process.

## Automatic Feeding and Packing System

Raw material system and automatic weighing system, blender and packer scale system. etc.

AMPACET (THAILAND) CO. LTD.

D2-910

Ampacet's Masterbatch technology brings plastic alive, giving it the right look and function for almost any end use:

- Food & Beverage, Household, Industrial
- Cosmetics, Hygienics, Personal Care
- Agriculture, Geo-Textiles
- Consumer goods: Toys, Garden, Leisure, Sport
- Construction, E&E, Automotive

Ampacet is a global Masterbatch leader with 25 manufacturing sites located in 18 countries offering the broadest range of custom color, special effect, black, white and specialty additive.

## REVIVE™ COMPATIBILIZER

Allows multi-layer EVOH and PA6 (nylon) to be recycled with PE film Benefits For Film Producers

- Ability to use more EVOH and PA6 (nylon) regrind in film while reducing the use of virgin resin
- Reduce the environmental impact of plastic waste and return materials to the circular economy
- Provide a recyclable multilayer film to CPGs to help achieve their sustainability goals
- Use co-mingled scrap into the production stream for film and other uses For CPGs
- Differentiate packaging with How2Recycle® Prequalification for Store Drop-Off
- Use multilayer barrier film to preserve food quality without compromising sustainability goals

## ODORCLEAR™

Odor absorbing masterbatches that optimize use of post-consumer resins Benefits:

- Significantly reduces the carbon footprint
- Increases the percentage of post-consumer recycled polymers in products and packaging
- Supports a greener brand image for the end product manufacturer
- Offers a proactive response when governments mandate more recycled content
- Has no significant impact on production and physical processes

## GASTOP-FLEX™

Improve flexible packaging barrier performance in compliance with circular economy guidelines Benefits:

- Manufacturing high barrier packaging1
- Keeping EVOH content below 5%, in compliance with
- Design guidelines for circular economy2
- Down-gauging general purpose packaging structures without affecting water-vapor permeation,
- Reducing the weight of packaging

ARCHTEX CHEMICAL

D2-950

Taizhou Liancheng New Material Co., Ltd. was founded in 2007, is a professional R&D and production of PVC heat stabilizer, PVC processing aids, and other PVC additives innovative technology enterprises. We provide one-stop related advanced technical support and supply services.

## PVC ONE-PACK LEAD /CA-ZN HEAT STABILIZER

This product is based on the stearate, and scientifically compounded with lubricating, inorganic acidabsorbing, coloring, weathering and other raw materials

## LIQUID/TIN PVC HEAT STABILIZER

widely used in PVC sheet, panel, tubing and blow molding injection, molding products, also can be used in food packaging, medicine packaging and non-toxic and harmless

## PVC/ACRYLIC PROCESSING AID

ACR-401 is the PVC processing aid, which is produced by emulsion polymerization technology. 1. accelerate PVC fusion at low temperature, to lower the processing temperature. 2. improve the flow-ability of the melt, increase the melt strength, to get a better product appearance and quality. 3. especially suitable for non transparent products and superior quality profile

## PVC/ACRYLIC IMPACT MODIFIER

It is an acrylic co-polymer with "core-shell" structure, with cross-linked poly butyl acrylic as "core" and graft methyl methacrylate as "shell". It not only improves impact resistance performance of the product, but also increases the surface gloss of the product, and especially the weather-ability of the product.

## LUBRICANT(G-60,PE-WAX,OPE WAX

Good internal and external lubrication. Excellent dispersion. Low viscosity. Good compatibility with polyethylene, polyvinyl chloride, EPR. Impurity free, contains no paraffin Odorless, non-toxic.

## BAO LAI MARBLE ONE MEMBER COMPANY LIMITED

A1-1020

Bao Lai was established in 2010, starting from a small-scale white marble mining and processing business, over 13 years of establishment and development. Up to now, Bao Lai has owned 13 marble quarries, 02 manufacturing factories, and successfully built a chain of exploitation - deep processing - production of end products. Since then, optimally exploiting the value of natural mineral resources on the basis of the most modern technology in the world.

### FILLER MASTERBATCH

Active ingredient  $\text{CaCO}_3$  - BLPP: Is a  $\text{CaCO}_3$  compound whose main ingredient is uncoated, high-grade Limestone Powder ( $\text{CaCO}_3$ ); Combined with PP (PolyPropylene) plastic and other industrial and dispersion supports.

## BATTEN INDO ASIA, PT

D2-970

PT BATTEN INDO ASIA adalah Perusahaan Perwakilan profesional pembuat Screw dan Barrel untuk mesin Industri plastik, PIPA & karet.

Pengalaman profesional dalam pemrosesan dan perancangan, kami dapat menyediakan perawatan teknologi nitride. Terutama, barrel dan Screw tunggal berkapasitas tinggi untuk film & pipa, kami merancang dan membuat produk sesuai dengan gambar pelanggan.

PT Batten Indo Asia adalah anggota Batten Group, mengkhususkan diri dalam mengimpor dan menjual jenis aksesoris bagian mesin

### CONICAL TWIN SCREW BARREL

Material: PVC, 38CrMoAlA  
Process: Nitriding & Bimetallic  
Hardening Hardness: HB280-320  
Nitrided Hardness: HV900-1000  
Nitrided Case Depth: 0.45-0.8mm  
Nitrided Brittleness: Less than Grade 2  
Surface Roughness: Ra 0.4  
Screw Straightness: 0.015mm  
Application: PVC pipe production line

### SINGLE EXTRUSION SCREW BARREL

Blowing film/Granulation/Wire & Cable/Sheet & Panel and other single screw extrusion products

### COLOR COMPOUND

ZLYJ reducer is designed for plastic and rubber screw extruding machine with high-precision hard teeth surface. Material of the reducer is high strength alloy steel. Hardness of teeth surface is HRC54-62.

## BAUSANO SPA

D2-9302

High technology Plastic Extrusion Lines  
Bausano has been designing and manufacturing high-quality bespoke plastic extruders for over 75 years. With standard and custom extrusion lines to suit any needs, we are a strategic partner in plastic processing, especially in the production of pipes, profiles, pellets and medical devices. Bausano extrusion lines stand out not only for their quality, great solidity and extreme reliability, but also for the possibility to customize every part.

### TWIN SCREW EXTRUDER

We design and develop customised Extrusion Lines completely MADE IN ITALY.

### SINGLE SCREW EXTRUDER

Our lines are suitable to produce PVC, HDPE & PP pipes

### EGO R

The latest innovation in the Bausano lines is our Recycling Extruder for the regranulation of Polyolefins (HDPE, LDPE, PP) and PVC.

# EXHIBITING COMPANIES

## BEIER MACHINERY

D2-9501

Established in year 1998, BEIER is a leading brand in Chinese plastic industry. Vice president company of China Plastic Machinery Industry Association. So far, BEIER has been serving 600+clients over 140 countries. "BE BEIER, BE GREENER" BEIER, One-stop Plastic Processing Solution Provider:

### PLASTIC RECYCLING

PET Bottle Washing Line (Bottle-to-Bottle Food Grade)  
Rigid HDPE & PP Bottles Washing Line  
Rigid ABS, PS Battery Box Washing Line  
Flexible LDPE Film & PP Bag/Raffia Washing Line  
AI Sorter and Robot for Polymer & Color Classification and Picking  
Rigid Flake Pelletizing Line  
Flexible Scrap Pelletizing Line  
Self-Cleaning Automatic Filter for Pelletizing Extruder

### PLASTIC EXTRUSION

HDPE / PP-R Pipe Extrusion Line With Pipe Diameter Range Of 16-2600 mm, U- PVC Pipe Extrusion Line With Pipe Diameter Range Of 16-1000mm, O-PVC Pipe Extrusion Line; RTP Pipe Extrusion Line, Profile And Sheet Extrusion Lines.

### PLASTIC BLOW MOLDING

0-50L Mono/Multiple Layer & Multiple Cavity PE/PP Extrusion & Blow Molding

### AUTOMATIC COMPOUNDING & WEIGHING SYSTEM

Vertical and Horizontal Mixers for Plastic Specialized Mixer for New Energy Vehicle (Lithium Battery)

## BEILING PESONA ABADI PT

A2-2417

PT. Beiling Pesona Abadi working together with Flying Tiger KJ Co., Ltd and Yong Li Plastic Machinery Co., Ltd to provide machinery for plastic industry.

Flying Tiger KJ Co., Ltd is specialized in manufacturing auxiliary machine such as : chiller, dehumidifier, mold temperature controller, infra red rotary dryer, central material conveying system.

Yong Li Plastic Machinery Co., Ltd. is specialized in manufacturing Electric Multi-Layer Blow Molding Machine.

### WATER & AIR COOLING CHILLER

Flying Tiger manufactures various capacities of industrial water chiller( industrial water cooler ) and designed the water chiller units in module type, so it's easy to combine for different capacity demands. Flying Tiger produces both water-cooled industrial chiller and air-cooled industrial chiller, from the small industrial chiller to the large industrial chiller.

### FULLY ELECTRIC MULTI-LAYER BLOW MOLDING MACHINE EDS-300

Up until now, we have developed varieties die head from one to six layers and we have the ability to use our mature technology to design the die head over seven layer.

Machine can be silence as well as decrease noise and also keep steady when it is operating.

Optimization of die head runner design can make the material flow rate stable inside die head, avoid from retention. Therefore, colors can be changed in a short time and also save customers cost.

### CENTRAL MATERIAL CONVEYING SYSTEM

The central material conveying system is the leading trend on industry 4.0. The CMCS is able to connect to all Flying Tiger machines for centralized control and monitor.

## BENUA KENCANA MAKMUR, PT

D1-8801

### PT. BENUA KENCANA MAKMUR

20 TAHUN MELAYANI ANDA

PT. Benua Kencana Makmur berdiri pada tahun 2003. Fokus utama PT. BKM adalah memasarkan produk-produk khusus yang menopang jalannya mesin cetak injeksi, ekstruder, blow dan mesin-mesin plastik lainnya. Pilihan merek yang kita putuskan adalah SHINI® karena selain kebudayaan perusahaan yang juga memegang nilai-nilai integritas yang sama dengan prinsipal, merek ini juga dipakai hampir 80% di industri plastik di dunia.

-Pelayanan & Integritas  
-Kenyamanan penggunaan barang  
-Pergantian suku

### SHINI VOLUMETRIC DOSER MODEL SCM

Mesin volumetric dosing memiliki peran penting dalam industri plastik karena mereka memungkinkan untuk (1) presisi dalam pengukuran, (2) pengontrol kualitas, (3) efisiensi produksi, (4) penghematan bahan, (5) fleksibilitas serta (6) mengurangi risiko kecelakaan dalam proses produksi

### "SIC-A-R2" CFC-FREE REFRIGERANT AIR-COOLED WATER CHILLERS (PLATE HEAT EXCHANGERS)

Mesin chiller dengan evaporator berbasis plate heat exchangers (PHE) memiliki beberapa kelebihan seperti (1) efisiensi termal tinggi, (2) desain kompak, (3) kemampuan modulasi, (4) perawatan yang mudah, (5) ketahanan korosi, (6) rekuperasi panas dan (7) berkinerja tinggi.

### SAL-G "STANDARD" SEPARATE-VACUUM HOPPER LOADER

Autolader adalah perangkat yang digunakan dalam industri plastik untuk mengisi bahan baku berupa plastik. Manfaatnya adalah (1) meningkatkan produktifitas (2) mengurangi keterlibatan employee (3) pengisian presisi (4) mengurangi pemborosan bahan (5) kebersihan dan keamanan (6) terintegrasi dengan aplikasi lainnya serta (7) mengurangi waktu henti mesin

# EXHIBITING COMPANIES

BEKUM

D1-8330

Pioneering and innovative manufacturer of extrusion blow moulding machines for monolayer & multilayer plastic packaging containers from 3 ml to 3000 l - (handware) bottles, (stackable) cans, (L-Ring) drums, IBC-Container, others. HDPE, HMPE, PP, PET, LDPE. Tailor-made solutions for applications in beverage, dairy, liquid food, food, cosmetic, pharmaceuticals, agrochemical industry, technical applications e.g. fuel tanks, 3D blow moulding up to 7 layers.

Our expertise-18,000 machines sold worldwide

## EBLOW - SMALL PACKAGING MACHINES

Advantages at a glance:

- Compact, fully electric small blow moulding machines built with Bekum quality
- Economical production for consumer packaging, cosmetics and pharmaceuticals
- Proven C-frame clamping unit and quick mould change
- Low Small footprint and with good accessibility
- Highly efficient electric drives and highest precision from the 1st production shot
- High performance HiPEx 36D melt-homogenous extruder with ~20% energy consumption
- Spiral mandrel extrusion heads in mono and 3-layer for PCR and fast colour changes
- Intuitive BC 8.0 control with AI monitoring for continuous article quality and highest machine availability
- Exceeds energy efficiency class 10 according to Europmap 46.1 (<0.26 kWh/kg) \*depending on production configuration (demonstration value of fair production)

## EBLOW - PACKAGING MACHINES

Convincing features of the new 8 Series

- Award-winning, functional and ergonomic machine design
- Generously sized access and viewing area
- Clamping forces from 150 to 500 kN
- Dry cycle times 1.8 - 3.7 sec
- Patented C-frame of the clamping unit for high clamping platen parallelism and uniform clamping force distribution across the mould width
- Short clamping force build-up time < 100 ms
- Highly efficient electric drives
- Parison cutting with pre-pinch, spear cutting or hot trimming device
- Linear take-out system with rear article conveyor belts
- Mechanical quick mould clamping system

## XBLOW - INDUSTRIAL PACKAGING

Advantages at a glance:

- Flexible and modular industrial blow moulding systems with high accessibility and flexible production solutions for large canisters, drums and IBCs
- Unique hybrid electric clamping concept up to 3,000 kN, fast, energy-saving and with unique mould thickness variance (patent pending)
- Rapid stroke movement electrically and hydraulically. Hydraulic mould functions and accumulator heads driven by variable-speed hydraulic power unit.
- Can be equipped with bottom calibration, blowing and spreading blow pins, as well as horizontal and vertical parison transfer devices.
- Complete production solutions including moulds, robots, post-processing or post-cooling stations and material handling from a single source, i.e. for 220L ring drums.
- Intuitive Bekum Control 8.0 control with AI monitoring for continuous article quality and highest line availability
- High-performance HiPEx 36D extruder with homogeneous melting and process stability with ~20% energy consumption
- Modern simulation-supported spiral mandrel extrusion heads, as accumulator head and continuous for mono to co-extrusion. Melt and temperature homogeneous with short colour change times

### TWO-PLATEN LARGE INJECTION MOLDING MACHINE

DP Series Two-Platen Large Injection Molding Machine For Deep Cavity Products Like: Home Appliances, Car Parts, Outdoor Dustbin, Plastic Pallet, Plastic Crate etc.

### AUTOMATIC BLOW MOLDING MACHINE

Automatic Blowing Machines are composed of world-class components professionally integrated to provide efficient molding, stretching, and clamping. The efficient heating system, low maintenance requirements, energy-saving servo motors, and highly automated PLC control system enable user-friendly and sustained operation with optimum production.

### HIGH PRECISION INJECTION MOLDING MACHINE

Powerjet New Series Hydraulic Injection Molding Machine With Faster Injection And Plasticizing Speed, More Stable And Higher Efficiency.

BOLE INTELLIGENT MACHINERY CO., LTD

A1-3002

## BOLE

As a latecomer in China's injection moulding machine market, BOLE keeps competing with other brands, and gain the trust from customers with high-performance and high-stability product as well as customized service.

So far, BOLE injection moulding machines have been sold to more than 70 countries. Especially in 2015-2018, the developed countries in America and Europe have grown into the main markets of BOLE.

### INJECTION MOLDING MACHINE

The range of products covers nearly 100 specifications and 6 main series including high-precision Two-Platen DK series, hydraulic servo EK-S series, full-electric FE series, Carbon-Fiber Products Intelligent Moulding Line CIML series, high-speed HK series and multi-materials injection MK series. The range of clamping force is from 70 ton to 6800 ton, and the range of injection weight is from 65g to 60000g.

## BORCHE

PT. VICTORY UTAMA LESTARI JAYA will represent BORCHE The Expert of Intelligent Two-Platen IMM, Manufacturer of 6800T Two-platen IMM. China National Demo Unit of Intelligent Production, the only one in plastic machinery industry which founded in December 2002, China  
Area Coverage: 205,000 m<sup>2</sup> with Guangzhou Headquarters > 80,000 m<sup>2</sup>, Hangzhou Production Base > 90,000 m<sup>2</sup>, Intelligent Manufacturer Demonstration Base> 35,000 m<sup>2</sup> with more than 100 engineer for R&D, as leading exporter of IMM in China.

**BORCHE INJECTION MOLDING MACHINE TYPE BU-V**  
BU-V Two-Platen Intelligent Machine  
16 Year's R&D on Two-platen IMM. FULL Range & Big Scale ( From 500T-6800T) widely applied to aerospace field, automotive industry, transportation field, household appliance, and new rural construction.  
Machine Features:  
Super Long Lasting Tie Bar  
Tie Bar Guiding  
Shorter Cycle Time  
Intelligent Interconnection  
Innovated Injection Structure

**BORCHE ELECTRIC INJECTION MOLDING MACHINE TYPE BD**  
BDMachine  
Fast  
Quick response: injection response time less than 50ms  
Overlapped movement: production time shortened by 30%  
Fast cycle time: dry cycle decreased by 20%  
Fast mold open & close: 500mm/s  
Accuracy  
Repeatability precision of product weight increased by 3 times  
Repeatability precision of injection position increased by 10 times  
Energy Saving  
Energy saving by 30%  
Low water consumption  
Raw material saving: low product defects  
Low oil consumption, 80% less than hydraulic machine  
Aesthetic  
Brand new design, integration of aesthetics and ergonomics

BUMI ENVIRO LESTARI, PT

D1-832

Calvatis GmbH is a worldwide leading private owned manufacturer of detergents and disinfectants designed for industrial applications. We offer our business partners individual and high-quality hygiene concepts. Our well known calgonit-branded product portfolio is worldwide marketed since 1929. Our main business segments are global Hygiene Consulting and Management for the Beverage, Food and Milk processing industry, Agriculture, Wastewater treatment, Laundry, Cleaning Services and Engineering.

**SOLAR POWER**  
A power plant that uses Solar Photovoltaic (PV) solar cells to convert solar radiation into electrical energy. This power plant is a form of renewable energy that utilizes an environmentally friendly alternative energy source.

## CATUR PUTRA MAKMUR SEJAHTERA

A2-2302

PT Catur Putra Makmur Sejahtera was established in September 2009 by Mr. Tjen Khin Yau, who was an experienced engineer in plastic machinery since 1982. We offer injection molding machine, extrusion blow molding machine, injection blow molding machine, stretch blow molding machine, PET preform mold. We also provide technical support (after sales service) and turn-key project.

### SWL EXTRUSION BLOW MOLDING MACHINE

Shantou Waley Plastic Machinery Factory Co., Ltd. is located in the beautiful coastal city of Shantou, Guangdong Province, China. The company is a professional manufacturer of plastic hollow molding equipment founded in the late 1980s. It has strong independent R & D and manufacturing capacity and perfect after-sales service. The company has been recognized as "Shantou private science and technology enterprise", "Guangdong private science and technology enterprise" and "tax credit rating a tax enterprise", and has passed the "ISO9001:2008 international quality management standard system certification" and "EU standard CE safety certification".

### LIGUANG INJECTION MOLDING MACHINE

Liguang Machinery Co., Ltd. Liguang Machinery Co., Ltd. is a manufacturer who specially produces high quality plastic Injection moulding machines, which computer control system with Chinese and many Foreign languages display, These precise machines accord with the design. Manufacturing and assembling By European plastic & rubber machinery manufacturer united association. The clamping force ranges is from 90T to 2000T, shot weight is from 71g to 12069g. We purchase many parts from The whole world, such as hydraulic & electric components from Japan, Italy, France and Germany. So our machines have the characters with high rigidity, large clamping force. High injection pressure and precision & duration.

### VICTOR INJECTION BLOW MOLDING MACHINE

Established in 1958, we located in Suzhou of Jiangsu Province, only 110km close to SHANGHAI. It has over 200 staff working among which are 150+ Engineering and Technical Personnel. The company covers an area of 76 mu and have more than 120 sets processing equipments and dozens of imported high precision digital tooling machines which better meet your precision requirements for machine and mould.

With the mind of "Sincerity, Innovation and Service", all the Whole Plant Equipment we sold to overseas and domestic market got good feedback. We have ISO9001 quality control system and passed CE & UL safety certificated. Our products well sold to more than 40 countries such as USA, Turkey, Mexico, India.

## CENDRAWASIH SEJAHTERA, PT

A1-1007, A1-1009, A1-1102

We are CENDRAWASIH SEJAHTERA a professional supplier of screw barrel since 2005 in Indonesia.

We can supply all kinds and types of screw barrel for injection molding machines and extruders and other auxiliary machines. we can also dispatch engineers to your company to check your currently used types of screw barrel and draw them out accordantly.

### SCREW BARREL

We can supply all kinds and types of screw barrel for injection molding machines and extruders and other auxiliary machines.

### CONICLE TWIN/DOUBLE SCREW BARREL

Conical twin screw extruder is mainly used to process PVC powder by plasticizing, mixing and extrusion. Equipped with auxiliary equipment, it can produce PVC pipes, profile, plate, sheet, film, as well as plastic granulation.

### PLASTICS MACHINE, ETC

We also sell all kinds of plastic machines, such as granulator, drying machine and so on.

### REDUCTION BOX, ETC REDUCTION BOX / GEARBOX

# EXHIBITING COMPANIES

CHANG HORING RUBBER CO., LTD.

A1-1306

Chang Horing Rubber group is the biggest rubber compound supplier in Taiwan. We have 3 factories in Taiwan and one in Shanghai, CN and the other new one in Thailand. We provide total solution of any kind of rubber compound, especially automotive, oil&gas, home appliance and chemical industry ... etc. If you are interested in us, please feel free to contact us for more information.

## FASOL FKM PRE-COMPOUND

CHR could not only provide you all kinds of rubber compound products but also FKM Pre-compound. Our brand of FKM PC is FASOL and our mission is to provide upstream and down stream supply chain, integration. CHR team design a FKM material for application such as turbo charge hose(TCH), O-ring, Oil-seal, Boots, etc. We also working on ultra-low temperature FKM and FFKM designing customized-formulation to fully reach customer's requirements.

## OIL & GAS CERTED COMPOUND

CHR could not only provide you all kinds of rubber compound products but also FKM Pre-compound. Our brand of FKM PC is FASOL and our mission is to provide upstream and down stream supply chain, integration. CHR team design a FKM material for application such as turbo charge hose(TCH), O-ring, Oil-seal, Boots, etc. We also working on ultra-low temperature FKM and FFKM designing customized-formulation to fully reach customer's requirements.

## CARBON EMISSION REDUCTION COMPOUND

CHR keeps updating various environmental protection regulations and comply with EU REACH and ROHS regulations. In response to the global issue of reducing carbon emission, we have developed new NBR and EPDM compound with 30-40% carbon emission reduction. Please come to our booth to know more.

CHANGZHOU YINGCHUANG ROLLING EQUIPMENT CO., LTD.

D2-9425

Changzhou Yingchuang Rotomolding Equipment Co., Ltd. was founded in 2018 and is located in the beautiful Longcheng Changzhou. It covers an area of 10000 square meters. It is a national high-tech enterprise. "Yingchuang" brand technology is at the leading level in China, with domestic first-class rotational molding industry talents and technical team. We focus on rotomolding equipment, slush molding equipment, rotomolding molds and rotomolding products, customizes the design according to the needs.

## CAROUSEL ROTOMOLDING MACHINE

Multi-station carousel rotomolding machine is composed of oven, trolley, rotating arm and turntable, operating platform, combustion cycle system, wireless communication system. Rotomolding machine is suitable for producing most large and medium-sized plastic products and composite products, rotomolding product quality is good, investment cost is low.

## SHUTTLE ROTOMOLDING MACHINE

Shuttle Rotomolding Machine is composed of oven, trolley, rotating arm and turn table, operating platform, combustion cycle system, wireless communication system. Rotomolding machine is suitable for producing most large and medium-sized plastic products and composite products, rotomolding product quality is good, investment cost is low.

## ROCK N ROLL MACHINE

The open flame swing machine has low equipment cost and small floor space. It is suitable for large hollow products, easy to operate and easy to maintain. It is an ideal equipment for the introduction of rotomolding. Rotomolding machine is suitable for producing most large and medium-sized plastic products and composite products, rotomolding product quality is good, investment cost is low.

## OVEN SWING ROTOMOLDING MACHINE

Oven swing rotomolding machine is for rectangular products such as boats and cattle troughs. It adopts one-button operation, and the stability and reliability can be improved. Rotomolding machine is suitable for producing most large and medium-sized plastic products and composite products, rotomolding product quality is good, investment cost is low.

## ROTOMOLDING MOLD

Types of rotomolding mould: Steel mould  
CNC steel mould CNC  
CNC copper mould CNC  
Cast aluminum mould  
CNC aluminum mould CNC  
Rotational molding molds are used to store plastic raw materials and manufacture rotational molded products

Silence, low heat, without hydraulic leaking problem.

### CMS-Q1L GALLONS PET STRETCH BLOW MOLDING MACHINE

5 gallons PET fully automatic PET stretch blow molding machine. For one way, heavy preform available.

## CHNV TECHNOLOGY CO., LTD

A3-3424

CHNV Technology Co., Ltd, founded in 2008, A-share listed company, supply customers excellent lubricants and PVC additives. Main products: fatty acid salts, fatty acid esters, fatty acid amides, programmatic composite additives (PVC Ca/Zn Stabilizer, WPC Polymeric Lubricant, Compound Additives)  
Application: plastic, rubber, petrochemicals, paint, paper, food, cosmetics feeds, etc.  
Production bases: 2 in China, 1 in Indonesia.  
Capacity: 230,000mt/year.  
Certificate: ROHS, REACH, FDA, HALAL, ISO...

### FATTY ACID SALTS

Include Zinc stearate, Calcium stearate, Magnesium stearate, Lithium stearate, etc.

Application:

1. For PVC Stabilizer and Lubricants
2. As Halogen Acceptor in Petrochemical Industry
3. As Lubricants and Dispersing Agent for Plastics and Rubbers
4. As Mold-releasing Agent
5. For Construction

### PVC COMPOUND ADDITIVES

Include kinds of PVC Ca/Zn Thermal Stabilizers, which could be well used in kinds of PVC compounds.

Application:

1. Used for PVC wire cable, especially for lead-free cable, PVC pipe extruding.
2. Used in the processing of outdoor rigid PVC windows and doors.
3. Opaque injection products, especially suitable for soft material or half hard toys.
4. Opaque or transparent calendaring film.
5. Used in SPC, LVT, Profile, Foam sheet etc.

### WPC POLYMERIC LUBRICANT

It has outstanding wetting properties, shown excellent dispersity and high production rate. It obviously increases wood or fascicule dosage and leads to a wide processing area.

CHNV is professional in WPC production, and can provide a series of services, including WPC lubricant, equipment, and even formula and technical supports, etc.

## CHUAN LIH FA MACHINERY WORKS CO., LTD.

A1-1315A

CLF is a top-tier brand in the field of plastic injection molding machines, renowned worldwide for its superior technology and innovative products. Since its inception, CLF has been committed to providing high-quality, high-efficiency injection molding solutions widely applied across diverse industries. The company's products not only exhibit exceptional performance but also prioritize environmental sustainability.

## CHUMPOWER MACHINERY CORP.

A1-1227

Chumpower is the leader in linear stretch blow molding machine in Asia. Located in Taichung Taiwan, we have been manufacturing of machineries for plastic industry for more than 35 years. Chumpower specialized in PET stretch blow molding machine, PET bottle turnkey system, preform moulds and offers wide range of SBM models to suit all kinds of packaging needs in PET. Our machine category includes indexing hydraulic type, indexing all electric type, all electric linear type, wide mouth jar series

### CPSB-LSS8 FULLY ELECTRIC PET STRETCH BLOW Moulding MACHINE

The new CPSB-LSS8 from Chumpower are the result of our years of field experience in producing high linear machine. With optimized machine mechanisms. The max. output can reach to 18,000 BPH, which is the highest in the class.

### CPSB-TSS6000 PET STRETCH BLOW Moulding MACHINE

Phoenix series has reasonable price and high stability with low occupation of ground area, simple operation, and easy maintenance. The TSS6000 is suitable to produce up to 0.6L with 38 mm neck size, The max. output can reach to 6000 BPH.

### CPSB-2000L LARGE VOLUME PET BLOW Moulding MACHINE

Chumpower W/L series is cost-effective, modular design for easy maintenance, compact structure for saving space, highly reliable blow molding machine and equipment, special heating array structure to minimize over space and energy consumption.

## CIE EXTRUFORMING MACHINES (SHANGHAI) CO.,LTD

D2-9517

CIE EXTRUFORMING MACHINES(SHANGHAI) CO.,LTD is high-tech enterprise certified by the state. For many years, it has been committed to becoming a leading supplier of plastic extrusion equipment and plastic thermoforming equipment in the industry. Since its establishment, the company has always followed the business philosophy of "integrity, pragmatism, development and innovation", and has long focused on the exploration and innovation in the design, R&D, manufacturing, sales and after-sales service.

### APET/GPET/RPET/CPET/PLA PARALLEL TWIN-SCREW EXTRUSION MACHINE

The Extruder fully considers PET production process and combined with advanced PET extruder technology of German and Italy. The elements design screw and the barrel adopts European advanced vacuum system, which avoids the high power waste caused by the long-time heating of crystallizer and dehumidifier which is necessary for traditional PET single screw extruder.

### PP/PS SHEET EXTRUSION MACHINE

The machine adopts unique energy-saving design, low energy consumption, high production capacity and stable production. Its sheet is widely used in thermoforming products, electronics and stationery.

### PC/PP/PE HOLLOW BOARD EXTRUSION MACHINE

Used for general office, hall, shopping malls, sports venues, the daylighting of public facilities, railway stations, packing lot, etc.

# EXHIBITING COMPANIES

CIPTA MEGAH LESTARINDO, PT

A3-320

Didirikan sejak tahun 1986 di Medan-Sumatera Utara, bergerak sebagai importir spare-parts dan bengkel perakitan mesin-mesin plastik seperti mesin tiup kantong plastik, mesin potong plastik, mesin proses biji plastik, mesin rotogravure printing dan mesin pendukung lainnya. Pada tahun 2010, perusahaan berpindah ke Tangerang dekat dengan Bandara Soekarno Hatta.

VISI CML adalah menjadi supplier spare parts dan mesin plastik dengan teknologi terkini dan terlengkap, termurah dan kualitas terbaik.

## PLASTIC GRANULATOR RECYCLING MACHINE

Three-in-one recycling facility combines shredder, extruder and pelletizer functionalities. Die head cutting saves manual feeding costs.

## HOT SEALING & CUTTING AUTO PUNCH T-SHIRT BAG MAKING MACHINE

It is applied to produce and print the double-colored or uncolored T-Shirt bags, using HDPE or LDPE roll film, adopts computer control, servo motor fixed length and touch screen actual display to finish the feeding, sealing, cutting, punching holes and transporting only in one process, which can save man-power greatly and yield good economic result. It's traced by 2 photocells to make the printing very exact.

## ABA THREE LAYER PLASTIC FILM BLOWING MACHINE

It is used for blowing LDPE, LLDPE, HDPE etc which are widely used for packing liquid, industrial products, garments, textile and printing lamination. The screw and barrel are made of high quality alloy with optimal hardness and strong corrosion resistance after nitrogen treatment and precision finishing. With 2 kind of material, we can reduced the material cost which in the middle side can use filler masterbatch

COSMOS MACHINERY TECHNOLOGY (JIANGSU) CO., LTD.

A2-2530

Cosmos Machinery Technology (Jiangsu) Co., Ltd. is a wholly-owned subsidiary of Cosmos Machinery Enterprises Limited, a Hong Kong public-listed company, and has production capacity of 6,000 sets injection machine per year. Cosmos Jiangsu is able to provide full injection machinery and corollary equipment for different scale and varieties of levels client whose product covers 900KN – 40000KN clamping force and 43g – 60000g shot volume.

## INJECTION MOLDING MACHINE

CS RUBBER INDUSTRY CO., LTD.

D2-920

CS RUBBER INDUSTRY CO., LTD.  
MANUFACTURER OF RUBBER COMPOUND PRODUCTS

One of the qualified & expert manufacturer of rubber compound in Thailand. Mixing technical and capacity provider.

## RUBBER COMPOUND MANUFACTURER OF RUBBER COMPOUND PRODUCTS

## BLACK COMPOUND

The rubber compounds we produce can be :

1. CS Rubber owns the recipes and also provides all materials
2. CS Rubber owns the recipes and customer provides partial materials
3. Customers own the recipes and CS Rubber provides all materials
4. Customers own the recipes and also provide all materials

## COLOR COMPOUND

The rubber compounds we produce can be :

1. CS Rubber owns the recipes and also provides all materials
2. CS Rubber owns the recipes and customer provides partial materials
3. Customers own the recipes and CS Rubber provides all materials
4. Customers own the recipes and also provide all materials

## DAINAN 2 INDONESIA

D1-8622

PT. DAINAN 2 INDONESIA is a distributor of Test and Measuring Instruments. We are an Authorized Agent for ESPEC, IMV, SUGA, Shinyei, HunterLab, GTI and Rhopoint. We provide the best products and also provide after-sales service continuously with our professional technician, trained, dedicated and ready to help. We would like to go hand in hand with our customers to achieve success. Your success is definitely a step closer.

### ESPEC PLATINOUS J SERIES - TEMPERATURE & HUMIDITY CHAMBER

ESPEC Platinous J Series - Your best choice to cover broad reliability test applications. It offers flexible configurations to meet the needs of today and tomorrow.

### IMV A SERIES

The A-series meets a wide range of test requirements and specifications for a versatile testing environment. It has advanced automatic energy-saving technology and a high level of functionality and provides an improved working environment for vibration test

### HUNTERLAB AGERA

Flexible. Full spectrum. All-in-one. Agera Spectrophotometer is the ultimate solution for appearance quality control.

## DONGGUAN JINJUN MACHINERY CO., LTD

A1-1017

More than 20 Years of experience makes us the Leading Manufacturer of Blow Molding Machines. Automatic production lines integrated with Blow Molding machine, leak testing and bottle bagging

### BLOW MOLDING MACHINE

High Quality Fast Series Extrusion Blow Molding Machine

### PETG / PCTG BLOW MOLDING MACHINE

The Best Blow Molding Machine for PETG / PCTG bottle Machine

## DONGGUAN YAXING MOULD TECHNOLOGY CO.,LTD.

A1-156

We are the tool maker for plastic injection mold and part in DongGuan-China. 100 people's factory built 300-400 set of mold each year. Also built prototype for customer delivery part in 20 ~25 days. Mainly customer from Asia and Europe Hope we can have the chance to estimate mold and plastic part cost for your team. Welcome you visit our workshop.

### INJECTION MOLD

Plastic injection mold design and manufacture Prototype Die casting.

### PLASTIC PART

Plastic part make by ABS , PP , PA66 ,POM,

# EXHIBITING COMPANIES

## DOUBLES TEKNIK ABADI, PT

A1-120

PT Doubles Teknik Abadi, merupakan supplier sparepart dan produk yang dijual terkonsentrasi pada rem industri dan kopling Industri, seperti rem pneumatik (rem udara), rem dan kopling elektromagnetik, chuck pengaman, chuck inti, poros udara, rem bubuk, dan aksesoris yang terkait untuk sistem transmisi dan rem. Aplikasi industri kami berkisar dari mesin pengemasan, mesin printing, peralatan kawat dan kabel, mesin tekstil, mesin karet, mesin ban, mesin pembuat kertas hingga berbagai desain mesin.

### DBR AIRTAKE BRAKE 256

Fungsi utama rem adalah mengubah energi mekanik menjadi panas, yang kemudian dibuang ke atmosfer. Dengan tambahan kipas listrik yang dipasang di tengah wadah, diperoleh daya termal terbaik pembuangan dicapai tanpa ketergantungan yang tinggi pada kecepatan. Cocok untuk pembuangan panas yang tinggi.

### AIRSHAFT

Airshaft terdiri dari kombinasi dasar body dan jurnal, dan body harus dipilih sesuai spesifikasi kerja. Airshaft Terdiri dari 3 tipe, yaitu Airshaft Tipe LUG, Tipe LEAF dan Tipe MULTIBLADDER

### SAFETY CHUCK

Safety chuck adalah kopling cepat yang digunakan dalam aplikasi shaft center wind dan center unwind serta menghemat waktu bongkar muat. Ada berbagai ukuran safety chuck model flange dan pillow kepada para customer dan disesuaikan dengan berbagai model bentuk dari penampang poros penahan.

## DWI HANDAL OTOMASI INDONESIA, PT. (DH AUTOMATION)

A3-3406

We are engineering and automation partner company. Engineering services offered by DHAutomation cover the design, manufacture, supply and implementation of Industrial Automation and Control System. We have experience in implementing PLC, HMI, VSD, Servo and Scada System. Our products : Opkon Linear Sensor, Siemens Industrial Automation, Weidmuller Automation, Keyence Sensor & Vision, MPDV MES System, LAPP Power & Control Cable, Teknokol Arm Support System and ABB Robotics.

### OPKON LINEAR SENSOR

Linear Position Transducer - Potentiometer - Non-Contact Magnetostrictive Position Sensor - Mobile Hydraulic Sensor - Linear Magnetic Encoder - Rotary Encoder

### SIEMENS AUTOMATION

SIMATIC controllers offer more than just powerful hardware for controlling all types of machines and plants. The capabilities of SIMATIC controllers are constantly being expanded with new functions.

### WEIDMULLER ELECTRONICS

Considering the increase of automation, isolating amplifiers are required which convert, isolate, monitor, protect and visualize your digital and analog signal values.

## DWI MAJU, PT

A2-234

PT. Dwi Maju is the premier packaging solutions provider in Indonesia. We have over 20 years of experience in the packaging industry and we keep improving our product offering to fully satisfy our customers needs.

Our product are plastic packaging (stretch film, shrink film, blown film, plastik PE), thermal paper, labels, and 3M products.

Our headquarter is located in Jakarta, with a branch in Surabaya, warehouse in Cikarang and Bogor.

### STRETCH FILM

Manufacturing process done with high end stretch film production lines from USA and Austria

### LABELS

Standard adhesive stickers, to be used as barcode media or product design sticker. Comes in a wide range of sizes and fits into any environment

### THERMAL PAPER

Used in a wide array of functions such as POS systems, ticketing, ATM receipt, aviation, medical, freeway and oil exploration. Our own brand of rolls include Thermarol and Telestrook

# EXHIBITING COMPANIES

ENGEL MACHINERY

A1-1318

## ENGEL

be the first

ENGEL offers injection moulding turnkey solutions from a single source: As one of the leading injection moulding machine manufacturers, we stand for seminal development and production of injection moulding machines and their automation. With innovative technologies, modern production facilities and sustainable service & support, we enable our customers to be competitive and successful.

### ENGEL E-MAC ALL-ELECTRIC MACHINE

The All-electric, Small Injection Molding Machine for Near-standard Applications.

Get the most out of your production space - with our small e-mac injection molding machine. Minimal floor space requirements coupled with great flexibility in machine configuration characterize the e-mac. Combined with our application expertise, you get the right overall solution for your requirements from a single source.

EREMA ENGINEERING RECYCLING MASCHINEN UND ANLAGEN GMBH

D1-8233

EREMA Engineering Recycling Maschinen und Anlagen Ges.m.b.H. has its headquarters in Ansfelden near Linz in Austria and specialises in the development and manufacturing of plastics recycling systems and components. Founded in 1983, the company is now the world market leader. Some 7,000 EREMA recycling systems are now in use worldwide.

### REGRINDPRO® & REFRESHER

Highly efficient anti-odour technology from EREMA

Odour-optimised premium recycled pellets directly from contaminated post-consumer regrind material? The efficient interplay of the EREMA technologies INTAREMA® TVEplus® Re grindPro® machine with the ReFresh module makes it possible. The unbeatable combination of top pellet quality and odour optimisation opens up completely new application opportunities for recycled plastics.

FANSTAR (DONGGUAN) SMART TECHNOLOGY CO., LTD

D2-9401

Fanstar's products cover : energy storage, photovoltaics, stationery, automobiles, electronic products, aerospace, pet products, medical equipment, instruments, electromechanical, daily household and other fields. Fanstar always insists on mastering the core technology of injection molding production, and analyzes the technical communication with customer before production, to ensure short mold delivery, long lifetime, faster mass production, excellent quality of finished products!

**MULTI CAVITIES PLASTIC INJECTION MOLD**  
BALLPOINT PEN MOLD, 16 - 96 CAVITIES

**DOUBLE INJECTION PLASTIC INJECTION MOLD**  
DOUBLE COLOR OR DOUBLE MATERIAL IN ONE MOLD.

**PLASTIC INJECTION MOLD OEM/ODM PART**  
BASED ON DRAWING, NON STANDARD PART.

# EXHIBITING COMPANIES

FILLEX MACHINERY INDONESIA, PT

A2-2318

Our main products including : Water filling machine, carbonated soft drink filling machine, Juice filling machine, sticker labeling machine, cold glue labeling machine, stretch labeling machine, etc.

FILLEX was established in 2006, possessed with 10000 square meters standard workshop and more than 60 professional workers. FILLEX has adhered to our long-term concept of "Filling Your Ideas" and "Packing Your Ideas" with professional engineering team.

## WATER TREATMENT SYSTEM

Reverse Osmosis Water Treatment Purify Machine

Applicable to pure water, mineral water, beverage products, water and process water of various types of water treatment equipment.

Mainly including:

- 1.Pretreatment system (multi-media filter, activated carbon filter, ion exchanger , microporous filter
- 2.Membrane separation system (ultrafiltration , nanofiltration , reverse osmosis unit)
- 3.Electrodialysis equipment
- 4.Sterilization equipment (Ultraviolet equipment, ozone equipment) and so on"

## BOTTLE BOTTLE MAKING MACHINE

- 1.The servo motor is adopted to drive the molding mechanism, triggering off a bottom mold linkage as well. The whole mechanism works speedily, accurately, stably and flexibly. Meanwhile, it is energy efficient and environmental safe.
- 2.Oil or electricity heated, the mold can ensure bottles meet the hot filling requirement and withstand a temperature up to 90-95°C without deformation. The capacity of each cavity can be up to 700-900bph.
- 3.The servo motor driven stepping unit and stretching mechanism have improved the speed, flexibility and accuracy of blowing.
- 4.The simple slide-in way of mold mounting makes it possible for the operators to change molds easily within 30 minutes.
- 5.The man-machine interface is highly automated and easy to operate. The compact machine occupies a smaller area.
- 6.The series is applied widely in PET hot filling bottle for juice, tea drinks, energy drinks and other hot filling drinks.

## FILLING SYSTEM

3-in-1 filling monoblock, combined with rinsing, filling and capping. It is innovated and designed in the requirement of still pure water and mineral water, on the bases of introducing, digesting and absorbing advanced technology from Germany and Italy.

FINSON INDOMAS, PT

D2-9317

We are Indonesian reliable company specializing in plastic packaging solutions, representing advanced innovative technology and converting machineries, with more than 15 years experiences in the field of high-tech plastics production for multi-layer plastic films/sheet, plastic cups, foam cups, plastic trays/containers, cup printing, including auxiliary equipments for material handling, granulator, as well as recycling machineries, with notable brands i.e.:

## MEAF SHEET EXTRUSION

High efficient Sheet Extruder for thermoforming, construction and industrial application

## TRIA GRANULATOR

Plastic Processing Granulator system for Post Industrial and Post Consumer Recycling

## ZOCCHI BLOWN FILM EXTRUSION

High Efficient Blown Film line using Infrared Barrel Heating and unique screw and barrel geometry

FOSHAN JIUXING MACHINERY CO., LTD.

A1-1128

Since it's establishment in 2008,with the unremitting of the team,it has developed into a diversified company intergrating R&D,production,sales and service,have become a pioneer in the industry.With the continuous change of the current social form, energy conservation and environmental protection.Have become the first purpose of our development. Over the years,we are continuing to explore and try,finally made breakthroughs in the field of plastic recycling. The low-temperature environment

## LOW TEMPERATURE ENVIRONMENTALLY FRIENDLY GRANULATOR

It occupies a small area, is simple and easy to operate, and is pollution-free. It is suitable for recycling and granulating PE, PC, PVC, EVA and other plastics.tons to 290 ton.

## EDGE MATERIAL RECYCLING GRANULATOR

Suitable for all materials, recycling the scraps cut from the casting machine

# EXHIBITING COMPANIES

FUCHUNSHIN TECHNOLOGY INDONESIA, PT

D1-8101

FCS Group is implementing a philosophy to create high value added products, and to integrate the business strategies of globalization and diversification. In addition to the original business of injection molding machine R & D, manufacturing, sales and service in several countries.

## FCS SA -290H

It is a newly-released servo hydraulic energy-saving model with outward toggle clamping unit, especially suitable for PET blood collection tubes. With its clamping force ranging from 220 tons to 290 ton.

## FCS CT- E / CT-R SERIES

It is a newly released model of All-Electric injection molding machine by FCS. The applicable industries include packaging, optical element, medical, and 3C appliance such as laptop or multifunction printer parts, etc. With its clamping force ranging from 50 tons to 900 tons.

## FCS FA - SERIES

It is a newly released model of advanced toggle hydraulic and servo energy-saving IMM by FCS. The applicable industries include houseware, stationary, automotive, 3C and home appliance industries, especially for multi function printers, laptop or computer parts. With its clamping force ranging from 60 tons to 530 tons.

FOSHAN SITUO INTELLIGENT TECHNOLOGY CO.,LTD

D2-9116

Situo Intelligent Technology Co., Ltd. located in china, is a professional intelligent equipment manufacturer with artificial intelligence and machine vision technology as its core. The company is committed to providing one-stop machine vision solutions and related supporting facilities for customers at home and abroad. The company has a strong R&D team with more than 10 years of vision industry experience. in this segment market share is the industry first.

## FILM DEFECT INSPECTION SYSTEM

The WIS film inspection system developed by Situo Intelligent is applicable to most film production processes, including cast, blow molding, double-drawing, single-drawing, lamination, etc.; including but not limited to PP, PE, PET, EVA, PVB, PA, aluminizing, lithium battery diaphragm and other composite films. It can effectively detect all kinds of defects in the process of film production, identify minor defects in product manufacturing and monitor the homogeneity of the product manufacturing process, and can also be used as a tool for assessment and tracing.

## PRINTING QUALITY INSPECTION SYSTEM

The PIS printing inspection system developed by Situo Intelligent Company is suitable for various materials contained in pharmaceutical packages, cigarette packages, 3C packaging, daily chemical packaging, hangtags, food, health materials and other products. It can effectively detect all kinds of defects in the printing process, identify minor defects in product manufacturing and monitor the homogeneity of the product manufacturing process, and can also be used as a tool for assessment and traceability.

## HIGH SPEED INSPECTION MACHINE

The high speed inspection machine developed by Si Tuo Intelligent Company is dedicated to solving the problem of small batch, multiple repetitive defects accurately and quickly find and locate defective defects, reduce the work intensity and fatigue of workers, and protect the quality of printed products before leaving the factory. Use scenario: small batch orders, part of the small roll rewinding after slitting to find defects, part of the customer small batch returns back to the order situation. Applicable to: Roll products, steel strip, film, non-woven, sanitary materials and other products. (Both upper and lower sides can be detected, not affected by the direction of rewinding)

# EXHIBITING COMPANIES

FULIYUAN INDUSTRIAL CO., LTD

D2-9420

Huizhou Fuli Yuan Industrial Co., Ltd. was founded in 2003, covering an area of 15,000 square meters. Company's main products are plastic extruders: PVC/PE cling film machine, PE /CPE stretch film machine, paper cup laminating machine, PP woven cloth, non-woven film laminating machine, aluminum film laminating machine, kraft paper machine, TPU/ EVA laminating machine, plastic recycling granulator, EPE foam machinery and other machines. Products are exported to more than 60 countries around the world.

## PVC CLING FILM MACHINE

PVC cling film is a kind of plastic packaging product, usually made of PVC powder by polymerization reaction with several other ingredients. Mainly used for packaging and preservation of vegetables, fresh fruits, flowers, oil-free raw food, daily necessities and industrial packaging. It is widely used in the packaging fields of family life, supermarket stores, and industrial production. PVC plastic wrap has the advantages of good transparency, high tensile strength, strong self-adhesion, and lower cost of use.

## PE STRETCH FILM MACHINE

This unit mainly applies LLDPE and adopts several kinds of resins to manufacture single / double-side self-adhesive three-layer stretch wrapping film by extruder. The multi-layer co-extruded stretch film has better tensile strength, puncture resistance and impact resistance than single-layer or two-layer stretch wrapping film. Its good shrinking memory and self-adhesive function can make goods integrity to prevent them from loosening and collapsing transportation and being polluted by dust. The transparency and tensile strength of this product can make the packaging beautiful, economical and practical. The film can be widely used for wrapping of palletized goods. It's good substitute for hot shrink packaging film in transportation.

## LAMINATION MACHINE

The coating machine can combine open foam sheet and PP braiding cloth, aluminum film, XPE foam sheet, sponge, kraft paper, OPP film, non-woven fabric and other two or three materials together. Products can be used for packaging composites, advanced laminated products, tablecloths, composite products for construction and other functions. There is an embossing function. The laminated product is flat and clearly grained, which is a very practical composite equipment. The plastic granules are put into the main machine hopper, heated and melted, extruded from the T-shaped die, and evenly coated on the plastic sheet (EPE foam sheet, PP braiding cloth, EVA foam sheet, XPE sheet, OPP film, non-woven laminated material bag, etc.), and then laminated and cooled. Not only has the protective function, the heat sealing strength is good, but also the performance of other composite barrier materials.

FUSHENG COMPRESSOR INDONESIA

A3-3217

Industry applications FS-Curtis has earned the reputation for building the most rugged industrial-duty compressor you can buy. Our professional engineering staff and factory-trained distributor network are committed to supplying you with a complete offering of the very best in compressed air equipment, large industrial i.e. manufacturing, cement terminals, power generation, mining, aviation testing labs, textiles, and other industry.

## NXD-37 & CB-30

NX-Series Rotary Screw Air Compressors and NXHE-Series Two-Stage Rotary Screw Air Compressors from FS-Curtis are valued worldwide for their legendary reliability. Housed in a space-saving design and built for continuous, quiet operation, the NX-Series delivers steady airflow with stable air pressure. The result is outstanding air quality with minimal oil carryover, giving you the performance you need to be backed by the durability you want.

## EX-SERIES, ER-SERIES, ES-SERIES AND ECO TURBO OIL-FREE COMPRESSORS

FS-Curtis Oil-Free Screw Compressor EX-Series, ER-Series Oil-Free Water Injected Screw Compressor, ES-Series Oil-Free Scroll Compressor, and ECO Turbo Two-Stage Oil-Free Centrifugal Compressor.

## CB-SERIES

Oil Injected Booster Compressor up to 40 Bar Application with capacity from 2,10 ~ 6,68 CMM with power 7,5 kW up to 30 Kw

GABLER THERMOFORM GMBH & CO. KG

D1-8318

Welcome to GABLER Thermoform. First-class thermoforming machines, additional components and accessories for the production of plastic packaging for the foodstuff industry. That is what GABLER Thermoform stands for.

We are a globally leader producer of thermoforming machines for the production of plastic packaging in the thermoforming process. As a specialist in thermoforming technology, we develop and produce thermoforming machines, whose quality, performance and reliability set top standards.

## M-LINE

M-LINE: Tilting technology in perfection. High productivity, innovative drive technology and maximum stability: With their unique tilting technology and a stable forming station made of cast steel, the high-end machines of our M-LINE are ideal for large-scale production of both simple and complex articles. Combined forming and cutting in just one step and an innovative stacking system with patented product handling make the M-LINE particularly flexible and powerful.

## FLEX-LINE

FCS technology redefined. With its multi-station concept, the FLEX-LINE offers unprecedented flexibility in the production of a wide variety of food packaging. As the first FCS machine from GABLER, our novelty among the thermoformers can score with several highlights. With an innovative drive concept including linear guides, its multi-station principle, extremely high clamping forces and the highest cycle rates on the market, the FLEX-LINE sets new standards in the field of thermoforming machines.

## SWING

Compact all-round talent. Space-saving, flexible and adaptable: The SWING is the perfect all-rounder for the production of cups, trays or lids. The machine not only scores with its small footprint, it can also be converted for the production of a wide variety of products in a very short time. But that's not all: low energy consumption coupled with a high output rate allow cost-efficient production even for small quantities.

# EXHIBITING COMPANIES

GARUDA INTI MAKMUR ABADI, PT

A3-3102

PT. GARUDA INTI MAKMUR ABADI, an authorized distributor for TEDERIC Injection Molding Machine, and exclusive agency specialized in plastic machinery and auxiliary equipment. Our company provide not only machinery distribution, but also as one stop solution for our valued customers. Our services include consulting, advisory, design, cost control, procurement, after sales, and technical support.

## INJECTION TEDERIC NEO SERIES 160T

Spesifikasi :

Clamping Unit : NEO.T160/i600  
Clamping Force : 1600 kN  
Clamping Stroke : 450 mm  
Max. Mold Height : 530 mm  
Screw Diameter : 45 mm  
Shot Size : 358 cm<sup>3</sup>  
Inject Pressure : 194.7 MPa  
Pump Power : 20 kW  
Hopper Capacity : 50 Kg  
Machine Dimension : 4.98 x 1.37 x 2.11 m  
Weight : 5.4 Ton

## FULL AUTOMATIC EXTRUSION BLOW MOLDING MACHINE

Spesifikasi :

Model : KSC70-5LII  
Material : PE, PP  
Clamping Force : 68 KN  
Platen Distance : 165-525  
Max. Mould Size : 360 x 400  
Screw Diameter : 70 mm  
Screw Motor Power : 22 KW  
Power Of Die Heating : 5.7 KW  
Center distance of double die : 150-180 mm  
Total Power : 42.4 KW  
Hydraulic Pump : 7.5 KW  
Air Pressure : 0.6 MPa  
Air Consumption : 0.6 m<sup>3</sup>/min  
Water Consumption : 60 L/min  
Weight : 5.5 Ton

## PLASTIC CRUSHER

GINAR TECHNOLOGY CO.,LTD

A1-1231

Ginar Technology Co., Ltd. was established in Taiwan in 1982. With more than 40 years of dedication, the company has become Taiwan's first engineering plastic manufacturer listed in the OTC market No. 6151.

Ginar is devoted to research and development, production of engineering plastic and composite materials including polyamide (PA), polypropylene (PP), polycarbonate (PC) as well as color mating technology to provide all domestic and foreign industries with high value-added requirements.

## ENGINEERING PLASTIC

composite materials including polyamide (PA), polypropylene (PP), polycarbonate (PC)

GLOBAL MEGA INDONESIA PT

A3-3416

PT. Global Mega Indonesia established in 2006, with those main Figures, who serves 25+ in the Plastic Joining & Cleaning Industries. PTGMI are a team of Sales Consultants, Application Engineers, Technicians & After Sales equipped with Laboratories & Workshop to support us delivering your needs.

## BRANSON ULTRASONIC

Manufacturers turn to BRANSON for solutions to challenging plastic joining, metal welding and cleaning applications. In plant floors, work cells and cleanrooms worldwide our solutions rapidly join plastics and metals into automotive parts, medical devices, electronic components & other essential products. Backed by innovation and worldwide support, Branson technologies include ultrasonic welding for plastic and metal, as well as laser, vibration, infrared & spin welding and staking for plastic.

## COLD JET DRY ICE

The global leader in dry ice technology. Providing the most technologically advanced dry ice cleaning, surface preparation, parts finishing and dry ice manufacturing systems. To fulfill our mission to provide value and protect the environment, our equipment utilizes or produces media that is inert, non-conductive, non-corrosive and does not produce hazardous waste streams.

## AMBRELL INDUCTION

Ambrell Corporation, an inTEST Company, is a global leader in the induction heating market. At Ambrell, we take great pride in providing the best customer experience in the industry. It's what sets us apart. This philosophy is our brand difference and has been the key to our success, taking us from a small start up more than 30 years ago to a global leader in today's marketplace.

## GOLDEN JASON MACHINERY INDUSTRY CO., LTD.

A1-1210

GOLDEN JASON offers plastic woven bag making equipment. And specialized in flexo. printing machine, cutting sewing machine and etc.

Because of many kinds of packaging bags required by consumers, we continuously on improving and upgrading machine designs to make many kinds of bag. The customized design is also available. We also keep maintaining quality and offering the soonest service.

We always stand with you forever.

### FULLY AUTOMATIC WOVEN BAG CONVERSION LINE

- Machine Equipped with Two Servo Motors
- 90-degree Transfer of Bag by Rotary Movement Type Claw of Patented Design.
- Three Sets of Claw (Gripper) Instead of Usual One Set In Other Machines: Faster And Maintenance Free Operation.
- Machine Equipped with Four Inverters
- All Operations Of The Machine Are Fully Synchronized Through Micro- Processor Control System.
- Double Line Pressure Belt Conveyor to Ensure Straight Folding And Stitching Of The Bottom Side Of Bag.
- Easy Operating Through Human Machine Interface (HMI) Touch Screen.

### FLEXOGRAPHIC PRINTING MACHINE

- 4-12 Colors stack type for both sides printing, such as 0+8, 1+7, 2+6, 3+5, 4+4 based on 8 color printing machine.
- New drying system, hot air can be recycled to overhead oven for saving electric heating power.
- New design on printing roller backward system when machine stopping, which can avoid printing roller shocking and reduce the wear and tear of printing plate.
- New tension system, which in-feed and out-feed is synchronization control to ensure perfect fabric rewinding.

### AUTOMATIC WOVEN BAG & LINER INSERTING CONVERSION LINE

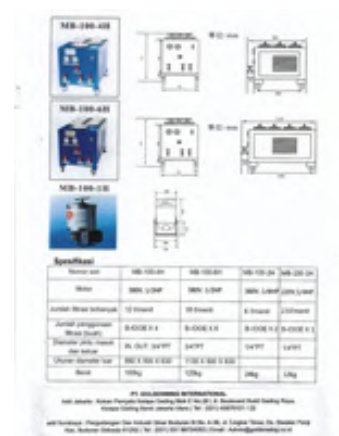

Liner Inserting Attachment (for combined the used cutting sewing machine or the complete set cutting liner inserting sewing machine)

## GOLDEN WING INTERNATIONAL, PT

D1-8604

PT. Golden Wing International established since Oct 1997, located in Jakarta-Indonesia. We have sold many plastic injection machines, one of which is FCS (Fu Chun Shin) One of the well-known leading Taiwanese Injection Molding Machine with more than 30 years experience. PT. Golden Wing International also provides whole range of auxiliary and peripheral equipments of Injection molding machine, Automation set up, Mold monitor set up, Heat transfer machine, Oil Cleaner and filter

### OIL CLEANER MACHINE

Mesin penyaring minyak oli, agar minyak dapat tetap digunakan pada mesin sampai 5-10 kali. Namun kualitas minyaknya tetap terjaga

### MOLD MONITOR

MOLD MONITOR it can work on horizontal and vertical injection moulding machine and die casting machine. To keep an eye on your mold to protect your mold

### PT. GRAND EVEREST INTERNATIONAL

PT. Grand Everest International is a factory of post-consumer plastic processor. We are specialized in producing 100% Recycled Content Post-consumer PE/PP resins, and PET hot-washed flakes. There are over 10 types of recycled resins you can choose from our factory. Our products are famous in Indonesia, China, and USA, etc. We will take more efforts to take part in the international recycling chain, and to play an important role in the recycling industry.

**LDPE PELLET-100% RECYCLED CONTENT POST-CONSUMER LDPE PELLET**

it is granulated from recovered LDPE FILM

**PP PELLET-100% RECYCLED CONTENT POST-CONSUMER PP PELLET**

it is granulated from recovered bulk bags

**PET CLEAR FLAKE - 100% RECYCLED CONTENT POST-CONSUMER PET CLEAR FLAKES**

it is grinded from recovered PET bottles

## GUANGDONG HESHENG MACHINERY INDUSTRIAL CO.LTD.

D2-9516

和胜机械  
HE SHENG

Guangdong Hesheng Machinery Industrial Co., Ltd. is located in Longxing Industrial Zone, Chaoshan Road, Shantou, China and is specialized in all kinds of bag making machine. We have 3 side seal pouch, center seal pouch, standup zipper pouch and flat bottom pouch machine. The machine features high speed, stable and easy operation. With the high quality and good after-sales service, our machine sells very well in the vast domestic and world flexible packaging market. Welcome to visit our factory.

### ZIPPER STANDING POUCH MAKING MACHINE

This machine enjoys reputation of multiple function which can produce 3 side seal, zipper, standing and 4 side seal. It features flat, strong bond of side sealing.

### HIGH SPEED 3 SIDE SEAL POUCH MAKING MACHINE

This machine can produce 3 side seal pouch at a speed reaching 300 cuts/min. It is also equipped with double cut and materials storage device which no need to stop the machine to change roll.

## GUANGDONG LIANSU MACHINERY MANUFACTURING CO., LTD

D2-8815

Established in 1994, Liansu is a high-tech enterprise engaged in the R&D, production, sales and service of plastic extrusion equipment and material automation handling system and auxiliary equipment. Mconvey, a brand of Liansu Machinery, is a solution provider of plastic automated material handling system and a manufacturer of auxiliary equipment.

### PLASTIC AUTOMATED MATERIAL HANDLING SYSTEM

Mconvey provides customized automated handling solution, including products of debagging, storage, drying, weighing, material compound mixing, material conveying system and system control. The products are widely used in plastics, rigid packaging, film, medical, electric appliance, automotive, compound and other industries.

### PLASTIC EXTRUSION LINE

We provide overall green and energy-efficient production of plastic extrusion processing equipment, equipment automation research, and development, and data acquisition and analysis of plastic processing.

D2-9531

Guangdong Yujiaxing Technology is a high-enterprise, which engages in R&D, design, manufacture, marketing and service of plastic machinery. The company specialize in manufacturing plastic machines, the main products are Plastic Sheet Extruder, Thermoforming Machine, Biodegradable Material Production Line, Online Crusher, Robot. Production including PET, PP, PS, PE, EVOH, PC, PLA, Biodegradable Starch.

**PLASTIC PP/PS/PET/PLA SHEET EXTRUDER**  
High Efficiency, Energy Saving And High Degree Of Automation.

**MULTI STATION THERMOFORMING MACHINE**  
High Efficiency, Energy Saving And High Degree Of Automation.

**PLASTIC SERVO CUP THERMOFORMING MACHINE**  
High Efficiency, Energy Saving And High Degree Of Automation.

## GUARNIFLON

D2-9309

Established in 1992, Guarniflon is the European leading Company processing fluoropolymer products such as PTFE, ETFE, FEP and others, for applications such as chemical, oil&gas, hydraulic, sanitary equipment, ball valves, infrastructures, aerospace, automotive, etc. for a total output of 6.000 tons/year. Main production PTFE semifinished products such as: sheets from 0,05 mm. to 100 mm., tapes from 0,025 to 3 mm., extruded tubes and rods (up to 1815 mm. OD), bearing tapes for hydraulics.

**PTFE SEMIFINISHED AND MACHINED PRODUCTS**  
PTFE products in virgin and compounded PTFE grades processed for heavy industrial applications. Semifinished products and machined parts made according to customers' drawings.

**RELEASE FILMS FOR COMPOSITE MATERIALS**  
ETFE and FEP release films used for the production of composite/carbon fiber products mainly for aerospace applications. Mainly supplied red FEP film and blue ETFE film.

## HANATA INDONESIA PERSADA PT

A3-3412

PT.HANATA INDONESIA PERSADA MEMPRODUKSI KERANJANG INDUSTRI PLASTIC untuk memenuhi kebutuhan industri sebagai tempat tampung di berbagai bidang industri

**HANATA 3101**  
kontainer roda rapat

**HANATA 2104**  
kontainer Rapat tanpa roda

**KONTAINER RAPAT TANPA M89**  
aksesoris box untuk tampung spare part kecil seperti baut dll

Color & Polymer Sorter, from bottles sorting to flakes sorting.

**CI-COLOR & POLYMER SORTER**  
flakes sorting: Colors sorting, and Polymer sorting, such as PET/Non-PET, PP/PE separation

**KC-BOTTLES SORTER**  
Color & Polymer Bottles Sorter

HITACHI HIGH TECH INDONESIA PT

D2-9301

**PT. Hitachi High Tech Indonesia**

PT Hitachi High Tech Indonesia is a leading technology specialist company developing business globally in four key areas: Electronic Device Systems, Life Sciences, Information Systems & Electronic Components, Advanced Industrial Products, Material Informatics, AMICS, and MAZIN.

We are devoted to developing new products and businesses around the world by leveraging cutting-edge technologies that are unique in the business segment.

## **SIMULTANEOUS THERMOGRAVIMETRIC ANALYZER NEXTA STA SERIES.**

The newly incorporated balance control technology ensures the microgram-level baseline stability and reproducibility on top of our highly acclaimed horizontal digital dual beam balance system. The NEXTA STA series has following features;

High temperature control technology that handles a variety of temperature programs

Available DSC measurement, it makes specific heat capacity measurements available

The sample observation and measurement, Hitachi's pioneering key feature Includes the newly designed flow channels for high-level gas exchange

In addition to conventional applications, the NEXTA STA series shows its strength in analyses such as quantitative determination of the constituents of advanced materials, composite materials, and trace amounts of moisture.

## **MAZIN**

MAZIN Corporation leads a transformative revolution in the plastic moulding industry, integrating advanced AI capabilities, IoT sensors, and cutting-edge technology. Our AI-infused injection moulding solutions, enhanced by IoT sensors, provide real-time data insights and automated quality control, surpassing traditional manual methods. Our AI system adapts moulding conditions in real time, ensuring consistently high-quality products. We streamline operations, expedite product launches, and democratize expertise, reshaping the industry with precision, efficiency, and exceptional quality.

HONG ZU MOULD ENTERPRISE CO., LTD.

A1-1305

Hong Zu is a pioneering thermoforming mould designer and manufacturer in Asia, who supplies comprehensive line for a wide range of plastic packing products for food, fruit, bakery, and take-out container.

In the years ahead, Hong Zu Mould will be developing much more superior moulds for both internal and external utilization of your production lines and will bring you enormous beneficial business opportunities and profits! We are forming Your Life, and help you to pack Your Future.

## **THERMOFORMING MOLD FOR FOOD PACKAGING**

## HOSOKAWA ALPINE AG

D1-8317

**HOSOKAWA  
ALPINE**

HOSOKAWA ALPINE Aktiengesellschaft is one of the world's leaders in blown film technology. The 125-yearold German brand has made a name for itself with cutting-edge technology and the highest 'Made in Germany' quality standards. HOSOKAWA ALPINE ranks high among the international suppliers of blown film lines and includes blown film co-extrusion lines with up to 11 layers, Mono film Orientation lines (MDO) and patented systems such as the TRIO for increased profitability, in its product portfolio

### 7 / 9 LAYER LINES

Produce High-Barrier Films on HOSOKAWA ALPINE machines! Multi-layer flexible packaging films are in demand around the globe and require speciality barrier extrusion lines. These products prevent the permeation of oxygen, nitrogen, carbon dioxide and water vapor. They also protect the aromas and flavors of the finished product. Produce on 7-, 9- or 11- layer lines – the more layers the more options for you to engineer and tailor your film products, while saving raw material costs.

### MACHINE DIRECTION ORIENTATION MDO

Whether you want to produce full PE laminates, diaper bag sheets, laminating film or twist film this is the perfect solution. Less trim waste and improved film flatness for the MDO inline orientation process. The patented TRIO system optimizes the film thickness profile in-line. The result: minimum thickness variation across the entire layflat width also edge trim is reduced by up to 50%, while the film flatness is greatly improved for converting.

## HUARONG PLASTIC MACHINERY CO LTD

A1-1226

Huarong, based in Taiwan, with 40+ years experience of horizontal and vertical injection molding machines, has full range of plastic injection molding machines range from 60 up to 4000Ton, either for household items, precise items in 3C or auto car industry, PVC/PPR fittings, beverage of PET preform or cap, food or industrial packing machines, or automation & turnkey solution. With well-known technician design team & service back-up group, Huarong has earned our good name in the plastic industry.

### PLASTIC INJECTION MOLDING MACHINE

Plastic Injection Molding Machine, PET preform making machine, IML solution, Auto Car Manufacturing Machines, Robot, Vertical Insert Molding Machines

### MOLDS

All turnkey solution

### PET TABLEWARE

PET tableware

## HUAYUAN MAKmur SEJAHTERA, PT

D1-8401

Haitian Plastics Machinery Ltd., is a world market leader in the manufacture of injection-molding machines. Our steady focus is on innovative customer solutions for standard applications and the greatest production efficiency on both sides. We do this by constantly searching for improvements in our own production processes, and using energy-saving and simple technologies that focus on what really matters to our customers: low item costs, high efficiency, and long-term performance data.

### HA3800/2250COLUM

HA-columba machine follows the classic design platform of Haitian's trusted design, on the basis of inheriting the traditional advantages, The use of Haitians' efficient plasticizing assembly to cope with the raw material characteristics of the industry and equipped with a specially made high wear-resistant screw and barrel and easy to replace nozzle. Wide range of machines to meet various fruit crate mold sizes.

### MA3200/780H PRO

Haitian MA/H PRO Series is designed for fast cycle applications in the production of thin-walled containers. Engineered to achieve the dual benefits of high efficiency and low cost to bring customers more profits in their pursuit of precision, high-speed and repeatability. The high-speed MA/H PRO series is widely used in various fields of packaging products, such as beverage cups, yogurt cups, ice cream boxes, lunch boxes, bowls, crisper, cutlery, bottle caps, mobile phone battery covers, medical packaging, etc. The excellent performance and versatility of the MA/H PRO has proven itself across a wide range of packaging products and applications.

## HWA CHIN MACHINERY FACTORY CO., LTD.

A3-3018

Hwa-Chin Machinery Factory Co., Ltd. Was founded since 1970, with forward-looking technology and spirit of innovation, has already won the international certification and becoming Taiwan's plastic injection molding machine industry leader. Hwa-Chin manufactures series of plastic injection machine products, consistently uphold the spirit of originality – precise, accurate, sturdy, plain, and pluralistic original technology, already won customers' trust and have a vast market.

### INJECTION MOLDING MACHINE

- ALL ELECTRIC SERVO SYSTEM
- RIGID LINEAR GUIDE RAIL
- OUTSTANDING AND STABLE INJECTION UNIT

# EXHIBITING COMPANIES

ILLIG MASCHINENBAU

D1-8322

ILLIG is a leading global supplier of thermoforming and packaging systems as well as tool systems for cardboard, paper and plastics. The company's product and services portfolio includes the development, design, manufacture, installation and commissioning of complex production lines and components.

## RDF 85

The ILLIG RDF 85 automatic pressure forming machine with variable mold interface has a forming area of 800 mm x 600 mm and operates with a maximum forming pressure of 6 bar. Drawing depths of up to 120 mm at a maximum of 30 cycles per minute can be realized with the RDF 85. The RedLine segment complements the well-known ILLIG BlueLine thermoforming systems. ILLIG offers the usual quality and safety standards for both product segments.

## RDM 73K

The automatic pressure-forming machine IC-RDM 73K with a forming area of 740 mm x 340 mm processes material film from the roll or inline directly from a connected extruder using combined in-place forming and pass-through punching tools. The ILLIG thermoforming machine is ideal in particular for products with a high draw ratio. The cam-controlled toggle lever system of the forming machine enables high forming and punching forces. The forming table of the K-machines tilts 80° in feed direction after the forming sequence. Ejectors then discharge the cups into the stacking station.

INDO SUKSES SEJAHTERA

A1-160

PT. INDO SUKSES SEJAHTERA merupakan produsen sistem pendingin pabrik di Indonesia. Pionir sistem pendingin ruang terbuka yang sangat hemat energi dengan menggunakan teknologi pendingin evaporative.

## EVALINE

EVALINE hadir dengan konsep inovatif dengan mendinginkan udara dalam ruang pabrik dengan proses evaporasi air sehingga menghemat energi serta biaya. EVALINE memberikan kinerja yang tahan lama yang dipadukan dengan pengoperasian yang mudah.

INTERNATIONAL MOLDING, PT

D2-8827

Our company specializes in packaging solutions for homecare and beauty products. We provide innovative and attractive packaging designs that enhance the appeal of our clients' products. With a focus on quality and sustainability, we help our customers create a lasting impression and stand out in the competitive market.

## PACKAGING FOR HOMECARE AND BEAUTY PRODUCT

Our packaging for homecare and beauty products containing or bottle and cap, are designed to be both visually appealing and functional. Our goal is to ensure that our clients' products are presented in an attractive and professional manner, while also providing practical features such as easy-open seals and secure closures. We understand the importance of packaging in catching consumers' attention and enhancing brand image, and we strive to deliver packaging solutions that meet and exceed our clients' expectations.

# EXHIBITING COMPANIES

## INTERNATIONAL STANDARD MACHINERY (SHANTOU) CO.,LTD

D2-9515

International machinery standard company is one of the high-end manufacturers in researching and developing Flexible packaging equipment in China. we developed according to the combined experience from Japan and Europe, based on the imported precision machining equipment and high technology researching and developing engineers. It adopts products from top ranking industry control company to make such a excellent high speed electronic Line shaft rotogravure printing machine and dry laminator.

**ELECTRONIC LINE SHAFT ROTOGRAVURE PRINTING MACHINE**  
printing speed : 300-450M/MIN;Disc type  
Unwinder&Rewinder

**HIGH SPEED DRY LAMINATOR**  
laminating speed :250-300M/MIN;Disc Type  
Unwinder&Rewinder

## JCTIMES(TAIZHOU)IMPORT&EXPORT CO LTD.

D2-9415

JCTIMES GROUP is dedicated to high-polymer materials, precision manufacturing, and high-quality development through independent innovation of core technologies. We provide tailored system solutions and high-quality brand services for applications in fields such as new energy, photovoltaic industry, aerospace, intelligent transportation, energy-saving buildings, and healthcare. We manufacture sheet die, cast film die, hollow die, blown film die, screen changer, feedblock, gear pump, etc.

**EXTRUSION DIE**  
JCTIMES Group has sufficient experience in manufacturing extrusion die with exclusive flow channel design, product widely used in producing industrial building, food packaging, new energy fields

## JET ENGINE AUTOMATION CO., LTD

A1-1215

Jet Engine Automation Co., Ltd. is based in Taiwan and dedicates to auto equipment design & development. The company is skilled at design and production of specific machines. Our products: IML robot system and PET preform outside cooling robot system, Cutlery Packing Robot System, Palletizer. Partner: Jon Wai Machinery Works is one of the leading injection molding machine manufacturer from Taiwan. With more than 50 years of experience in the field.

**IML ROBOT**  
Benefits of IML  
1. Merging the label to a part, non wrinkle, and non ink peel-off.  
2. Short cycle times.  
3. IML offers the most hygienic decoration process.  
4. One-time processing for power-saving, material-saving, timing-saving.  
5. Adapted to almost all shape of containers.

**CUTLERY PACKING AUTOMATION**  
Function:  
1. Take out products from the mold  
2. Accumulation of parts in stack.  
3. Adjustable numbers of parts on the stack.  
4. Packaging with wrapping paper

**INJECTION MOLDING MACHINE**  
Injection by accumulator with high injection speed. Suitable for thin wall food packaging, closure and cutlery production.  
High speed, high output, low running cost  
Low Rejection Rate of Production  
Tonnage sensor and over-tonnage protection  
Cutlery, Closure, Microwave Container, In-Mold-Labeling Container, Disposable Light Weight Crate, Ultra Thin Flower Pot

## JIANGSU GLORY CHEMICAL CO.,LTD.

D2-956

Jiangsu Glory Chemical Co., Ltd. specializes in production and sales of optical brighteners, dye intermediates, antioxidants, light stabilizers, UV absorbers, photoinitiators, pigments etc. For 20 years, we always adhere quality policy of "Continuous Innovation, Outstanding Quality, First-class Service, Customer satisfaction".

### OPTICAL BRIGHTENING AGENT OB

Light green powder, apply in all plastics (without heat-resistant plastic), solvent-base coat, inks

### OPTICAL BRIGHTENING AGENT OB-1

Kelly powder, it is widely used in polyester, nylon fiber and various plastics whitening.

### OPTICAL BRIGHTENING AGENT FP-127

Light green powder, it is especially suitable for whitening of PVC and polystyrene series products, and can also be used for whitening and brightening of other thermoplastics and coatings, printing ink, synthetic fiber.

## JIANGSU NEWDO MACHINE CO.,LTD.

A3-3131

Jiangsu NEWDO Machine CO., Ltd. dedicated to the development and production of cup printer, that is dry-offset printing machine for decoration of plastic container, such as yogurt cups, milk tea cups, coffee cups, ice cream cups, drink cups, food barrels, oil drums, flower pots and so on. After fully absorbed the international advanced technology and assembly processes, NEWDO MACHINE has carried out fruitful improvement and innovation based on the years' experience in the industry, and NEWDO MACHINE has sever

### DRY OFFSET PRINTING MACHINE

NEWDO Machine is contributed to yogurt cups, milk tea cups, coffee cups, ice cream cups, drink cups, food barrels, oil drums, flower pots and so on; NEWDO machine absorbed the international advanced technology and assembly processes.

The character of machine is:

High speed - High satbility - Photo-level printing

### LID PRINTER MODEL LM608T

Dry-offset printing line for decoration of round, square, rectangular and oval plastic lids. The machine model LM608T decorates the lids in up to 8 colours at a maximum speed of 600 lids per minute with colourhead water cooling.

# EXHIBITING COMPANIES

JIANGYIN CITY DEBAO NEW MATERIAL TECHNOLOGY CO., LTD

D2-9427

Debao Masterbatch, a leading white masterbatch manufacturer based in China. Debao produces white masterbatches from 20% to 75% TiO2 grade for blown film, injection molding, nonwoven fabric etc. Debao has been exporting to EU, ASIA, MIDDLE EAST, SOUTH AMERICA ETC. Products are complied with FDA, REACH AND EU food contact regulations.

## WHITE MASTERBATCH

Debao white masterbatch is made of virgin resin and high quality Rutile Titanium dioxide(TiO2).

## WHITE MASTERBATCH 9007

9007 white masterbatch is made of virgin resin and high quality chloride Titanium dioxide(TiO2).

JIANGYIN CUTECH MACHINERY AND EQUIPMENT CO., LTD.

D2-9116

with more than 20 years experience, Jiangyin Cutech machinery & equipment co., Ltd. was founded in 2018. since its establishment, the company has been committed to the R&D and manufacturing slitting machine, inspection rewind machine. Cutech machinery is mainly oriented to functional film industry, flexible package industry and customized machines. Cutech machinery has won great trust and support from customers both from China and overseas like Malaysia, Vietnam, Indonesia etc.

## CF2-1300 HIGH SPEED SLITTING MACHINE

Machine speed: 500m/min  
unwind dia: 800mm  
rewind diameter: 600mm

## CRF-1300 HIGH SPEED SLITTING MACHINE

machine speed: 450m/min  
Unwind dia: 800mm  
rewind roll: 600mm

## CJ8-1300 HIGH SPEED INSPECTION REWIND MACHINE

machine speed: 450m/min  
Unwind dia: 800mm  
Rewind dia: 800mm

JIANGYIN HUAFENG PRINTING AND MACHINE CO., LTD

D2-9116

Huafeng printing machinery is a specialized manufacturer of rotogravure printing machine and dry/solventless lamination machine. Our company located in Jiangsu Province which about 100km from Shanghai. Right now we have high speed ELS rotogravure printing machine like 400m/min, 350m/min. Also economic middle speed ELS machine like 300m/min. Welcome to visit our booth D2-9116 have more information.

## EL5 ROTOGRAVURE PRINTING MACHINE

Huafeng 25 years machine production experience. Kesai 20 years system manufacturing experience. Combined a good machine 400m/min machine speed, servo motor direct drive

## DRY LAMINATION MACHINE

heavy duty package use, dry lamination machine with auto splicing function, 250m/min running speed

## SOLVENTLESS LAMINATION MACHINE

flexible package use, 400m/min speed, standard 1300mm width, suitable for most of package use

# EXHIBITING COMPANIES

## JIANGYIN JIAD MACHINERY CO.,LTD

A3-3229

30 years leading professional manufacturer of bag-on-roll equipment in China

### AUTOMATIC INTERLEAF DRAW TAPE BAG-ON-ROLL MAKING MACHINE

This equipment is used for producing interleaf draw tape bag on roll, this kind of bag can be packed as extractive packing.

### AUTOMATIC FOUR FOLD S-TYPE BAG-ON-ROLL MAKING MACHINE(SWAY TYPE)

This machine is mainly used for producing four fold bag on roll, four fold S-type bag on roll, film feeding mode adopts sway designed, special for long length of the bag on roll, automatic rewinding, neat rewinding.

### AUTOMATIC DRAW TAPE BAG MAKING MACHINE WITH FOLDING PIECE BY PIECE

This machine is used for draw tape bags, adopting double servo motor feeding, easy to use. Automatically stop when running out of film, the whole machine running stable.

## JIEYANG DEKE MACHINERY CO.,LTD

A3-3330

JIEYANG DEKE MACHINERY Main machine products:  
1.PET EXTRUDER included single/twin screw design  
2.PP/HIPS EXTRUDER included single and multi layer mc design.

### PLASTIC E XTRUDER

High line speed / higher output PET/PP/HIPS Extruder

## JIN CHANG PLASTIC MACHINERY CO.,LTD

A1-1216

塑膠手套製袋機  
全自動化塑膠手套生產

## JING DAY MACHINERY INDUSTRIAL CO., LTD.

D1-8016

Jing Day Machinery Industrial Co., Ltd. is a various silicone and rubber molding machine manufacturer and supplier, and related solutions for our global clients. We are committed to design, fabrication (manufacturing), marketing, and all services related to rubber and silicone molding machine, our most popular models being the auto-production of rubber molding machines. Our most specialty expertise is in vertical injection molding machines and hydraulic molding machines.

### RUBBER INJECTION MOLDING MACHINE - INDIRECT CLAMPING

- Machine for natural, synthetic, oil resistant, heat resistant and reclaimed rubber.
- Low bed structure with lower working platen high.
- PLC and HMI functional control as standard specification.

### RUBBER INJECTION MOLDING MACHINE - DIRECT CLAMPING

- Ideal for the production of natural & synthetic rubber, oil & heat resistant rubber, and reclaimed rubber.
- High bed structure.
- PLC equipped with standard PLC controller.Extruder

### RUBBER INJECTION MOLDING MACHINE (HORIZONTAL)

- Ideal for the production of natural & synthetic rubber, oil & heat resistant rubber, and reclaimed rubber.
- All other JD-RH series machines allow the optional micro-computer controller.

# EXHIBITING COMPANIES

JINMING MACHINERY (GUANGDONG) CO., LTD.

D1-8418

**JM JINMING**

Jinming Machinery, established in 1987, is recognized as the global leader in supplying plastic film extrusion equipment. Jinming is one of the few famous brands able to provide advanced solutions of Blown Film Lines, Cast Film Lines and Stretch Film Lines. By the end of 2022, we have supported customers from over 50 countries with thousands of proven machine line services.

## BLOWN FILM MACHINE

According to 'Smooth Extruding' principle, based on Negative Compression Ratio technology, JM launches a grooved barrel extruder feeding system. This system works closely with the spiral mandrel die head, featured with short channels, low body, pre-distribution function, and completely symmetric distribution structure, which contribute to excellent extruding performances.

JOTAM, PT

D2-9310

**JOTAM**  
Industrial Supplier

PT Jotam is an industrial supplier specialist in loss in weight feeder, liquid feeder, pellet transferring, auto-loader, metal detector, pharma treatment corona treatment, vacuum bag lifter, pellet (discolor) screening, pellet (black spot) screening, vacuum conveying application, high efficiency separator. PT Jotam has been trusted to supply all product and do the technical service.

## LOSS-IN-WEIGHT FEEDER

solutions for constant weighing feed systems for bulk materials and additives.

## VACUUM LIFTER

Speed up manual handling of goods with vacuum. Lift up to 270 kg without physical effort.

## METAL DETECTOR

Detect metal contaminants accidentally present in industrial products with levels of sensitivity.

JT MOLD TECHNOLOGY CO., LTD

D2-9507

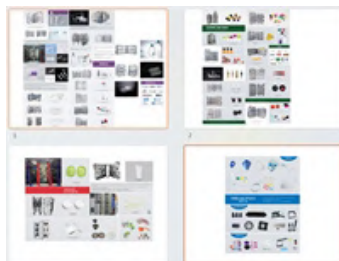

**JT Mold**

JT is top3 plastic injection mold maker based in Suzhou, China., specializing in multi-cavity injection molds for Medical, Closure and pumps, and Food Packaging industries.

On average, we manufacture 400-500 sets of mold annually and more than 50% are exported to our international customers.

JT Mold made a significant investment of more than 5 million USD in machinery, which boosts 35% increase in the plant capacity.

Official website: <http://www.jtmold.net/>

## PLASTIC INJECTION MOLD

JT produces molds for medical, pump and closure, thin wall, and silicon products.

JURRY PLASTICS MACHINERY

A3-3426

**JURRY**

JURRY is the supplier for the biggest PVC pipe complete extrusion lines (up to 2000mm pipe diameter), biggest HDPE pressure pipe complete extrusion lines (up to 1600mm pipe diameter) and biggest HDPE pre-insulated pipe complete extrusion lines (up to 2600mm pipe diameter) in China.

For two generations, we bear the same goal: to be the most reliable partner for our customers. Serve you, fulfill us.

## EXTRUSION MACHINE

As a leader in conical twin screw extrusion technology with decades of experience, JURRY conical extruders have various sizes ranging from screw diameter of 51/105 to screw diameter of 110/220. We customize our machine and tailor the line to best satisfy your requirements. Conical extruders are widely used in middle-to-high-calcium carbonate production.

## PLASTIC PIPE CUTTER

Based on different pipe kinds, diameter, thickness, formula and etc., to maximize the cutting efficiency and cutting surface smoothness, JURRY offers flexible cutter solutions, such as fly cutter for PE and PPR pipe up to 75mm, non-dust cutter for PO pipe up to 2600mm, planetary cutter for PVC pipe up to 2000mm.

# EXHIBITING COMPANIES

KAI-LIEN ENTERPRISE CO., LTD.

A1-1228

Kailien Enterprise Co., Ltd established in 1969. We are professional plastic extruder manufacturer in Taiwan. Our single and twin screw extruder can produce pipe, pellet and profile. We engaged in the innovative plastic extruder of any kinds of molds for the plastic-steel machine and finished products, and it passes all the technical information to the buyers, too.

Our markets cover from Taiwan to China, Vietnam, Philippines, Ethiopia, India, Russia etc. dozens of countries and so on.

## TWIN SCREW PVC PIPE EXTRUDER

Products Type: soft, rigid PVC pipe, CPVC pipes.  
-Features:

- \*PVC pipe extruder is able to design to produce double pipe at one time, thereby significantly increasing the production.
- \*Screw material is made in JAPAN, SACM-1 alloy steel. It can be used for long time without being broken.
- \*With precise pipe tooling, it can control the pipe diameter within tiny tolerance.
- \*We also have bellling machine to make it connect to other PVC pipes and fittings.

## TWIN-SCREW PROFILE EXTRUDER

Products Type: It can produce any shape of profiles such PVC soft strips, IC Tube, curtain, Door board, Wall board, Wave board, Ceiling board, PVC foam board, Wire trunk, WPC products and other functional products.

## TWIN SCREW CPVC/PVC PELLETIZING EXTRUDER

- Longevity and Durability: Our Twin Screw PVC Pipe Extruder is built with high-quality materials and precision engineering, ensuring its longevity and durability.  
-Maximize Your Benefits: With our cutting edge technology, you can unleash the full potential of your projects, maximizing returns and efficiency.  
-Customized service: Tailor-made solutions for your machinery! Precision Engineering, from concept to completion, our attention to detail ensures your custom design is executed flawlessly

KAILO SUMBER KASIH, PT

D1-865

## KAILO/EIRO FUNCTIONAL & RECYCLED PACKAGING MATERIAL

1. World 1st RCS/GRS Certificate (Packaging Bag etc.)
2. Asia Biggest Recycled bag Supplier (NIKE, ADIDAS, PUMA, LG, Other)
3. Biggest in SE Asia Extrusion producer in terms of multi product lines
4. Biggest in SE Asia producing Packaging material for Electronics (Inclusive Foam bag)
5. Biggest in SE Asia producing Film for Electronics (Single and Multi-Layer film)
6. Full line of Certificate & compliance (ISO inclusive) for the shipment USA&EU

## POLYBAG

FUNCTIONAL & SUSTAINABILITY PACKAGING MATERIAL WITH RECYCLED, BIODEGRADABLE, OK BIO BASE, WVTR, ANTI FUNGI, ANTISTATIC AND CONDUCTIVE

## PE FOAM

SUSTAINABILITY PACKAGING MATERIAL WITH RECYCLED AND RECYCLABLE

## PE BOARD

SUSTAINABILITY PACKAGING MATERIAL WITH RECYCLED AND RECYCLABLE

KAIMING ENGINEERING INDONESIA, PT

D1-8717

PT. Kaiming Engineering Indonesia has started doing business in Indonesia since 2015, we are a branch of Guangdong Kaiming Engineering based in Guangdong China. we are responsible for sales and servicing in Indonesia. Many of our machines have been used by the manufacturing industry in Indonesia. The injection molding machines we provide range from 25-3688 tons, and there are several types, namely KX, KK, KDH, KS, KSS

## KM100-3688KK

KK Series high speed and high precision :  
1. energy saving, KK series are designed and based on the kaiming's mature servo motor control technology.  
2. durable, the core components such as mold, platen, tie bar and toggle are more reinforced and more durable than traditional.  
3. easy to maintain, all metal plates can be opened, which can greatly save maintenance time and facilitate daily inspection and maintenance.

## KM100-600KDK

Hydraulic-Electric Hybrid Machine

## KM220-1000KDH

KDH Series injection molding machine are aimed at the development of thin-walled product, increasing the injection speed, molding fast, and increasing the qualification rate of thin-walled product

# EXHIBITING COMPANIES

## KARUNIA ALAM MAKMUR PLASTIK, PT

A2-235

PT. Karunia Alam Makmur Plastik is specializing in the production of high-quality color masterbatch. With a commitment to innovation, we craft vibrant and consistent pigments that seamlessly blend into various materials, adding a new dimension to your creations. Our extensive palette of shades, coupled with cutting-edge dispersion technology, ensures your products resonate with enduring brilliance.

### COLOUR MASTERBATCH

Introducing our Color Masterbatch – where innovation and imagination collide to redefine your creations. Unlock the potential of every product with a burst of vibrant, lasting color that captures attention and tells a story. Our masterbatch seamlessly integrates into various materials, ensuring a harmonious distribution of color that elevates your design to a new level of visual appeal. Choose from an array of shades that resonate with your vision, and let your products become a canvas of creativity. With our Color Masterbatch, the possibilities are as endless as your imagination, and the results are nothing short of extraordinary.

### DESICCANT MASTERBATCH

Introducing our Desiccant Masterbatch – a moisture-fighting marvel that safeguards your products' quality. Seamlessly blending into materials, it prevents moisture damage, ensuring longevity and excellence. Bid farewell to concerns about mold or degradation. Elevate your brand's reliability and reputation by delivering products that withstand the test of time and environmental factors. Choose innovation that adds value beyond aesthetics – choose our Desiccant Masterbatch for a moisture-resistant future where quality endures.

## KARYA INDAH MESINDO PT

D1-8115

PT. Karya Indah Mesindo provide and design all customized screw and barrel for all types of plastic processing machinery. Each machine have its own unique parts where one and others are not necessary same. Our dedicated engineer will create the right solution in order to help customers to solve the problem, so they will increase their productivity to be highly, effectively and more efficient.

### SCREW AND BARREL

In order to meet customer's demand, we provide various designs such as Ordinary Type, Barrier Type, Distributary Type, Gradual Change Type, Splashing Type, Mixed Type, Undulated Type, Dowel Type, Accelerated Type, Exhausted Type, and separated Type.

### TWIN SCREW AND BARREL

In order to meet customer's demand, we provide various designs such as Wave Type, Barrier Type, Mutant Type, Gradual-Change Type, Shunt Type, Exhausted Type, and Separated Type, Mixed Type, Pin Type, Double Screw Type, and Multi Head Type.

### MOLDING

Beside Screws and Barrels, Our company also sells plastic molding machines (molding)

## KARYA TEKNIK SEMESTA PT

A2-230

PT KARYA TEKNIK SEMESTA is a privately held Indonesian owned and operated company incorporated in Jakarta in 2001. PT KARYA TEKNIK SEMESTA is an indigenous company established to offer engineering, fabrication, installation, inspection & maintenance services of the industrial AIR/GAS COMPRESSOR, BLOWER, VACUUM PUMP, PUMP, VALVE & INSTRUMENT CONTROL.

### AIR COMPRESSOR

We mainly provide screw air compressor and piston air compressor, and air compressors with the pressure range from 0.3MPa to 4.0MPa can be provided too. And, the power range of screw air compressor is 7.5kW-630kW. Driven by electric motor or diesel engine screw compressor, energy-saving screw compressor and two-stage compression screw compressor are supplied with good quality and cooperated prices.

### AIR DRYER

Air Dryer or air dryer is mainly used to remove water vapor from compressed air. Removing moisture is essential to avoid common problems such as corrosion, product damage and malfunction.

### PORTABLE AIR COMPRESSOR

Diesel portable screw air compressor is widely applied in the industries, such as, road, railway, mine, water conservancy, shipbuilding, urban construction, energy and war industry, etc.

# EXHIBITING COMPANIES

KASAKATA KIMIA, PT

A1-112

**KASAKATA**  
MASTERBATCH

PT Kasakata Kimia is an Indonesian company specialising in colour and additive masterbatch production based in Bogor, West Java. Our masterbatch is manufactured in the form of granules, powder, and cake and can be applied to all plastic materials with a variety of processes. KASAKATA collaborates closely with customers to deliver what they require for their processes, as well as innovative product developments in a variety of industries.

## KASALEN/KASATHYLEN

Inorganic and/or organic pigments, dispersed in following material carriers.

## KASAPLAST

Composition of Inorganic and/or organic pigments or dyes which dispersed in wax carrier based, for PVC or thermoplastic material comes in form of powder. Produced by extrusion, injection molding, rotary molding

## KASACAKE

Composition of Inorganic and/or organic pigments which dispersed in PVC carrier based, for PVC article. Produced by Calendering

KIEFEL GMBH

D1-8328

**KIEFEL**  
TECHNOLOGIES **B**

Kiefel is a technological partner when it comes to design and manufacturing of machines, tools and automation used for the thermoforming and joining of polymer-based, bio-based and fiber-based materials.

With its own Customer Innovation Centers, the company offers turnkey solutions for the production of drinking cups, yoghurt cups, coffee cups, trays, lids and a wide range of similar products made of PS, PP, PE, PET or PLA.

Kiefel's SPEEDFORMER KMD & KTR series will optimize your production!

## SPEEDFORMER KMD 78 SMART

The SPEEDFORMER KMD 78 Smart will boost your production and performance and reduce your production costs due to:

- Fast and easy tool change, quick heater production readiness
- Servo driven tables, 3rd motion servo plug drive, film transport, stacking pusher
- Easy operation and maintenance with the Kiefel HMI

## SPEEDFORMER KMD 78.2 PREMIUM

The KMD 78.2 Premium meets your production needs even better by enabling your customized configuration with proven up/down stacking, Pick&Place stacking as well as sophisticated tip stacking.

- Your Kiefel benefits:
- More performance and process control:
  - Higher machine availability: Fast & easy tool change
  - Improved production efficiency for repeatability & fast production readiness of heaters
  - Easier operation & maintenance: HMI with large touch screen & proven operation, fully automatic lubrication

## SPEEDFORMER KTR 5.2 SPEED

Benefit from the new generation KTR 5.2 Speed with increased production & maximum efficiency. With the innovative KTR 5.2 cup forming machine to the perfectly formed end product.

- Your Kiefel benefits:
- Outstanding product quality due to enhanced film transport
  - 10% energy savings due to evolved heating technology with new heating elements and insulation ensure
  - Increased overall efficiency due to innovative, faster & easier tool change
  - Process optimization - 25% faster forming air inlet, sensor-controlled cooling for ideal tool temperature
  - Easy operation & maintenance: New HMI generation
  - intuitive operation, reduced input parameters, guided maintenance

KING POLE INDONESIA, PT

D2-8710

PT. KING POLE INDONESIA is a professional chemical distributor that was established in 2014.

One of the Southeast Asia company in SL Group, SL dedicated to promoting chemical additives since 1973, branch covers more than 6 countries in Asia.

We are working with famous brand develop the specific and highest quality products, offer the fully package of service through our strong service network.

## ADDITIVES

Functional additives use in Rubber, Plastic, PVC, EVA, PU and all of resin and polymer, can increase your product end performance, also increase the value

## AQUACOAT

Water base mold coat can replace Teflon, high performance and eco friendly

Jingye Machinery specializes in manufacturing  
single-stage injection blow molding (IBM)  
machines, injection stretch blow molding  
(ISBM) machines, and molds. Founded in 1997,  
our company is one of the earliest companies  
engaged in this industry in China. Jingye  
machines can make pharmaceutical bottles,  
food & beverage bottles, cosmetic bottles,  
sports water bottles, baby feeding bottles and  
LED bulb covers, etc. Processing raw materials  
include PET, PETG, TRITAN, PC, PP, PPSU, HDPE,  
LDPE, PS, SK.

**INJECTION STRETCH BLOW MOLDING MACHINE**

Jingye injection stretch blow molding ( ISBM )  
machine is a full-automatic one step ISBM machine  
with 3 satations.

**INJECTION BLOW MOLDING MACHINE**

Jingye Injection Blow Molding Machine is a fully  
automatic 2-station IBM machine.

# EXHIBITING COMPANIES

LONG NEW INDUSTRIAL CO.,LTD

D2-9315

We, Long New provide Rotogravure Printing Press, Dry / Wet Laminating Machine, Extrusion Coating-Laminating Machine, Slitting Machine, Inspection & Rewinding Machine, Coating lamination machine.

LONG NEW provides high quality products and services and is committed to becoming the world's leading comprehensive supplier of product design, manufacturing and intelligent services in the field of printing and coating as well as customized machinery for special purposes

## ROTOGRAVURE PRINTING MACHINE

1. Electronic line shaft system
2. Shaftless type unwinding and rewinding
3. Constant unwind tail length web splicer, greatly reduces wastage
4. Inverter controlled turret arm rotation
5. Ink pan tilting device allows easier ink removal after printing
6. Fully automatic splicing without manual intervention
7. Ink furnisher roller equipped to prevent ink splash and greatly enhance the printing quality of half tone colors
8. High efficiency drying system and ventilation
9. Cooling roller driven by servo motor (option)

## DRY LAMINATING MACHINE

1. Ideal for laminating various materials with excellent bonding strength including those hard-to-laminate materials such as nylon, aluminum foil.
2. Double-shaft turret type unwinding and rewinding enable automatic material changing and splicing during high running and minimum wastage.
3. Automatic tension control eliminates tension variation and ensures superior laminating quality.
4. Highly efficient four zones of drying chambers provide top drying performance.
5. Splicing tail control ensures high speed non-stop operation which suits materials in various thicknesses.

## EXTRUSION COATING-LAMINATING MACHINE

1. Double-shaft turret unwind and rewind with automatic splicing ensures non-stop operation with minimum wastage.
2. The user friendly HMI provides convenient adjustment of thickness and speed.
3. Premium quality long life T-die ensures thickness uniformity.
4. Specially designed dual drying chamber equipped at anchor coating section ensures high drying efficiency with energy saving function.
5. Extrusion output: 250-400kg/hr with co-extrusion as an option

LUSTER LIGHTTECH CO., LTD.

D2-9215

# LUSTER

LUSTER LightTech Co., Ltd. (LUSTER), focus on innovative technologies in machine vision and fiber optics, dedicated to become world leader of Machine Vision AI and Optoelectronic information Industry.

To "implant eyes and brains in machines", LUSTER strategically focus on machine vision industry, providing our customer edge-cutting technology and solutions in application specific machine vision systems, smart vision equipment as well as core vision component. Adhered with "customer-centric",

## REWINDTANK SERIES HIGH-SPEED INSPECTION REWINDER

RewindTANK series high-speed inspection rewinder are developed for high-speed rewinding and inspection of flexible packaging, plastic films and laminated films. The machine is composed of unwind, rewind, two splicing tables, traction, BST web guiding and observation lightbox. Together with full servo-driven system from Yasakawa/MK and closed-loop tension control system, to ensure stable operation and accurate rewinding and inspection performance of max. 500m/min. Various optional parts and user-friendly design will provide flexibility for daily use.

# EXHIBITING COMPANIES

MAHATANEE INDUSTRIAL CO.,LTD

A1-1330

Mahataneer Industrial co.,ltd. invented a machine to examine the efficiency of the machines before distribution, and in 2000 the company invented PET plastic bottles blowing with the PET Preform mould and PET blow mould under the name GREAT PET in order to substitute the import of foreign machine which were costly. The machine are capable of blowing 30ml bottles to 20 liter bottles, and it also gives consultation concerning PET plastic bottle design with the aim and devotion to create the quality

**PET BLOW MOULDING MACHINE MODEL:GPT-600**  
PET Blow Moulding machine Model:GPT-600  
Blow up from 250-600ml 3 cavities machine easy for change mould full servo electric motor system

**BOTTLE PACKING MODEL: BTB-01**  
Automatic bottle packaging machine of Maha Thani  
Helps to reduce a lot of staff use because customers have trouble storing bottles that come out each minute. The company has therefore developed an automated storage system for 6,000 bottles per hour, reducing 5 people in the bottle packaging process.

MAHKOTA MAS MANDIRI MULIA, PT (SESOTEC)

D1-810

SESOTEC offers intelligent solutions for foreign object detection, material sorting and analysis, we help our customers to ensure that sustainable and high-quality production is profitable for people, the environment and industry.

SESOTEC is one of the first manufacturers of metal detectors with artificial intelligence. We cover different industries such as PLASTIC, RECYCLING and FOOD industries. We also offer tailored solutions to best meet the requirements of diverse areas of application.

**SORTING SYSTEMS**  
SESOTEC recycling sorting systems cover the entire range of contaminant removal and sorting of material flows: from an automatic sorting system designed to handle larger objects, to machines that focuses on the delicate task of removing small particles.

**METAL DETECTION & MAGNET SYSTEMS**  
SESOTEC metal detectors provide effective protection against damage to machinery, production downtime, customer complaints and recalls. It detects magnetic and non-magnetic metal contaminants with extreme precision.

**ANALYSIS SYSTEMS**  
Analyzes flakes and regrind of materials such as PET, PP, HDPE, and mixed plastic flakes according to their material composition for polymer types, false colors, and metal particles.  
It automatically generates reports and archiving all analysis results.

MALION NEW MATERIALS CO., LTD

A3-328

Malion, a high-tech enterprise integrating R & D, manufacturing, sales and service, is the first listed company among the Chinese domestic companies with masterbatch as main product (Stock code: SZ.300586).

Malion focuses on five ranges of products, comprising white, black, color, additive masterbatch & functional materials.

Based on years of industry know-how, Malion is striving to give integrated solutions on coloration and modification of polymers to its domestic and international customers.

**MASTERBATCH**  
Malion currently focuses on five ranges of products, comprising white masterbatch, black masterbatch, color masterbatch, additive masterbatch & functional materials. They are widely used in food packaging products, medicine packaging products, plastic household products, personal care products, plastic tubing, engineering plastic, electric wire and cable, consumer products, auto plastic parts, agricultural production and etc.

# EXHIBITING COMPANIES

MCC LABEL - IML

D1-850

We are MCC Verstraete and MCC Korsini. Together, we count for more than 55 years of experience in printing labels for injection molding, blow molding and thermoforming. Our in-depth understanding of materials, innovation and sustainability has made us the world market leader, producing over 80 million in mold labels every single day for numerous segments within the packaging industry.

## IN MOLD LABELING (IML)

The term "in mold labeling" (IML) is directly derived from the technique: a preprinted polypropylene (PP) label is placed in a mold that has the shape of the end product, e.g. the shape of a butter tub. Then the molten PP is added to the mold, fuses with the label and -while curing- takes the shape of the mold. Result: label and packaging become one.

MIDDLE EAST RESOURCES COMPANY FACTORY

D1-8702

Merco produces and supply superior quality Polyethylene, Polypropylene and Oxidized waxes under the brand name Mercowax®. Mercowax® are used in plastic industries such as in Master-Batches, PVC Compounds/Stabilizers, Pipes & Fittings, Rubber & Thermoplastic road marking Paints.

## POLYETHYLENE WAX

superior quality PE Wax available in powder form. They exhibit viscosities ranging from 50 to 800 cps, ensuring excellent performance and versatility in various applications

## POLYPROPYLENE WAX

MORETTO S.P.A.

D1-824

Founded in 1980, Moretto supplies auxiliary equipment for plastics processing industry, specifically for injection moulding, extrusion, blow moulding processes. Key products include feeders, dehumidifiers, grinders, gravimetric and volumetric blenders, storage solutions, temperature controllers and chillers, supervising systems characterized by low energy consumption and innovation. A special products line has been developed for PET applications. Centralized systems are supplied turnkey.

#### X COMB MINI DRYER

X COMB is a super compact mini dryer which guarantees excellent manufacturing performances regardless of the external ambient conditions. X COMB is fully electric, specifically designed for technical plastic materials. Its outstanding performance is achieved through innovative design features such as the honeycomb desiccant rotor with molecular sieves made of 100% zeolite. The dryer's "adaptive" feature ensures a very gentle and consistent polymers treatment with dew point levels up to -52°C. Two variable flow turbocompressors only supply the required airflow optimizing the energy consumption. The original OTX hopper can reach efficiency levels which are unique in the drying equipment market.

NPC Injection Molding Machine  
(range from NPC110 – NPC1600)  
Compare to other brands, NPC's machine standard equipped with:

- 1 step bigger motor and pump, make sure machine preforms, make sure the production with less cycle time; avoid over-load alarm in tropical area or hot weather
- Standard with Bi-metallic screw, machine works durable
- 1 set Air blow device & Core-pull device
- 4/4 in/out water distribution
- Close loop injection
- Digital proportional back pressure system
- 10 inches LCD display with multi-language as optional
- Return line filtration system
- Hydraulic safe lock up to 260T
- Automatic safety door device up to 730T
- Oil temperature control system
- The joint connecting part of the oil cooler adopted tougher design
- Continental rigid design of oil tubes

## SEPRO ROBOTIQUE

5X Line robots are designed from latest generation fast and precise Sepro 3-axis Cartesian robots with a Sepro 2-axis servo wrist. A unique combination that provides a number of solutions for automating injection molding machines. These robots installed on the IMM can be used for unloading and processing parts; they can be located at the end of the IMM to perform post-processing. They can be programmed quickly and efficiently thanks to the power and user friendliness of the Visual 3 control system

## SWIFT BY MOTAN

swift – simple units, combined with state-of-the-art control technology  
The new swift product family comprises the most cost-efficient models of the motan product portfolio. swift products are quick and easy to operate. Whether for standardised injection moulding, blow moulding, or extrusion applications – they are always the right choice. The swift product family not only represents value for money, quick delivery and our usual motan quality, but also state-of-the-art control technology.

OMNI PLUS SYSTEM, PT

POLYSTAR MACHINERY CO., LTD.

A2-2218

## POLYSTAR

35 years of POLYSTAR. 4,950 machines in 110 countries worldwide. POLYSTAR is a globally recognized and the No.1 selling plastic recycling machine manufacturer in Taiwan who specializes in post-industrial/post-consumer recycling of PE/PP packaging film and PP raffia/woven, providing the most simple, easy-operating recycling system in the market today.

### REPRO-FLEX PLASTIC RECYCLING MACHINE

POLYSTAR's high efficiency, one-step plastic recycling machine Repro-Flex is designed for the reprocessing of PE (polyethylene) and PP (polypropylene) flexible packaging material, printed and non-printed. Repro-Flex plastic recycling machine combines cutting, extrusion and pelletizing into one compact and efficient recycling line. This cutter compactor integrated pelletizing system eliminates the need of pre-cutting the material, requires less space and energy consumption while producing high-quality plastic pellets at a productive rate. The waste material can be fed by a belt conveyor and a nip roller at the same time to increase the feeding amount. The cutter compactor then cuts, dries, and compacts the material into a semi-molten condition (just below the agglomeration point), which is optimal for the extrusion process that follows. The cutter compactor then feeds the material directly and consistently into the extruder. Repro-Flex's stable material feeding together with the hot die face pelletizer produce round-shaped, uniform size pellets that are higher in value and optimal for reproduction (extrusion processes).

### STAR-X BLOWN FILM MACHINE

Star-X is a simple and flexible blown film machine, which can produce one layer HDPE and LDPE film with high quality. It is suitable for general packaging products such as T-shirt bags, supermarket bags, flat bags, and many others. Our specially designed Star-X can melt and mix the material with additives completely, and our high precision die head and air ring also provide good film thickness control and resistance. Film width is available from 500 mm to 2300mm depending on the customers' requirements and their factory space.

POLYTAMA PROPINDO, PT

D2-9017

PT Polytama Propindo didirikan pada tahun 1993 sebagai produsen resin polipropilena (resin PP) yang andal di Indonesia. Polytama merupakan salah satu perusahaan petrokimia terkemuka dengan merek dagang Masplene® yang terus berkembang dalam rangka memenuhi kebutuhan resin PP di Indonesia. Pada tahun 2017, Polytama meluncurkan produk inovasi terbaru yaitu produk Granule.

### MASPLENE®

Masplene® adalah merek resin polipropilena berkualitas tinggi dari Polytama yang diproduksi dengan menggunakan salah satu teknologi terbaik dunia, yaitu Montell Spheripol (sekarang LyondellBasell). Proses ini memberi banyak keunggulan dan mudah digunakan. Selama proses produksi, polimer dasar dapat dimodifikasi agar sesuai dengan kebutuhan.

# EXHIBITING COMPANIES

## PROFILE SOLUTIONS

A2-206

Profile Solutions is an Australian manufacturer building the world's fastest single leak testers since 1993, from containers from 10ml to 1000L and multiheaded testers for high production rates. We also specialize in downstream equipment, automation equipment, and turnkey system specialists for the global market and we have exported to > 38 countries (many in SE Asia). Our head office is based in Northern NSW Australia and we have global offices in Singapore and the USA. Plus Automation

### LEAK TESTERS FOR PLASTICS CONTAINERS

It detects the leakage of the bottles using Pressure decay method.

### AUTOMATION - BLOW MOULDING

Takeout robots, Checkweighers, Bagging machines, Vision inspections, Shrink sleeve label machines, IML in mould labelling, Bottle conveying systems, Box collation system by count or weight, Packing machines, Labelling machines, Palletising, unscrambler, flashing conveyor with metal detectors, Airveyors for PET bottles and more

### FLEXBLOW PET BLOW MOULDING MACHINES. ISBM - TWO STAGE

World's most flexible SBM machines. We have solutions that you can benefit from in PET/rPET/PP/ Hot-fill container manufacturing business: Process reproducibility – Within a single machine – an unlimited quantity of different containers with the fastest changeovers <https://www.youtube.com/watch?v=UnEg65qqLLA> Revolutionary SBM technologies dedicated to Packaging producers <https://www.youtube.com/watch?v=h8yEldnDQ0g> Added value containers technologies <https://www.youtube.com/watch?v=uSXlSd3y7sM&t>

## PURSUIT INDUSTRIES PVT LTD

A1-1003

PURSUIT INDUSTRIES PVT LTD, is a Largest Manufacturer and exporter of Chlorinated Paraffin 45% and 52% from India.

### CHLORINATED PARAFFIN

'PURSUIT - CP - 52' is a chlorinated paraffin liquid based on (C14-C17) paraffin. It is a versatile and low colour grade used in a number of industries and applications Ranging from use secondary plasticizer and flame retardant additive in PVC to use in paints, sealants and adhesives.

## QINGDAO JINFUXIN PLASTIC MACHINERY CO.,LTD

A3-3422

Qingdao Jinfuxin Plastic Machinery Co., Ltd is a state designated enterprise producing plastic machinery. Mainly engaged in research & development, manufacturing, sales, and after-sale service of new plastic machinery. Products consist of PET/PP strap production line, PET/NYLON/PP/PE/PBT monofilament production line, PET/PP/PE/PC/ABS/PVC sheet production line, PVC/WPC foam board and profile production Line, PVC imitation marble board and SPC flooring production line etc. and auxiliary equipment

### PP HOLLOW SHEET PRODUCTION LINE

can use more filler, more lighter, higher line speed, bigger capacity, easy to operate, higher final sheet quality

### STRAPS PRODUCTION LINE

PET straps line can use 100% recycle flakes, with higher capacity and line speed, lower energy consumption. PP straps line can produce highly accurate straps, speed can reach 250m/min.

### MONOFILAMENT PRODUCTION LINE

PET/PP broom/brush monofilament line, PET/Nylon zipper/net monofilament line, PE/PP net/construction monofilament line, PET/PBT wig monofilament line...

# EXHIBITING COMPANIES

## QINGDAO RUIJIE PLASTIC MACHINERY CO., LTD

A3-3220

Qingdao Ruijie company is specialized in the field of Plastic board production line, Plastic sheet production line, Plastic profile production line, Plastic pipe production line, WPC floor production line, SPC floor production line, PVC WPC wall panel production line, PP hollow building formwork production line, PVC artificial marble board production line, PVC WPC door panel production line, ASA PVC glazed roofing tile production line, PVC ASA exterior wall cladding production line and so on.

**VINYL PVC MACHINE**  
to produce vinyl flooring

**WPC MACHINE**  
to produce Wood-Plastic Composite

**PLAFON PVC MACHINE**  
to produce PVC Ceilings

## RDB PLASTICS GMBH

D1-8102

RDB Plastics GmbH, specializing in plastics recycling since 2003, is a key player in the European waste plastic industry. With ISO 9001:2008, ISO 14001:2015, and EFB Waste Management certifications, we offer a wide range of plastic products and waste plastics that meet international export standards, encompassing films, hard plastics, PET materials and repro-pellets.

**LDPE FILMS**  
99/1, 98/2 and 95/5 quality

**BIG BAGS**  
PP Big Bags

**PET**  
Flakes, bottles, pellets, lumps and fines

## REACH ELECTRICAL (S) PTE LTD

A2-208

Elstein infrared radiators solve all kinds of heating and drying tasks. Together with the proven modular systems, heating areas with a high power density and selective energy application can be realised in the material to be heated. The controllability of the heat output using modern digital temperature controllers and thyristor switching units ensures optimum use of energy and therefore helps to save operating costs and to protect the environment.

### CERAMIC PANEL HEATERS

FSR panel radiators can be used universally and are suitable for assembling radiation areas with any geometry required. They are available in three designs and cover the power range from 60 W to 1000 W.

## RR PLAST EXTRUSIONS PVT LTD

A1-140

MANUFACTURER AND EXPORTER OF PLASTIC EXTRUSION MACHINERY AND EQUIPMENT  
(1) PLASTIC SHEET EXTRUSION LINE, (2) HDPE PIPE EXTRUSION LINE, (3) PLASTIC RECYCLING PLANT, (4) DRIP IRRIGATION PIPE PLANT, (5) ROTO COMPOUNDING PLANT, (6) PRECISION TUBE PLANT, (7) THERMOFORMING MACHINE

**PLASTIC SHEET EXTRUSION LINE**  
R-PET/PLA/PP/HIPS/PC/PS/PMMA/ABS/HIPS/PP/PE

**PLASTIC RECYCLING PLANT**  
RECOMMENDED FOR LOW BULK DENSITY SCRAP, FILM/ WOVEN SACKS/MULTI-LAYER FILM/ MONO FILAMENT/ FIBER ETC. DEGASSING FOR HIGHLY PRINTED FILM WASTE, LLDPE/HM/HD/PP/BOPP/CPP/STRETCH FILM/ CAST FILM ETC

**DRIP IRRIGATION PIPE PLANT**  
FLAT DRIP IRRIGATION PIPE PLANT, ROUND DRIP IRRIGATION PIPE PLANT. 0.30 UNIT/KG POWER CONSUMPTION.  
UP TO 160,000 – 240,000 – 330,000 METER INLINE PIPE. PRODUCTION/DAY.  
THICKNESS RANGE FOR FLAT PIPE: 0.20 MM TO 0.8 MM.  
4 STATION GRAVIMETRIC BLENDER WITH EXTRUSION PROCESS CONTROL.  
BIMETALLIC SCREWS AND BARREL ENSURE STABLE, HOMOGENOUS MELT QUALITY FOR A LONGER PERIOD THROUGHOUT THE OPERATION.  
PLC-BASED MACHINE WITH INBUILT AC FOR THE CONTROL PANEL.  
INSERTION CAPACITY 600 DRIPPERS / MIN.

## RUIAN XINYE PACKAGING MACHINE CO.,LTD

A3-340

Ruian Xinye Packaging Machine Co.,Ltd. with a long history is located in Ruian economically developed city on the seashore of the East China sea of Zhejiang. We are an experienced manufacturer in polyethylene film, bubble film extrusion machines, and related bag making machines field since 1995.  
At same time we offer one-stop service for the full production lines such as arrange other auxiliary equipments for customers from all over the world.

**FILM BLOWING MACHINE**  
Mono Layer and multi-layers Polyethylene, Polypropylene, Biodegradable, bubble wrap, stretch film, shrink film extrusion line

**BUBBLE ENVELOPE MAKING MACHINE**  
Kinds of plastic shopping and packing bags, bubble wrap bags, kraft paper bubble envelope production line

**PLASTIC SHOPPING BAG MAKING MACHINE**  
This machine is multi-functional plastic bag making machine for D-cut bag, Patch bag, drawing string bag, and loop handle bag.

## SAMJIN POLYTECH CO., LTD.

D2-912

We have been trying to develop diverse functional new materials and eco-friendly products as well as the differentiated functional & color masterbatches since established in 2002.  
We mainly provide customized services to our clients to meet their requirements satisfactorily as a total solution provider

**ABSORBENT MASTERBATCH**  
PS Foam Absorbent Tray is an ideal packaging solution not only to prevent the foods from being spoiled due to the blood generated from the frozen/ fresh foods while displayed in the showcases but also to keep the values of the foods for longer period of time accordingly. It absorbs 6 times the amount of liquid.

**FOAM MASTERBATCH FOR PE**  
4G developed to have more gas volume and less die build-up compared to the typical ones is a specific foam masterbatch for PE foam. More gas volume enables PE products to have higher foam ratio and less die build-up contributes to the rise of productivity. In addition, 4G is helpful to get elegant surface because of fine and smooth cell structure formed by the expansion of the gas contained in 4G while extruded.

**DEHUMIDIFYING MASTERBATCH**  
Dehumidifying Masterbatch is much helpful to solve these problems because it absorbs the humidity contained in the above mentioned materials effectively.

# EXHIBITING COMPANIES

## SARANA DINAMIKA PRATAMA, PT (GTMSMART MACHINERY CO., LTD)

D1-802

GTMSMART Machinery Co., Ltd. is a high-tech enterprise integrating R&D, production, sales and service.also a one-stop PLA Biodegradable product manufacturer supplier. Our main products include Thermoforming Machine and Cup Thermoforming Machine, Vacuum Forming Machine, Negative Pressure Forming Machine and Seedling Tray Machine etc

### PLASTIC THERMOFORMING MACHINE

This thermoforming machine used for producing PLA/ PP/APET/PS/PVC/EPS/OPS/PEEK/CPET disposable fast food container, boxes, plates, bowls, fruit package plastic container,egg tray ect.

### CUP THERMOFORMING MACHINE

Cup Thermoforming Machine Mainly for the production of variety plastic containers ( jelly cups, drink cups, package containers, etc) with thermoplastic sheets, such as PLA, PP, PET, PE, PS, HIPS etc.

### PLA THERMOFORMING MACHINE

Our machine is equipped to handle a wide range of PLA materials, from cups and lunch box, plate to food packaging container and beyond. From Production to Perfection, Our PLA Thermoforming Machine Has You Covered.

## SARANA TRIMITRA SOLUSINDO PRATAMA, PT

A1-116

PT. Sarana Trimitra Solusindo Pratama is the leading company specializing in Industrial and Building Automation System in Indonesia. Established in Jakarta on 1998, we have been holding LS Electric Exclusive Authorized Distributor for Drive and Automation since 2001.

We also represent Motortronics (Softstarter), Sehwa (Industrial Weighing), Yidek (Active Filter), Sikes (Passive Filter) & LG Becon (Building Management System) as their exclusive Indonesia distributor.

### LS ELECTRIC INVERTER

Variable Frequency Drive (VFD) from LS Electric. Made in Korea, our inverter is reliable, high quality and price competitive. Our VFD is applicable to wide range of application in Industrial & building projects.

### LS ELECTRIC PLC

Programmable Logic Controller (PLC) from LS Electric. Made in Korea, our PLC is reliable, smart, open networks, able to work with wide ranges of brands and price competitive.

## SHANDONG HAIDAI INTELLIGENT MACHINERY CO.,LTD

A3-3428

CNRM-Shandong Haidai Intelligent Machinery Co.,Ltd established in 2013 and specialized in R&D,manufacturing and selling for intelligent rope production machinery,mainly three series: PP/PE extruder series:monofilament extruder, danline extruder,raffia extruder,artificial grass extruder etc. twisted rope machine series:ø3mm-ø40mm full-intelligent 3 strand/4 strand high-speed rope machine,ø3mm-ø26mm longline rope machine etc.Packing equipment series:spool winder,inflow twister, ring twister etc.

### PP MONOFILAMENT EXTRUDER

PP Monofilament Extruder Machine can produce many kinds of fiber by different screw and related equipments, such like HDPE and PP monofilament fiber, danline fiber, flat film fiber, split film fiber, the fibers can be used for the manufacturing of industry, fishing industry and civilian use, such like rope, fishing net, construction safety net, PP bag and etc.

SHANDONG HAIDAI INTELLIGENT MACHINERY  
PRODUCES COILS  
FROM 1563 M TO 6250 M

### ROPE MAKING MACHINE

Our Plastic pp rope making equipment can make 3 strand or 4 strand twisted ropes in different material, such as pp, pe, nylon, cotton and so on. The rope range from 3mm to 32mm. The Plastic pp rope making equipment is very popular in Africa, Middle East, South America and Southeast Asia such as Kenya, Algeria, Sudan, Egypt, Mexico, Vietnam and so on. We have helped many customer in these area to set up their own plastic rope or fishing net making factory.

### INTELLIGENT ROPE MAKING MACHINE

3 Motors 3 inverters with PLC touch screen operation pp rope making equipment can make 3 strand or 4 strand twisted ropes in different material, such as pp, pe, nylon, cotton and so on. The rope range from 3mm to 32mm. The Plastic pp rope making equipment is very popular in Africa, Middle East, South America and Southeast Asia such as Kenya, Algeria, Sudan, Egypt, Mexico, Vietnam and so on. We have helped many customer in these area to set up their own plastic rope or fishing net making factory.

# EXHIBITING COMPANIES

## SHANDONG ROPENET MACHINERY CO.,LTD

A1-1422

Our company is committed to the research, development, production, service and training of machine for rope, net, twine, webbing products, specializing in the production of high strength PP monofilament, PE fishing net yarn, high strength PP split film, high strength PP danline, PET monofilament extruder, the production of 3mm--100mm 3-strand / 4-strand / 6-strand / 8-strand / 12-strand rope machine and a variety of automatic / semi-automatic packing machine for rope at the same time.

### ROPE MACHINE

3 strands and 4 strands rope making machine can twist different material of ropes.

### PP EXTRUDER

high strength pp yarn extruder with different capacity. It can be customized according to your requirements.

## SHANDONG TONGJIA MACHINERY CO., LTD

D1-8130

Shandong Tongjia Machinery Co., LTD  
Which is a science-industry and trade integration of the modern large enterprise group. Being one of the largest professional manufacturer of plastic machinery in China, won the second place in 2014 of the plastic extrusion machinery, Vice President of China Plastics Machinery Industry Association, vice President of China plastics Processing Industry Association.

### PE PLASTIC RIGID FLAT NET AND GEONET MACHINE

The machine is a special equipment to produce plastic hard flat net with PE material and many kinds of nets of different structure and type by changing die and sizing device. All kinds of plastic hard flat nets produced by the machine are widely used in interlayer of bed, dyke coast resistance, strengthening roadbed, plant bracket, mine roof, breed aquatics, and so on. So it is also called versatile net.

### HIGH-SPEED PLASTIC BIAXIAL STRETCHING GEOGRID PRODUCTION LINE

high-speed geogrid production line is a perfect combination of years of production essence of well-known geogrid enterprises and advanced patent technology of plastic extrusion lamination

### PLASTIC SQUARE MESH OR MOSQUITO MESH PRODUCTION LINE

The machine has double extruders, and they control the warp and weft strand separately. The final production has the feature: smooth surface, equality mesh. By twice transverse and lengthways hot stretching it turns to be the square stretching net. The mechanical property has been obviously promoted. It is widely used in the decoration, safety net, insect prevention, high grade rail and many other fields

## SHANGHAI JIAHAO MACHINERY CO.LTD

A3-336

Shanghai Jiahao Machinery Manufacturing Co., Ltd. is a professional manufacturer of extrusion equipment which is located in Shanghai China. It has great influence in the industry. It is a high-tech joint-stock company. It is the completion unit of key scientific and technological achievements projects of the Ministry of Communications, Ministry of Construction, and Telecommunications. With strong technical force, it is the double guarantee unit of quality and reputation in China.

### PVC SHEET & BOARD EXTRUSION LINE

PVC SHEET AND BOARD EXTRUSION LINE AND ITS AUXILIARY EQUIPMENT AS TURNKEY PROJECT

### PVC/WPC PROFILES EXTRUSION LINE

PVC/WPC PROFILES EXTRUSION LINE AND ITS AUXILIARY EQUIPMENT AS TURNKEY PROJECT

SHANGHAI JW AUTOTECH. CO., LTD

A3-330

Shanghai JW Autotech.CO., Ltd. is a professional enterprise engaged in supporting equipment for bottle cap production. Can provide bottle cap visual inspection system, plastic bottle visual inspection system, and bottle embryo visual inspection system.

Backup. At present, the technical level of various equipment of the company has reached the leading level in China, and some products have reached the same level as those of foreign countries Period level.

## MACHINE VISION EQUIPMENT

JW Company has developed a high-speed and high-precision JWS detection system based on SACMI Company's CVS detection system (which accounts for over 98% of the domestic high-speed beverage bottle cap detection system), mainly to replace imported detection systems. Currently, JW JWS detection system has been widely used by major beverage capping manufacturers in China, and these customers have used our company's products to replace them in the past two years,

SHANGHAI MAXTECH PLASTIC MACHINERY CO.,LTD

A1-158

Shanghai YNRUN /MAXTECH plastic machinery Company, especially for plastic sheet extruder line , plastic board extruder line, and some special raw materials extrusion

## PP/ PS FORMING SHEET EXTRUDER

PP/PS /CORN STRATCH FORMING SHEET EXTRUDER LINE, USE IN FOOD PACKAGE

## PET SHEET EXTRUDER LINE

use in food package, eggs box, cakes box

## PC PMMA BOARD EXTRUDER

USE IN BUILDING AND DECORATION

SHANGHAI YIYOU ELECTROMECHANICAL EQUIPMENT CO., LTD.

D2-9412

Shanghai Yiyou Electromechanical Equipment Co., Ltd. has developed positive and negative pressure forming, punching, cutting, and stacking integrated machines with independent intellectual property rights. So far, we have produced over 500 models of various types. We also wholeheartedly train and recommend operators for customers, and provide one-stop services for molds and materials to relieve their worries.

## FULLY AUTOMATIC POSITIVE AND NEGATIVE PRESSURE THREE STATIONS THERMOFORMING MACHINE

High-end thermoforming machine made by HONGYOUXINC. What is being produced in the video is a disposable PP lunch box. The machine adopts four sections heating oven, and the fastest production speed of 0.4mn PP can reach 30 cycles per minute, and the power consumption is only 70KW per hour. Power saving and high efficiency are the biggest advantages of our machines. Now we can provide customers with a variety of configuration options, and we have the most cost-effective domestic Invoiance configuration. There are also world-renowned parts suppliers such as Siemens, Yaskawa, Beckhoff, JORD reducer, Sey reducer, ELSTE heater, and so on. Customers can choose different configurations according to their own budget requirements, and rich configuration options can bring customers a different purchasing experience.

## FULLY AUTOMATIC POSITIVE AND NEGATIVE PRESSURE FOUR STATIONS THERMOFORMING MACHINE

High-end 4 stations thermoforming machine which integrated forming, punching, cutting and stacking. Power saving and high efficiency are the biggest advantages of our machines. Now we can provide customers with a variety of configuration options, and we have the most cost-effective domestic Invoiance configuration. There are also world-renowned parts suppliers such as Siemens, Yaskawa, Beckhoff, ORD reducer, SEW reducer, ELSTE heater, and so on. Customers can choose different configurations according to their own budget requirements, and rich configuration options can bring customers a different purchasing experience.

## FULLY AUTOMATIC SERVO CUP MACHINE

FU SERVO MOTOR PLASTIC CUP THERMOFORMING MACHINE. WITH 750+500MM FORMING AREA. NOW THE MACHINE IS AL DRIVEN BY THE SERVO MOTOR. THERE IS NO HYDRAULIC USE ANYMORE SO IT WON'T BE OIL LEAKING IN FUTURE.

# EXHIBITING COMPANIES

SHANTOU JOINWELL TECHNOLOGY CO.,

A3-3331

## JOINWELL

Mainly to develop plastic extruded sheet, sheet and film units. The product types are: PET/PLA single screw sheet extruder, PET/PLA twin-screw sheet extruder, PP/PS high output palastic sheet extruder, PP/PS co-extrusion (multilayer) plastic sheet extruder, Starch based degradable sheet extruder

### PET /PLA TWIN-SCREW SHEET EXTRUDER

PET/PLA twin-screw sheet extruder is using high torque gearbox, torque output and gearbox stable design; Modular screw design base on customer requirement ensure material feeding smoothly, mixing, shear dispersion, homogenization, moisture exhausted various function etc.

### PP/PS HIGH OUTPUT PLASTIC SHEET EXTRUDER

To fetch the large-scale and high efficient requirement in the modern industry, saving the production cost for labor, power consumption, and make full use of the production space. We especially design the high output PP/PS plastic sheet extruder.

### STARCH-BASED DEGRADABLE SHEET EXTRUSION UNIT

THIS KIND OF SHEET EXTRUDER IS ESPECIALLY FOR STARCH DEGRADATION MATERIAL WITH HIGH PRODUCTIVITY, GOOD PRODUCT QUALITY, EASY TO CONTROL AND OTHER ADVANTAGES.

SHANTOU DESIGNER PRECISE MACHINERY CO., LTD

D2-9417

SHANTOU DESIGNER PRECISE MACHINERY CO., LTD specializes in R&D and manufacture of plastic machines. The main products are Sheet Extruder, Thermoforming machine, Biodegradable Starch Sheet Extruder, Packaging machine and Moulds. The company owns a number of patents and technological achievements of independent intellectual property rights. The products have high technical content and strong practicability.

### PET TWIN-SCREW EXTRUDER

Use in producing PET sheets, no need pre-drying crystallization of the energy consumption and adapt to the material for the production of the second, high yield, low energy consumption, high-quality plastics characteristics. Can production 0.08-2.0mm PET sheet

### IN-LINE CUPS PRODUCTION LINE

The automatic cups production line contain automatic feeding system, extruder, thermoforming machine, stacker, recycling crusher, so that it can continuous production. Extruder and roller are all using speed inverter. Thermoforming machine use four pole structure so that the machine can move tranquilization to advance the molding precision. Synchronization control the sheet line speed and molding sending speed.

SHANTOU HUAYING SOFT-PACKAGING EQUIPMENT PLANT LTD.

A3-3328

Shantou Huaying Soft-Packing Equipment Plant Co. Ltd. is the professional manufacture of the printing soft-packing and coating equipment, which was found in 1986. It has completes production line including scientific research, design, manufacture, selling and trading. The major products including: rotogravure printing press, coating & laminating machine, solvent-less laminating machine, automatic pouch making machine, inspecting & rewinding machine.

### ROTOGRAVURE PRINTING PRESS

The rotogravure printing machine now has already formed the big family that includes the high-level, middle-level series that can be chosen by various customers, which including electric bearing driven, water oil ink printing, web printing cutting, printing.

### COATING & LAMINATING MACHINE

### AUTOMATIC POUCH MAKING MACHINE

# EXHIBITING COMPANIES

## SHANTOU MENGXING PACKAGE MACHINERY CO.,LTD

A3-3317

MengXing was established in 1998, specialized in thermoforming technology over 20 years. Our machines have been sold around the world. We are always satisfied our customer's requirement, and upgrade technology base on their feedback. We are the pioneer in this field. Is constantly striving to become a world-class manufacturer. Welcome to join us and become our agents to explore the market and provide the better service.

### MFC7254 THERMOFORMER

High speed thermoformer from China. Forming area 720\*540mm, Max. speed 40 cycles/min. Mengxing Specialized in Plastic Thermoforming Machine over 25 years. Well sell in Indonesia market over 15 years.

### XC46-71/122A-BWP VACUUM FORMING MACHINE

Mengxing Vacuum forming machine. Well sell in Indonesia market over 15 years.

## SHANTOU MINGSU MACHINERY CO., LTD

D2-9422

Shantou Mingsu Machinery Co.,LTD is specialized in fully automatic multi-stations machinery with development, production, sale and customer service. Our company structure is about 4000 square meters. We can customized the production line according to customer request. Our machine are sold well in China and overseas including Malaysia, Thailand, Indonesia, Iran, Saudi Arabic, Cambodia and so on.

### MS720\*600 THREE STATIONS THERMOFORMING MACHINE

A company specializing in automated multi-station products integrating R&D, production, sales and service. It can be customized according to the special requirements of users. It is suitable for Biodegradation starch material, PET, PP, PS, ABS and other plastic sheet to produce milk cup lid, square box, square box lid, mooncake box, dish etc.

### MS780\*680 THREE STATIONS THERMOFORMING MACHINE

A company specializing in automated multi-station products integrating R&D, production, sales and service. It can be customized according to the special requirements of users. Processed and produced: biodegradable starch-based materials, PET, PP, PE, PS, ABS and other plastic products.

### MS720\*600 FOUR STATIONS THERMOFORMING MACHINE

A company specializing in automated multi-station products integrating R&D, production, sales and service. It can be customized according to the special requirements of users. Processed and produced: biodegradable starch-based materials, PET, PP, PE, PS, ABS and other plastic products.

## SHANTOU RAYBURN MACHINERY CO.,LTD

A3-3322

We are a research and development enterprise specializing in the design and manufacture of various types of plastic machinery and professional customization of molds. Our company's leading products are RM series high-speed multi-station positive and negative pressure thermoforming machine and RM large forming area 4 stations thermoforming machine, which are applying to disposable plastic equipment. Our equipments have been sold well all over the world and have a good reputation.

### RM-T1011 + GC-7 + GK-7 HIGH SPEED THERMOFORMING PRODUCTION LINE (FORMING.PUNCHING.CUTTING. STACKING)

This type of machine is the big forming area high speed thermoforming machine, for producing bowl/ box/ lid/ flower pot/ fruit box/ try etc. The dry cycle speed is 35r/min and the punching and cutting speed is up to 100spm.

### RM-2RH DOUBLE STATION IN-MOULD CUTTING THERMOFORMING MACHINE

This type of machine equip with hardware steel knife cutting and on-line stacking. Suitable for large height products such as cold drink cup/ container/ bowl etc.

### RM-4 FOUR STATION THERMOFORMING MACHINE (FORMING - PUNCHING - CUTTING - STACKING)

This type of machine is suitable for punching hold products such as flower pot/ fruit box/ coffe lid/ dome lid ect.

SHENZHEN HERO-TECH REFRIGERATION EQUIPMENT CO., LTD

A1-1430

Shenzhen Hero-Tech Refrigeration Equipment Co.,Ltd.was founded in Shenzhen, Guangdong Province in 2010.Hero-Tech Group Co.,Ltd. is started as a trading company for commercial and industrial refrigeration equipment and parts at the early beginning.Hero-Tech is dedicated to research and develop the industry of industrial cooling and temperature controlling, products range including both air cooled and water cooled Scroll Chiller, Screw Type Chiller, Glycold Chiller,Laser Chiller,Oil Chiller,etc.

**AIR COOLED/WATER COOLED SCROLL CHILLER**  
HTI-A/W series industrial chiller is mainly applied in Plastic&Rubber industry.It can accurately control the molding temperature and shorten the molding cycle.Increase the product quality and improve the production efficiency.  
**Design Features**  
Adopted world famous brand compressors and high efficiency,low condenser and evaporator,ensure high cooling efficiency,low energy consumption,low noise and long service life.  
Microcomputer control system offering accurate temperature stability with in  $\pm 1$  .  
Standard equipped Iron pump,stainless steel or high lift pump for option.  
Over sized evaporator and condenser ensure the chiller unit running under 45 high ambient temperature.  
Multi-protection devices ensure the chiller unit running safely.  
HTI-W water-cooled industrial chiller adopted shell and tube condenser,features speed heat dissipation and high cooling efficiency,it is good to be used in high ambient temperature area with abundant water.  
HTI-A Air cooled industrial chiller adopted aluminum fin/copper tube type condenser.

**AIR COOLED/WATER COOLED SCREW CHILLER**  
WELL KNOWN BRAND COMPRESSOR  
Unit adopts Germany BITZER or Taiwan HANBELL brand semi-hermetic screw compressor.  
Adjustable infinite or closely stepped capacity control,features energy efficient,stable and quiet running.Most advanced patented highest precision manufacturing process.  
Built-in full intelligent monitoring and protection including thermal motor temperature monitoring,phase sequence monitoring manual reset lockout,oil temperature sensor.  
Microprogramming control system  
Industrial PLC centralized control combined with compressor capacity control system,precisely monitor.  
Integrated protection for low temperature,high/ low pressure,antifreezing,phase missing,antiphase,overload,motor over temperature,oil differential,flow switch,start up latency.  
Optional operation language,meau leading,unit running state easy to adjust.  
Easy Installation,reliable running  
Closely stepped start-up,minimize impact to electricity.Steady and safe running,low vibration,easy for installation.  
Compact structure,less space demand and light in weight,easy for transport and installation.  
Completely wired,inspected and tested pre-delivery,saving installation time and cost.

**AIR COOLED/WATER COOLED INVERTER(VFD) CHILLER**  
**Features**  
High efficiency and energy saving: Full frequency drive technology is used to improve the unit's comprehensive load performance coefficient IPLV, and save about 20% compared with the fixed frequency unit  
Constant temperature accurate: Scroll inverter adopts DC brushless compressor, frequency conversion interval of 30-90HZ, refrigeration system uses double PID to adjust the mass flow rate, can achieve the chilled water temperature control within  $\pm 0.1^{\circ}\text{C}$ , to meet the high precision temperature control requirements;  
Cooling speed: Relative to the fixed frequency unit cooling can adapt to improve the operating frequency, cooling time increased by about 30%;  
Press life: Most of the time, the inverter unit operates under low frequency/low speed load, reducing the wear degree of the compressor and improving the service life  
Starting current: The inverter compressor starts at low frequency and low pressure, so the starting current is small, and the impact on the power grid is small.

# EXHIBITING COMPANIES

SHIFTY TECHNOLOGY SDN. BHD.

D2-927

SHIFTY TECHNOLOGY SDN. BHD. is being established to meet modern colourful world of sight in comparison to the nature glamour and has rapidly grown and become a talented company that has simultaneously won as a reputed and respectful supplier of specialized formulated COLORANTS for application of variety of plastic resin.

In view of current market demand and environmental protection requirement, SHIFTY TECHNOLOGY SDN. BHD. is having it R&D team to develop products that meet customer requirement.

**SHIMEN, SHIBAT, SHISCO, SHICOM, SHICEM, SHICOA, SHISAN**

USE AS COLORANTS FOR APPLICATION IN VARIES OF PLASTIC RESIN.

SHINKO CO., LTD.

A2-209

Since Shinko was founded in 1964, it has been a global leading company that manufactures clip chains for orienting plastic films and highly advanced cleaning system for removing surface particles on substrates. Our main markets & applications are those in relation with Films, Papers, Batteries, LCD/OLED Display, PCBs, Semiconductors, Metal, Foil, Fiber, Non-woven and so on.

**ULTRASONIC DRY TYPE CLEANER**

The best seller Non-contact ultrasonic cleaner. 100% removal down to 1.6 micrometer particles. Active length is 50mm to 11000mm (customizable)

**AIR TYPE SA CLEANER**

Brand new air type cleaner. Compact cleaning head and blower unit. Easy to install. Lower initial cost.

**TENTER CLIP CHAIN**

Enough and proven experience of supplying various types of clip chains. We can solve the problems such as film breakage, film slipping that you may have.

SIAD MACCHINE IMPIANTI S.P.A.

D2-9312

SIAD Macchine Impianti is a leader in the production of reciprocating air compressors for blowing r-PET/PLA bottles for the Food&Beverage sector. After the success of VITO, the "Next" generation is a high performing, reliable compressor built to be efficient, sustainable and connected, at every level. VITO Next is an enhanced product in terms of reliability, longer lasting components, reduced maintenance costs and adaptability in harsher ambient conditions.

**VITO NEXT**

VITO NEXT, IS A RANGE OF SMART AND GREEN COMPRESSORS SPECIFICALLY DESIGNED FOR BLOWING PET, RPET AND PLA BOTTLES. THE NON-STOP COLLABORATION OF SIAD MI TECHNICIANS AND ENGINEERS WITH THE RESEARCH AND DEVELOPMENT DEPARTMENT, PLUS SPECIFIC FEEDBACK FROM OUR CUSTOMERS, HAS LED TO THE EVOLUTION OF THE VITO RANGE WITH THE CREATION OF HIGH-PERFORMANCE, RELIABLE AND SUSTAINABLE COMPRESSORS, AS DEMONSTRATED BY THE SIGNIFICANT TECHNICAL IMPROVEMENTS WHEN COMPARED TO THE PREVIOUS MODELS. THE VITO NEXT STANDARD SUPPLY ALSO INCLUDES SIADMI4U, THE REMOTE MONITORING AND DIAGNOSTICS SYSTEM THAT ENABLES CLIENTS TO VIEW, ANALYZE AND MANAGE ALL THE OPERATING PARAMETERS OF A COMPRESSOR OR PLANT IN REAL TIME.

## SIMCHENG PLASTICS MACHINERY CO.,LTD.

A3-213

SIMCHENG Plastics Machinery Co., Ltd., located in Shishan Science and Technology Industrial Park, Guangdong, China, is the leader of national standard working group. The company is honored as SRDI enterprise, demonstration enterprise in Intelligent workshop, benchmarking enterprises in industrial internet application invisible champion in national manufacturing industry. Three series: Single and multi layer cast line, uniaxial and biaxial stretch film production line, Intelligent packaging robot

### FUNCTIONAL FILM LINE

It includes protection film line, wood grain film line, high barrier film line and pet film line . Protection film is used on metal products surface, coated metal products surface, plastics film surface, automobile products surface, electrical products surface, brand products surface, profile products surface, etc. For decoration purpose, PP wood grain film can be used on surface of plywood, core plate, fibreboard. With features of high simulation, environmental protection, It is widely used in furniture production and interior decoration. High barrier film is mainly used on food and medicine packaging, electrical parts sealing, solar battery sealing and OLED sealing. PET film, which is also called high temperature resistant polyester film, due to its excellent physical property, chemical property, size stability, transparency, recoverability, it can be widely used on magnetic recording, photosensitive material, electronics, electrical insulation, industry use film, industrial film, packaging decoration, screen protection, optical mirror surface, etc.

### FLEXIBLE PACKAGING FILM LINE

Mainly used in the packaging industry of food, materials and consumer products. The film produced by casting technology method have excellent performance like small variation, high transparency, suitable for metalizing and printing.

### AUTOMATIC PACKAGING EQUIPMENT

In film industry, different kinds of film for different applications are made by different material , most manufacturers supply with slitting machine, the film rolls after slitting need to be protected by packaging during the transportation. SIMCHENG research and develop the automatic packaging machine which can pack the slitted film automatically.

## SINOMECH CORPORATION

D1-8501C

Founded in 2007, Sinomech has been dedicated in solventless lamination technology for over 16 years. Now Sinomech has come the largest supplier for solventless laminating machines in Asia. Sinomech has more than 1,400 customers in the global market and more than 1,800 installations. With strong technical support, top machine quality and aftersales service, Sinomech has won a worldwide reputation.

### SOLVENTLESS LAMINATOR A450

Model A450 solventless laminating machine is suitable for high-speed solventless lamination of different types of plastic films, metalized films, Aluminum foils and papers. It is one of the most popular laminator models in the markets.  
Max laminating speed: 450mpm  
Max web width: 1050/1300/1500mm  
Max unwinding diameter: 800/1000mm  
Max rewinding diameter: 800/1000mm  
Reel fixing: Shafted or shaftless

### SOLVENTLESS LAMINATOR A400

Model A400 solventless laminating machine is ideal for getting started in flexible packaging solventless lamination. It is suitable for high speed lamination of different types of plastic films and metalized films.  
Max laminating speed: 400m/min  
Max web width: 1050/1300/1500mm  
Max unwinding diameter: 800/1000mm  
Max rewinding diameter: 800/1000mm  
Reel fixing: shafted  
Glue applicator: Automatic mixer

### TRIPLEX SOLVENTLESS LAMINATING MACHINE A400-3

Model A400-3 triplex solventless laminating machine is the world first vertical three-layer laminator developed by a Chinese leading manufacturer of printing and converting machinery - Sinomech Corporation. This web lamination equipment is suitable for high-speed solventless lamination of different types of plastic films and metalized films, and especially designed for Al foil lamination.  
Max lamination speed: 400m/min  
Max web width: 1050/1300mm  
Max diameter for main unwinding: 800 mm  
Max diameter for secondary unwinding: 800 mm  
Max diameter for third unwinding: 600mm  
Max rewinding diameter: 1000 mm

SMF (SUNNY MACHINERY FACTORY)

D2-9517

**SMF**® Since 1998

SMF Sunny Machinery Factory was established in 1998. Professional electrical engineers and mechanical design engineers who are good at using the latest electrical systems and spare & accessory parts from major brands in the world, and they have been committed to the design and manufacture of various slitting rewinding machines, CPP/CPE Cast film lines, extrusion coating laminate machine etc.

## SLITTING MACHINE

In the past 25 years, SMF has produced various excellent quality primary slitting rewinding machines, secondary slitting rewinding machines, slitting rewinding machine for paper, cloth, film, non-woven fabric etc, and more than 2,000 sets of rewinding machines for domestic and abroad customers. and our machines have always enjoyed an excellent reputation. Our product width covers from 600mm-6000mm, the speed ranges from 100-800 meters per minute, various models, and there are many special customized models for customers.

## CPP CAST FILM LINES

Cast film products are mainly used in the packaging industry, but technical, medical and stationery films are also important sectors. Indeed, the worldwide market for flexible plastic packaging is predicted to grow steadily within the next years. Owing to their good optical and mechanical properties, cast films play a significant role in the flexible packaging market. Both, film producers and converters, expect high film quality and cost-efficient production. SMF can supply our customers with highly functional machines for their specific market requirements.

## EXTRUSION COATING LAMINATE MACHINE

SMF is the leading plastic extrusion machinery manufacturer in China, having core expertise in comprehensive range of extrusion machinery for plastic. For coating thin layer of polyolefin's (mainly LDPE/PP) on substrates like Woven sacks, tarpaulins, jumbo bags, BOPP film, Paper, aluminum foil, Polyester Film, Cotton fabrics, Jute, Non-woven fabrics, etc. up to 4500mm web width applications

SUZHOU CAI MACHINE GROUP CO., LTD.

D2-9318

CAI Machine committed to dry-offset printing machine R&D and manufacture, assist our customer express their idea via picture, words, artwork, even QR code on surface of plastic cup like coffee, juice, tea, yogurt, ice cream. Our solution also applicate to food tray, pails, oil bucket, lid, flower pot which are in plastic like PP, PET, PS, EPS and degradable PLA. High speed and high precision CAI Machine make cost lower and efficiency improved come true. CAI, color all intelligently.

## CUP PRINTER-S608

1. Stable & high speed
2. Photographic printing
3. 6-8 colors, 400-600 printing speed
4. Abundant practical functions

## LID PRINTER-LM

1. A wide range of printable types (lids, boxes, egg trays, etc.)
2. Efficient, economical and cost-saving
3. The printing process is stable and high-speed
4. 8-color printing, rich colors

## PAIL PRINTER-PM

1. Fit the characteristics of the hand bucket product and apply the orientation printing function
2. Replace manual labeling or in-mold labeling, faster and more convenient
3. Large output and cost saving
4. 8-color printing, stable and high speed
5. Larger printing size and faster printing speed

TAHAW ENTERPRISE CO, LTD

A1-1230

We TAHAW Enterprise Co. Ltd. is established in 1987. We have 5 factories and one research centre in 3 places: Taiwan, China and Vietnam. We are specialized in producing various kinds of Masterbatch: White, Black and Color Masterbatch, Filler Masterbatch, Anti-Foam Agent, Plastic Functional Masterbatch, Perfume Masterbatch, Smell Plastic Neutralizer Masterbatch and Functional Additives etc. We also supplied in Blowing Film and Extrusion Additives.

## MASTERBATCH

Our masterbatch with High Dispersity, Concentration Brightness, Could suitable for all kinds of plastic product application.

## PERFUME MASTERBATCH

It can be applied to toys fragrance theca, craftwork, daily product, and The fragrance can remaining about 1 year.

## PLASTIC SMELL NEUTRALIZER

It is widely used in recycled plastic to get rid of the bad smells like ethylene, hydrogen sulfide, sulfur dioxide, amine, ammonia. It can not only absorbing CO, SO, NOX, NH, Sulfide etc. acid bad smells and getting rid of bad smells but also can maintain plastic physical properties & mechanical toughness.

A2-211

Our company in China was established in 1999, and another factory in Taiwan 10 years later. We are specialized in the manufacturing of mold component and plastic injection mold cooling system for over 20 years. In addition, our products are made by ourselves and from our supply chain, who also OEMs for international mold components companies. Therefore, we can supply high quality products with good price.

**MOLD COOLING SYSTEM**  
plastic injection factory components, mold factory components & polishing material.

## TAIZHOU CITY HUANGYAN XUEJUN MOULD CO.,LTD

D2-9406

Xuejun Mould was founded in 2002, it is specialized in PET preform moulds, bottle moulds, PET moulds, bottle cap moulds, and various other packaging moulds. Our company has more than 20 years of mould manufacturing experience. During this period, Xuejun's mould have been developing to be more precise, more complex and more economical. The technique continues improving and the production lead time continues shorten.

### PREFORM MOULD

Xuejun Mould was founded in 2002, it is specialized in PET preform moulds, bottle moulds, PET moulds, bottle cap moulds, and various other packaging moulds. Our company has more than 20 years of mould manufacturing experience. During this period, Xuejun's mould have been developing to be more precise, more complex and more economical. The technique continues improving and the production lead time continues shorten. Mould production forwards information, refinement and automation in order to adapt the increasing production capacity. At present, Xuejun has a series of international advanced mould processing center equipment, such as Mazak, KaFo, Kent, YCM and so on.

## TAIZHOU HUANGYAN DEGREE MACHINERY CO.,LTD

A1-1011

Taizhou Huangyan Degree Machinery Co.,Ltd is specialized in developing and manufacturing PET Stretch Blow Molding Machine, PE Extrusion Molding Machine, Injection Molding Machine and Plastic Mould. We have many years experience of researching and producing plastic machines. Our main products are: DEG series full automatic machines, Semi-automatic blow molding machines with all kinds and sizes of mould. The main parts of The machines are from Germany, Japan, Switzerland, Korea, Taiwan and so on,

### MINERAL WATER PET BOTTLE BLOWING MACHINE

Mineral Water Pet Bottle Blowing Machine is full servo motor, servo drive, servo clamp, servo stretch and servo loading. Bottles range can be 100ML-1.5L, output is 6000-7000BPH. If maximum 600ML, output can reach 9000BPH. Our machine components use famous brand, such as Japan Mitsubishi, Japan SMC, America Parker, Taiwan AIRTAC and so on. Machine program can keep over 7 kind blowing data.

### PLASTIC BOTTLE JERRY CAN EXTRUSION BLOW MOLDING MACHINE

DEGREE PLASTIC BOTTLE JERRY CAN EXTRUSION BLOW MOLDING MACHINE IS USED TO DO DIFFERENT KINDS HDPE OR PP BOTTLES OR HOLLOW PRODUCTS UP TO 12 LITER

### WATER BOTTLE PREFORM INJECTION MOLDING MACHINE

DEGREE water bottle preform injection molding machine is 230Ton-400Ton clamping force, PET special screw and barrel, which can do 28mm or 30mm preform with 12 cavity to 48 cavity, 1000-8000pcs preform per hour.

### 48 CAVITY PET PREFORM MOULD

DEGREE 48 CAVITY PET PREFORM MOULD IS ONE KIND HOT RUNNER PREFORM MOULD WITH PIN VALVE GATE SYSTEM. IT IS 48 CAVITIES, PREFORM WEIGHT FROM 8-40GR, 7500-8000PCS PER HOUR.

## TAIZHOU HUANGYAN JMT MOULD CO.,LTD

A3-3430

JMT founded in 2005, covering an area of 23,000 square meters, specialized in design and manufacture Autoimove Mould, Household Products Mould, Home Appliance Mould, and SMC Mould etc. JMT owns world's first-class mold processing equipment, like five axis high-speed machining center, we have more than 280 employees, including 40 professional designers, we provide products and services to more than 30 countries and regions around the world.

### AUTOMOVE MOULD

Autoimove interior and exterior parts, Household Products, Home Appliance(white products), and logistics products(pallet, crate..)

### LOGISTICS PRODUCTS MOULD

AUTOMOVE INTERIOR AND EXTERIOR PARTS, HOUSEHOLD PRODUCTS, HOME APPLIANCE(WHITE PRODUCTS), AND LOGISTICS PRODUCTS(PALLET, CRATE..)

## TAIWAN ASSOCIATION OF MACHINERY INDUSTRY/T

A1-1224

TAMI was founded in November, 1945. More than 70 years, TAMI has played a key role in the Taiwan machinery industries. The Machine Tools sector is the leading area of Taiwan's machinery industry. Among those 2,700 members which TAMI has nowadays, there are more than 1,000 in the machine tools and related components sectors. TAMI is the most historical and leading manufacturers' association of machinery and machine tools in Taiwan, and treasures all the opportunities in offering the best support

## TAN INDO SUKSES, PT

D2-8830

PT TAN INDO SUKSES is located in Batam, Indonesia, with a total investment of 3.88 million US dollars, covers an area of 15,000 square meters, and has 188 employees. On November 18, 2018, five sets of large-scale LDPE recycled particle production lines were officially put into operation, the company currently produces 1,888 tons of LDPE granules of various grades per month, mainly pure plastic wrap material (LLDPE) and pure high-pressure large white material (LDPE)

### LDPE PELLET

Low-density polyethylene (LDPE) is a plastic material suitable for the molding processes for thermoplastic mold processing and good mold making capabilities.

### LLDPE PELLET

LLDPE is a solid choice for grocery bags, trash bags, and shrink wrap film due to its strength and durability. If you're stashing multi-pack beverages for later, the shrink wrap that goes over plastic bottles is often made of LLDPE.

### PP PELLET

PP pellets are small cylinders of the highest quality material and do not incorporate recycled or reclaimed material. Thanks to these qualities, PP pellets are perfect for 3D printing, achieving high print quality.

## TANSTAR INDONESIA

A3-3402

TANSTAR Indonesia always aims to provide solution to customers in plastic production (injection, extrusion molding). With advanced technology and long years of experience, we always deliver high quality screw & barrel with high precision and good design. We keep on improving our products and adapting to the production needs (general to special plastic material/product), in order to achieve better usage time and cost management. Please contact our representative to know more about our products.

### SCREW & BARREL

Screw & barrel with high precision and good design provides resistance against weariness and corrosive plastic material, producing high quality end products.

## TEDERIC MACHINERY CO.,LTD

A3-3203

Tederic Machinery is an intelligent injection molding machine manufacturer with world-leading technology (a world-renowned injection molding solution provider). As a company listed on the main board of Shanghai, China (603289-SH), we have rich industry experience, good performance and professional knowledge. So far, Tederic is operating in more than 130 countries and regions, and provide a solution for automotive parts, packaging, medical, electronics, household appliances and other industries.

### NEO-T 500 WITH ELECTRIC CHARGING SYSTEM

High speed: The charging time and per mold cycle time are effectively shortened;  
Energy saving: Under the same production conditions, it can save power by 15%-30%;  
Non-welded pipeline, cleaner hydraulic system.  
The design is more humane and flexible.

### NEO-T 260 TOGGLE SYSTEM INJECTION MOLDING MACHINE

A new generation of servo power system saves 30% to 80% energy compared with traditional hydraulic systems.  
Ultra-high response speed, the highest pressure can be reached in the fastest speed at 28ms, the system pressure is 17.5Mpa.  
Upgrade pump motor power to short the cycle time and widen the molding process.

Tokoplas hadir untuk mempermudah aktivitas Anda sebagai pembisnis di bidang petrokimia dengan berbelanja kebutuhan usaha lewat website atau aplikasi Tokoplas.

## TRIYOTEK PT

D1-820

PT. Triyotek is a professional converting line company which majored of Flexible Rotogravure Printing such as Printing Machine, Dry Lamination Machine, Slitting Machine, Inspection Machine and Mini Rewinder Machine.

We are able to accept to modified, recondition machine and supplies for machine which mentioned above.

Our consistenly aim is building high-level innovation with providing fast service to ensure our customer must be satisfied. Technical support service is able to handle all inquiries

**IX3 INSPECT**  
Flextek Machinery has designed and manufactured a brand new model Doctor Rewinding Machine IX3 INSPECT to meet customers' demanding converting needs.

The IX3 INSPECT can handle materials up to 1000 diameter and runs at 400m/min. To maximize the production efficiency, the IX3 INSPECT is equipped with quite a few features such as the 3 motors and 2 tension controllers at unwind and rewind with closed loop type system ensure stable tension performance, synchronous stroboscope provide a better view of web, near roller installed on both unwind and rewind to reduce wrinkle web with high precision regulator system, closed loop calculation diameter in real time at unwind and rewind to ensure better winding solutions, trim edges with venturi blower type, chucks compatible with both 3" & 6" cores, the list goes on...

Not only the hardware of the IX3 INSPECT is upgraded, its software was also redesigned in order to make the machine more user-friendly with newly designed interface and icons.

**R1 WINDER - DOCTOR REWINDER**  
R1 is a medium sized doctor revider allowing to re-work finished rolls and eliminating errors in rolled materials at high speed. Developed to focus on efficiency, decreasing waste and increasing companies productivity. Additional rewinding performed on this machine has a purpose to correct quality of material web, control of print quality, extract of faulty material, and if required to cut off edges.

**SFR - SLIT C (SLITTING MACHINE)**  
The SFR - SLIT assist you to reach quality production with economic investment cost for flexible packaging sector. Moreover, the equipment are accessible and accessories assist you to production with maximum quality.

# EXHIBITING COMPANIES

## TS INDUSTRIAL SERVICES PTE LTD

A2-220

TS Industrial Services Pte Ltd, based in Singapore is distributor/reseller for world renowned brands serving plastics, chemical and food processing manufacturers in the region.  
**XALOY:** Screw, bimetallic barrel, front end components and wear solutions for plastics processing  
**STAMIXCO:** Static mixer for plastics injection or extrusion  
**HERZOG:** Shut-off nozzle for injection molding machine  
**BRABENDER TECHNOLOGIE:** Precision weighing and feeding system for all bulk material

### XALOY PULSAR MIXING SCREW

The Pulsar® Mixing Screw is a low shear distributive mixing device that is installed near the discharge end of a plasticating screw. Distributive mixing is the disruption of laminate flow within the melt pool, as well as the mixing of regular fluids that do not have a yield point. All melting of plastic resin needs this distribution to deliver a uniform homogenized melt pool with minimal temperature differentials. The more uniform the polymer, the more consistent the viscosity and, hence, the potential for consistent repeatable flow into the tool. The more repeatable the flow, the greater the likelihood of molecular orientation which determines the physical properties of the component being molded.

### XALOY MPX ENCAPSULATED SCREW

Xaloy® MPX™ Wear Coating is a newly engineered, tungsten carbide coating with improved abrasive and corrosive wear performance and higher bond strength than conventional HVOF Coating.

### BRABENDER FLEXWALL FEEDER

The FlexWall®Plus range of feeder is ideal for poor or difficult flowing bulk ingredients. The shape of the trough and the external adjustable amplitude massage paddles work together to provide consistent screw filling and mass flow without ingredient deterioration. The FlexWall®Plus is easily disassembled for wet or dry cleaning as the polyurethane hopper that is attached to the housing is easily removed. Moreover, the compact trapezoidal shape allows up to 6 feeders to be arranged around a central feed point. All service is from the front or back.

## TUNG YU HYDRAULIC MACHINERY CO., LTD

A1-1316

Founded in 1983, Tung Yu is one of Taiwan's leading manufacturers of rubber processing machinery.  
 TungYu builds machines for Compression, Transfer and Injection molding of rubber.  
 4-post, slab side, FIFO injection styles with standard and custom designed machines available with clamping capability 5 to 10,000 tons.  
 Special application presses such as: Medical Rubber presses, Conveyor Belt vulcanizing system, Heavy-duty, can be designed to satisfy special and continuous production requirements.

### ALL ELECTRIC SERVO PREDD

Energy-saving and precise force application, using clean energy to increase production capacity, is an optimized high-quality solution.

### HORIZONTAL RUBBER INJECTION MOLDING MACHINE (FIFO)

Horizontal structure with ergonomic design. Equipped with auto de-molding device for finished products can be dropped by its own weight, compiled with OPC UA standard, to save more materials and reduce production cost.

### ROTOCURE

Utilizing Sweden-made SANDVIK steel belt for stable and even working pressure (option: Berndorf or other brands).  
 Auxiliary radiation heating system. Heating zones controlled individually.

## UNION PLASTIK

A2-246

TECHMATION

## UNITED HEATER

D1-8430

United Heater is a brand under Usaha Saudara Mandiri Ltd. United Heater producing heating elements for a bunch of industry application. Because our customer is our priority, United Heater uses high quality materials in order to maintain quality and optimization in its application. Electrically based heating elements make the application environmentally friendly.

### HEATING ELEMENTS

We make custom heating elements such as :  
 Band Heater, Ceramic Band Heater, Cast In Heater, Cartridge Heater, Finned Heater, Immersion Heater, Infrara, RTD, Thermocouple, Tubular Heater, etc.

### FURNACE & OVEN

We make custom furnace & oven for your industry application.

This is only small sample of hundreds of new product which will be on display at the show. It's based on information provided by exhibitors as of October 5th, 2023. NOTE: this list is NOT comprehensive. The layout of this buyer's guide is at the full discretion of the organiser.

# EXHIBITING COMPANIES

VAN DAM MACHINE EUROPE B.V.

D2-964

Since 1962 Van Dam Machine is an innovated company in direct printing equipment on rigid packaging. It's our clear mission to deliver sustainable state of the art decoration solutions to customers globally. Resulting in a zero packaging waste.

Our Products:

- Dry Offset (CM 608 M "The Professional Printer" & CP 406 M "The Compact Printer")
- FlexoCup The FDoR® Cup Printer : Mixes the high speed of Dry Offset with the constant high printing quality and easy operations of Flexo.

**CP 406 M – "THE COMPACT PRINTER"**

- First time right" plate mounting
- Cost effective
- Quick set color heads
- Low maintenance
- Sharp printing quality
- Production speed up to 400 cups per minute
- 6 color heads standard

**CM 608 M – "THE PROFESSIONAL PRINTER"**

- Up to 8 colors
- Wide range of products (diameter 50-230 mm)
- Production speed up to 600 cups per minute
- High printing quality
- Modular building concept
- Reliable and proven technology
- Operator friendly

**FLEXOCUP – "THE FDoR CUP PRINTER"**

- Consistent photographic FDoR® print quality
- Up to 8 color heads for CMYK with Extended Gamut or spot colors
- Production speed up to 650 cups per minute
- Low Decoration costs
- Quick change-over

VICTORY BLESSING INDONESIA, PT

D1-8301

PT. Victory Blessings Indonesia is an exclusive agent, professional distributor and supplier of Converting Industries Machines, Tools and Equipment for Packaging Industries in Indonesia. We provides all the new technologies, tool, equipment and materials required by our customers so that they can get the best quality and innovative product that are cost effective.

**MAIN MACHINE FOR ROTOGRAVURE INDUSTRIES II**

1. GCM - Solvent Free Laminator

Product: Solventless Laminator Machine Olympia SL and Solventless Laminator Machine Olympia HD  
Description: GCM Machines develop plants for flexible packaging world with customized projects and latest-generation technological solutions, designed to optimize cost and processing times.

2. FORMECO - Solvent Recycle Machine

Description: The Formeco solvent recycler allows reuse of solvents through a simple distillation process, they separate the contaminants (resins, polymers, pigments, paints, oils, etc.) from the original solvent. The boiling of the solvent is accomplished by a peripheral heating jacket filled with diathermic oil, heated by an electrical element.

**MAIN EQUIPMENT PRODUCTS II**

- Rotometrics
- Smarvision
- Ink Mixer
- Mark Andy
- Air Shaft
- Arise
- Taiyo

**CONSUMABLE PARTS II**

- Megumi Plastics
- Raja Pallet
- Paper Packaging

VICTORY BLESSING INDONESIA, PT

D1-8201

PT. Victory Blessings Indonesia is an exclusive agent, professional distributor and supplier of Converting Industries Machines, Tools and Equipment for Packaging Industries in Indonesia. We provides all the new technologies, tool, equipment and materials required by our customers so that they can get the best quality and innovative product that are cost effective.

**MAIN MACHINE FOR ROTOGRAVURE INDUSTRIES I**

-Fuji Kikai

Product: MD Series Rotogravure Printing Machine  
Description: High speed multi drive rotogravure printing press

- Sumitomo

Product: Extrusion Lamination Machine  
Description: Extrusion molding technology to building high functional, high efficient and high value added film and sheet production systems.

**MAIN EQUIPMENT PRODUCTS I**

-Hagihara

Product: Slitting Machine  
Description: duplex Centre Rewinding Slitter HDF-406-1300, New Economical High Speed Type

- Tokyo Keiki

Product: Web Inspection System Camera

**CONSUMABLE PARTS II**

- Chukoh : Teflon Pabrics and Teflon Tape
- Smart Cleaner
- Smart Cork Tape
- Swedcut
- 5STAR UVLAMP
- Durham Duplex: Industrial Blades

# EXHIBITING COMPANIES

## WEB CONTROLS LTD

D2-9025

We specialize in different brands of Colorcon/ Inspection Rewinder / Film blowing machine / Slitting m/c / Bag making m/c, Extrusion Lamination...converting machines.

Also, iron powder (for powder brake/clutch) / Air Shaft / Guide Roll / EPC / LED Stroboscope / Friction Ring.

### DOCTOR BLADE HOLDER

QH Quick replacement blade doctor blade holder Product for quick and easy replacement of doctor blade holders on gravure printing Machines. Since there is no need for positioning or bolt tightening, there is no need to concern setting errors, which can reduce working time greatly and ensure the safety performance of operators. The surface is treated with a special hard sur-face, which improves the scratch resistance, stain resistance and non-adhesive-ness, making it easier to clean and aesthetic. Set blade and liner. Just place the blade at the bottom of the positioning pin to ensure consistent installation of the blade.

### REPLACEABLE TYPE EURO HOLE PUNCHER:

- 1.any size of Euro hole can use one same mold base
- 2.easy to change the punching blades (only need to loose 5 screws)
- 3.convenient to use and repair, only need to buy punching blades in future
- 4.punching speed can be up to 260 times/min

### TAIYO COLORCON LC PLUS

- Integration of web handling
- Taiyo provide all of system of web handling.
- Consolidation of user interface Consolidated setting of line operation, unwinder, rewinder, printing unit, & colorcon.
- Availability for motors of each motor makers Serbo motors or inverter motors will be available. Belt drive or direct drive will be available for drive method.

## WEBCONTROL MACHINERY CORP.

D1-8118

Webcontrol Machinery Corp., established in 1988, is a premier manufacturer specializing in Converting Machines, including Solvent base & solventless laminator, Extrusion laminator, Rewinder & Inspection Machine, and Seaming machine. They excel in Flexible Packaging Converting and Shrink Sleeve Converting solutions, offering innovative machines that handle various materials with precision. Webcontrol continues to be a trusted partner for industries seeking top-quality Converting solutions.

### SHRINK SLEEVE SEAMING MACHINE

The new PLUS series is the most advanced seamer in the industry. Webcontrol has once again innovated by launching the third generation of seamers which eliminates the forming tool. This new design makes the most operator friendly machine available, facilitating training with the most automated machine on the market. The machine has 3 tension zones, which allows for a dedicated tension zone for the forming section for better lay flat control. The unwind tension zone is now free to add innovations like laser integration or pin hole perforation while the film is flat. The PLUS offers a long list of advantages that solve the issues that come with the previous generation of machines that use forming tools. This new machine promises to revolutionize the way shrink sleeves are converted.

### SOLVENT AND SOLVENTLESS COMBI LAMINATOR

The Solvent and Solventless Combi Laminator is an advanced machine designed for the flexible packaging industry. It combines the benefits of both solvent-based and solventless lamination processes, offering versatility and cost-effectiveness. Our new design with stand alone solventless and solvent base coating station, more friendly and easy for operation.

### DOUBLE SIDE INSPECTION MACHINE

This double-side rewinding machine can do more serious inspection for the better quality, especially for packages of medical, cosmetics and some high-price food products. Integrated with automatic defect system, this machine can reach precise and continuous inspection to ensure zero defects.

## WELL SHYANG MACHINERY CO., LTD.

A1-1209

Well Shyang Machinery Co., Ltd. (WSM) was established since 1975. WSM is a leading machine manufacturer for Rubber, silicone, & Plastics processing machines in Taiwan. Our main products includes Dispersion kneader, Intensive hydraulic pressurized kneader, Intermesh mixer, Banbury mixer, Cold feed Extruder, Strainer, Hot feed extruder, Sheet preforming machines, Roll Mills, Pellet making lines, Batchoff machines and other support units.

### INTERMESH MIXER

quick cleaning, superior dispersion, maximum cooling, single pass mixing, shorter mixing cycle

### TWIN TAPER-SCREW EXTRUSION SHEET PREFORMING MACHINE

The twin taper screws "bite" and feed the rubber compound into a horizontal roller die for automatic and continuous sheeting. It was designed to manufacture rubber sheets on a fully automatic basis.

### SINGLE SCREW EXTRUDER

1. Abandoning the complicate roller feeding process, it saves Labor Cost and Time.
2. Simple strip or sheet discharge device could supply material for various types of rubber injection molding machine.
3. High extruding capacity and low power consumption.

# EXHIBITING COMPANIES

## WORLDLY INDUSTRIAL CO LTD

A1-1221

Worldly Industrial Co., Ltd. was established in 1972. Our products have been sold to over 30 countries, and approved by ISO 9001 2008 and CE safety certification. Client satisfaction is always the top mission for Worldly. For fulfilling the ideal services to all clients, Worldly has been constantly researching and innovating. We also provide exclusive customized design on all flexible packaging equipment.

Rotogravure printing machine  
Laminating machine  
Coating machine  
Extrusion laminating

### HIGH SPEED ROTOGRAVURE PRINTING MACHINE

In pursuit of efficient high quality printing machinery, Worldly develops machines featuring user friendly automatic operation and high stability of mechanical equipment made by specialized technology and deliberate design. Throughout the use of a central control system, including PLC control, human-machine touch screen interface and automatic alarm systems, technical operators can easily and accurately monitor the required printing quality. The splicing design is a collaboration of vertical and horizontal movement splicers, combined with tracking pressure rollers this design insures accurate and stable splicing. An Eco-Friendly Exhaust Heat Recycling system is specially built into the design, reducing high energy costs

### SOLVENT BASE LAMINATION MACHINE

In response to the mass demand of various materials and multiple methods in flexible packing markets, WORLDLY WDL series drying laminating machineries as the ultimate solution. With this machine automatic taper tension settings can also be easily adjusted from HMI according to different technology process applications. Internal guiding rollers in the drying tunnel are connected together with belt and driven by motor. In addition, to insure smooth and solid firm laminating results. The laminating unit uses three rollers press design. The back up roller provides more even pressure to the nip roller and performs more uniform bonding effect.

### EXTRUSION LAMINATING MACHINE

In this fast changing packaging marketing the multi-layer laminates demand has increased. The Co-extrusion machine allows to use two kinds resin or more by two or more extrusion units to create multi-function extrusion layers. The variety of resin after melted and go through the feed block then join into the T-die. The side screw has corrosion resistance treatment. It's fine to work with acid copolymer resin, such as EVA, EAA, EMAA and Surlyn etc. The barrel heated by ceramic heater to ensure more energy saving and short start up time.

## WUXI ONGO PLASTIC MACHINERY LIMITED

A2-2118

The precursor of "ONGO" was established in 1992. After more than 30 years running, we have formed a professional team with more than 15 years developing and manufacturing experience in high-grade plastic injection machine. We adopt modern development technology and scientific management system to build ONGO CLASSIC-TECH & HIGH-TECH series injection molding machine from 1100KN to 30000KN clamping force. We do believe "THE PROFESSION GUARANTEES QUALITY, THE TECHNOLOGY CREATES FUTURE".

### CLASSIC-TECH INJECTION MOLDING MACHINE

Completely recognized by market qualified and customer approved high graded injection molding machine, with more stability and fewer troubles

### GREEN-TECH INJECTION MOLDING MACHINE

Completely Japanese team design conception with rectangular platen design injection molding machine to meet the continuously growing market requirement injection molding machine. Completely Japanese team design conception with rectangular platen design injection molding machine to meet the continuously growing market requirement injection molding machine

### PET AUTOMATIC BLOWING MACHINE

High efficiency, low energy consumption and easy to operate high grade automatic PET blowing machine

## XIANG IN ENTERPRISE CO., LTD.

A1-1214

Xiang In Enterprise Co., Ltd. was founded in 1997, expert in printing in-mold labels and heat transfer films, in mold labels. Pursue high quality it's not enough for us, our delivery time is short and prompt for satisfying the customer's request which can keep customer free of worry delaying, make customers can contentedly recommend our printing to everyone. We look forward to collaboratively creating innovative business opportunities.

### IN-MOLD LABEL FOR INJECTION MACHINE

In-Mold Labeling (IML) is a specialized packaging technique utilized in plastic injection and blow molding processes. Labels are placed within molds and plastic material is injected, fusing the label onto the product's surface during molding. This integration enhances appearance, durability, and eco-friendliness by reducing adhesives. IML boosts production efficiency and allows personalized branding with unique designs and colors.

### IN-MOLD LABEL FOR BLOW MOLDING MACHINE

In-Mold Labeling (IML) is a specialized packaging technique utilized in plastic injection and blow molding processes. Labels are placed within molds and plastic material is injected, fusing the label onto the product's surface during molding. This integration enhances appearance, durability, and eco-friendliness by reducing adhesives. IML boosts production efficiency and allows personalized branding with unique designs and colors.

### HEAT TRANSFER FILM

Heat Transfer Film, an integral element of heat transfer technology, is used alongside a heat transfer machine. The process involves printing a design onto the film and then utilizing heat and pressure from the machine to imprint the design onto the product's surface. Compatible with plastics, glass, metals, and wood, this technique yields scratch-resistant, durable designs. Comprising layers like the base, processing, and printing layers, the film's ink adheres through high temperature pressing, ensuring longevity without peeling. Additionally, the film and substrate can be directly recycled, making it an environmentally conscious choice.

# EXHIBITING COMPANIES

## XINLE HUABAO PLASTIC MACHINERY CO., LTD

A3-3120

Founded in 1998, Xinle Huabao Plastic Machinery Co., Ltd. short named HB Machinery, one professional cast film line manufacturer, making high speed PE stretch film line, PE cling film line, PE breathable film line, PE embossed film line, PE/PEVA lamination film line, PVC cling film line, PVC transparent film line, CPP/CPE film line, EVOH film line and so on. We sold the lines to more than 60 countries and regions.

### DUAL HIGH SPEED FOUR-SHAFT STRETCH FILM LINE

1. High speed 2. Dual four-shaft machine 3. Two machines with one platform 4. Space saving 5. Energy Saving

### PVC CLING FILM MACHINE

1. High transparent film 2. Automatic Four-shaft winder 3. AUTOMATIC mixer

## YAMATA MACHINERY, PT

A3-3418

PT. Yamata Machinery has been established from 2011 to provide the best solution to customers who need innovative product to improve production efficiency in plastic and rubber industry. Our products have Advantage of Reduce Cycle Time of change mold, Reduce Water, Electrical and Chemical Consumption of Cooling Tower, Speed Up mould Cooling Time, Speed up mold Cleaning Time, Centralize System for cooling and plastic material distribution for more efficient in plastic and rubber production line.

### KOSMEK QUICK CHUCK CHANGER

Quick change of Chuck Plate and Gate Cutter to reduce setup for Picker Robots. with Locating Function Repeatability 0.05mm, Available with payload : 5kg and 15kg

### LABOTEK DESICCANT DRYER MOBILE (DDM)

DDM, is designed for the continuous drying of free flowing plastic raw materials in granulate form. Labotek Energy Saving System (LESS) has been designed to achieve ENERGY Savings and accurate temperature control with a dew point of  $<-35^{\circ}\text{C}$ , and final moisture content of 0.002% can be achieved (HT model).

### FRIGEL ECODRY 3DK

Ecody 3DK is a centralized closed-circuit adiabatic cooling system designed to replace the old cooling tower technology. WATER Saving ~95%; ENERGY Saving ~40%; MAINTENANCE Costs Saving ~40%

### MOVACOLOR DOSING SOLUTION

30 years of experience in developing Accurate dosing equipment for the Plastics Industry. Gravimetric Dosing for Granule and Powder Color, Batch Blender, Liquid Dosing.

### MIZUKEN CLEANER MACHINE

Mizuken machine use WATER & Pressure AIR to cleaning Scales and Rust in mold cooling channel, OIL Cooler, MTC Heater, Chiller, Injection Water Jacket.

## YIZUMI PRECISION MOLDING TECHNOLOGY CO., L

A1-1402

Yizumi is the professional injection molding machine manufacturer in China. And our product line is abundant including common use injection molding machine A5 series, two platen machine, full-electrical machine, Multi component injection molding machine, high speed packaging injection molding machine.

### A5 SERIES STANDARD HIGH-END SERVO INJECTION MOLDING MACHINE

After successfully bringing servo machines to the market for years, mastering advanced European and American technology from HPM Company and completely understanding customer needs through over-two-year market research, YIZUMI develops a brand-new standard high-end servo injection molding machine, A5 Series, based on IPD mode

### PAC SERIES HIGH SPEED PACKAGING MACHINE

PAC series as the machine for thin-wall product, with fast injection speed.

### FF SERIES FULL-ELECTRIC INJECTION MOLDING MACHINE

FF series is our full-electric machine for clean and energy saving production.

# EXHIBITING COMPANIES

YO DEN ENTERPRISES CO.,LTD

D1-8117

Manufacturer and designer of a well-performed slitting machine, Yo Den is specialized in slitter rewinder and various converting equipment under strict quality control. Established in 1988, we own the group of Webcontrol providing roll slitting machine and rewinding machine for our valued customers across the world. Yo Den is your reliable manufacturer of slitting products.

## SLITTING MACHINE

The SLIT-HSC series slitter is new compact type to save the working space. From the unwind side, the web is guided middle to the main machine, easy access to the slitting section and eliminates dust collection/hazarded steps. The slitter comes standard with razor cutters and groove roller configuration. A shear cutter system is offered as option for paper and other pressure sensitive materials. The machine uses three AC Vector Drives and has automatic tension on unwind and rewind controlled through easy-to-use PLC & MMI touch screen. Friction rings are used on rewind shafts to ensure the production of quality slit rolls when the film thickness varies.

## SLITTING MACHINE

The SLIT-UHS series slitter is ideal for the serious slitting all types of flexible packaging materials as well as label stock & paper. The slitter comes standard with razor cutters and groove roller configuration. A shear cutter system is offered as option for paper and other pressure sensitive materials. The machine uses three AC Vector Drives and has automatic tension on unwind and rewind controlled through easy-to-use PLC & MMI touch screen. The machine features a vacuum roller that keeps the material stable during operation at high speeds 500m/min. Friction rings are used on rewind shafts to ensure the production of quality slit rolls when the film thickness varies.

## SLITTING MACHINE

The SLIT-HSI series slitter is ideal for the serious slitting all types of flexible packaging materials as well as label stock & paper. The slitter comes standard with razor cutters and groove roller configuration. A shear cutter system is offered as option for paper and other pressure sensitive materials. The machine uses three AC Vector Drives and has automatic tension on unwind and rewind controlled through easy-to-use PLC & MMI touch screen. The machine features a vacuum roller that keeps the material stable during operation at high speeds 400m/min. Friction rings are used on rewind shafts to ensure the production of quality slit rolls when the film thickness varies.

YOKATTA MAKMUR PERKASA, PT

A2-240

pt yokatta makmur perkasa is a professional manufacturing company since 2007 with the trademark YTH.

we accept

- injection molding services with a machine capacity of up to 1000 tons
  - CNC molding services with a machine capacity of up to 1.5 meters
  - Industry of plastic seed resin
- and our finished goods products under the YTH brand are various industrial plastic baskets/containers for storage, houseware products, livestock equipment, agricultural equipment and others.

## PLASTIC INDUSTRY BASKETS/CONTAINERS

Producing various plastic baskets/containers which are very suitable for the bakery industry, fishing industry, garment laundry and retail/supermarket industries.

Each item has 3 qualities with the same size, weight and thickness but uses different raw materials to produce different qualities:

- Original uses pure plastic seeds that have food grade quality
- "Middle class" use plastic pellets that are already in a recycling process with moderate quality.
- Low class uses plastic pellets that have been recycled several times with low quality between medium and original

## MOLD MAKER & INJECTION SERVICES

now we are opening a workshop for service molding services, blowmold manufacturing services, injection plastic molds with our latest CNC machines and our experts with more than 30 years of experience. Our mold mechanics have proven quality. Nearly 70% of our injection products use our own self-made molding designs.

- injection service

Plastic Injection Services with a machine capacity of 120 tons to 1000 tons.

The plastic materials we often inject are PP, ABS, HDPE, LDPE and both original and recycled materials.

## PRODUCTION OF RECYCLED RESIN PLASTIC PELLETS

We have succeeded with our plastic products so that we use quite a large amount of plastic as raw material, here we ventured out and opened a new division since 2017, the production of recycled plastic pellets starts from collecting plastic waste to becoming ready-to-use plastic pellets, we manage everything ourselves, apart from for our own use we also sell several types of plastic pellets.

YONGCHAO MACHINERY, PT

A3-3031

PT. Yongchao Machinery bergerak di bidang produksi pembuatan mesin plastik. Sudah beroperasi lebih dari 10 tahun di Indonesia.

Perusahaan tersebut didirikan oleh Bapak Huang Xiao Jun.

Sejak beroperasi sudah menghasilkan berbagai macam mesin plastik, diantaranya mesin potong, mesin lipat, mesin shopping bag, mesin blowing, mesin side seal dan lain-lain. Selain penjualan mesin, PT. Yongchao Machinery juga menyediakan sparepart untuk mesin plastik, baik mesin produksi dari kami ataupun dari luar.

## MESIN POTONG PLASTIK

mesin potong plastik adalah alat yang digunakan untuk memotong berbagai jenis bahan plastik (PVC, PP, dan ABS)

# EXHIBITING COMPANIES

YUYAO JINQIU PLASTIC MOULD CO.,LTD.

D2-9330

**中空·金球塑模**  
ZHONGKONG · JINQIU MOULD

JINQIU specialize in manufacture high precision plastic injection and blow mould, mainly for Daily-chemical, Cosmetics, Food, Medicine and Industrial yield package. Such as plastic cap, bottle, jars, lotion pump, sprayer trigger and so on.

Company founded more than 30years, workshop area more than 10000 and have 80workers. The annual capacity over than 700sets high-precision plastic mould.

Mission: Do our best to satisfy our Customer Service: Customer focus

Object: Build Brand with customer

**28/410** 小孔翻盖模具  
Small hole flip-top cap mould

#### FLIPTOP CAP INJECTION MOULD

This is 28/410 flitop cap mould, 1\*24cavity and semi-hot runner mould. core&cavity use good steel, mould can work on 250T machine

**38mm** 防烫盖模具  
Temper proof cap mould

#### TEMPER-PROOF CAP INJECTION MOULD

This is 38mm temper proof cap mould, 1\*16cavity and cold runner mould. core&cavity use good steel, mould can work on 160-200T machine

**1L** 机油瓶模具——带自动去毛边装置  
Engine oil bottle mould—with auto-deflashing system

#### 1L ENGINE BOTTLE BLOWING MOULD

This 1L volume engine bottle mould within auto-deflashing system. made in 4cavity and cavity use German2316 stianless steel, deflashing part is Alum

ZHANGJIAGANG CHUNQIU TECHNOLOGY DEVELOPMENT CO. , LTD

D2-9116

As a professional electrical system and flexible package machinery supplier in the field for more than 20 years, so far we are able to make all kinds of side seal bag machines, bottom seal bag machines for single layer film bags and 3-9 layer film extruders for food package, sanitary care package, barrier package and other printing lamination film. we have customers in Indonesia, Pakistan, Italy, Korea, Bangladesh, Vietnam, Ukraine who use our film extruders.

#### 3 LAYER FILM EXTRUDER

the machine uses permanent magnet main motors which can save power about 10%. the Schneider inverters are used on the machine. the die is from Taiwan with very good quality, the air ring can use Syncro or Plast Control. the take up unit adopts European design and the back to back winders are same as W.H. from Germany.

#### TOILET PAPER ROLL BAG MAKING MACHINE

the machine adopts Delta system for mechanical and electrical controlling, the top speed can be around 120 cuts per minute with best bag sealing and finest bag length controlling. 2 pieces of photo sensors are used for sealing and punch controlling, a singer winder is also available as optional if bags no need to be cut one by one.

#### DIAPER BAG MAKING MACHINE

the machine totally can make 3 types of diaper bags you can see in the market, including loop handle bag, strip handle bag and patch handle bag. it is a fully automatic and mature machine in technology from sheet to final bags, which can save labor and cost greatly.

ZANECO SDN. BHD.

A1-1022

Zaneco Sdn. Bhd. based in Keramat Pulai, Perak, specializes in compostable and biodegradable product production. With proprietary technology and full intellectual property, we create custom bioplastic compounds to replace traditional plastics. We also offer technical support and R&D collaboration to add value for our customers.

#### BIODEGRADABLE & COMPOSTABLE COMPOUND

"Earthya™" is biodegradable and compostable bioplastic that can be broken down by microorganisms into carbon dioxide, biomass, and water in the commercial composting system leaving no toxic or visible residue to the environment. The compost material contains nutrients that can be used as a soil improver to nourish plants and crops, and support sustainable agricultural practices.

#### CALCIUM CARBONATE POWDER

Calcium Carbonate (CaCO<sub>3</sub>) exists in nature as a white calcite mineral found in limestone and other rocks. Processed Calcium Carbonate takes several forms, including natural or stearic acid coated Calcium Carbonate powder and pre-dispersed slurry.

# EXHIBITING COMPANIES

## ZHEJIANG CHAMPION PLASTIC MACHINERY CO.,LTD

D2-952

ZHEJIANG CHAMPION PLASTIC MACHINERY CO.,LTD is a national high-tech enterprise and pioneer specializing in the production of various high-performance plastic sheet extrusion production lines. The factory is located in the beautiful shore of TAIHU lake "CHANGXING" city. Construction area is more than 20000 square meters. We have been committed to the development, design, research and production of various high-quality sheet extrusion production lines.

### PET THERMOFORMING SHEET EXTRUSION LINE

CHAMPION MACHINERY highly efficient parallel twin screw extruder for single layer sheet and co-extrusion extruders for multi-layer sheet. Different PET sheet extrusion production line can be customized according to customer requirements. Here we will show you the special PET sheet extrusion line for food packages sheet/thermoforming sheet production.

### PP/PS SHEET EXTRUSION LINE

PP/PS sheet extrusion line made by CHAMPION MACHINERY can continuously make single layer sheet or multi-layers sheet. First-class control, simple operation system, better price..

### PC/PMMA/PS/MS SOLID SHEET EXTRUSION LINE

CHAMPION MACHINERY supply high quality PC/ PMMA/PS/MS plastic sheet & plate extrusion line. Turnkey project for customers. Technology process, equipment operation training, efficient service, get the biggest support from CHAMPION manufacturer.

## ZHANGJIAGANG ANDA MACHINERY CO.,LTD.

D2-9408

Zhangjiagang Anda Machinery co., Ltd was established in 2013 and is located in Zhangjiagang city, Jiangsu province. Our factory covers an area of 3,000 square meters and we have more than 30 employees. Our main products include PVC Ceiling and Wall Panel Production Line, PVC Profile Production Line, PVC Edge Band Production Line, PVC Pipe Production Line, WPC Louvers Panel Production Line, PS Louvers Panel and Profile Production Line, UV coating machine and so on.

### PVC CEILING PANEL MACHINE

Anda PVC wall panel making machine adopt many world famous parts such as ABB frequency converter, Siemens motor, JC gear box, Schneider contactor and so on, as well as adopt PID control to guarantee the high efficiency of the production line. Our PVC wall panel making machine is made up of four parts, they are extruder, cooling table, hauling engine and cutting machine. It is used to produce PVC ceiling panel or PVC wall panel and they can be made in varies of specifications, like the width of 15cm, 20cm, 25cm, 30cm, 60cm.

### WPC LOUVERS PANEL MACHINE

WPC fluted wall panel production line is used for making WPC fluted wall panel which is now a popular product applied in decoration. It could help the decoration more exquisite and improve a level.

WPC fluted wall panel making machine including for main parts, they are twin screw extruder, vacuum calibrator, hauling engine and cutting machine. Anda Machinery use world famous band of motor, engine, gearbox to produce and guarantee the quality of machine.

### WPC PROFILE MAKING MACHINE

Plastic UPVC PVC WPC window and door profile making machine /PVC profile extrusion machine / production line is used to produce various kind PVC profiles, such as PVC skirting board, PVC door profile, PVC corner bead, PVC folding door profile, PVC moldings and so on. the surface of PVC skirting board can be treated by printing, lamination, which can make marble, wooden design on surface of product to match with pvc floor .

## ZHEJIANG DONGTAI NEW MATERIALS CO., LTD..

D2-958

Zhejiang Dongtai New Materials CO.,LTD. located in national grade economic development zone-Zhejiang Quzhou Donggang economic development zone, focusing on the R&D and production of advanced new materials such as soluble high-end titanium dioxide and high-end white masterbatch, it is a national high-tech enterprise that provides customers with professional solutions. Our products: Plastic grade TiO2, PP Masterbatch, PE Masterbatch, PET masterbatch

### TITANIUM DIOXIDE

This product is a rutile titanium dioxide specially designed for plastic applications. It have high weather resistance, strong blue color tone, excellent coloring brightness and other properties. Its special surface treatment ensures that the product has good dispersion and anti-wetting performance, so that it has excellent processing fluidity and compatibility during plastic processing and application.

### MASTERBATCH

This product is suitable for white coloring of PP, PE and propylene ethylene copolymer extrusion, blow molding, injection molding and other products.

# EXHIBITING COMPANIES

ZHEJIANG HONGTIAN NEW MATERIAL TECHNOLOGY CO.,LTD

A1-154

We mainly produce environmental PVC CaZn stabilizer. We have independent R&D team. The products are widely used in wire&cables, pipe&fittings, CPVC, profiles, SPC&LVT floor, films, foam and transparent applications. Our CaZn stabilizer can completely replace lead salt and organic tin stabilizer. We break through the traditional technology to make excellent initial coloring, good dynamic and static stability, excellent processing performance, no precipitation, good lubrication balance, excellent

## CAZN STABILIZER

The products are widely used in wire&cables, pipe&fittings, CPVC, profiles, SPC&LVT floor, films, foam and transparent applications. Our CaZn stabilizer can completely replace lead salt and organic tin stabilizer. We break through the traditional technology to make excellent initial coloring, good dynamic and static stability, excellent processing performance, no precipitation, good lubrication balance, excellent later stability and weather-resistance. We have ISO9001, ISO14001 and REACH certificate.

ZHEJIANG HUANGYAN YANJING MOULD CO., LTD

D2-9423

There are nearly 300 employees, including more than 100 professional technicians and managers. The company has passed ISO 9001 quality management system, ISO 14001 environmental management system certification, and implemented an ERP management system. The company has introduced more than 20 sets of high-precision, multi-functional advanced equipment from home and abroad. There are more than 30 injection molding processing equipment. It has annual production capacity of more than 300 large sets

## ZHEJIANG ZHONGYU SCIENCE AND TECHNOLOGY CO.,LTD

D2-9531

Zhejiang Zhongyu Science and Technology Co., Ltd. is the earliest professional company in China to produce in-mold labeling. The company now has 8 production lines, more than 100 sets of special production equipment for in-mold labeling.

Our company has accumulated more than 12 years of professional in-mold labeling technology and more experienced printing management experience, and has passed ISO9001: 2000 international quality management system certification and ROHS standards

## HUANGYAN JINZHUO PLASTIC MOULD FACTORY

D2-9409

**JINZHUO MOULD**  
金卓模具

Jinzhuo Mould Factory, founded in 1995, is professional in manufacturing thin-walled hot runner mold and preform mold. Save valuable time for customers and provide high quality as a guarantee!

### Main Products:

Hot runner thin wall mold such as:  
Lunch box/ takeaway/ microwaveable food container mold  
Milk tea cup mold  
Plastic bowl mold  
Cutlery mold  
Preform mold

### Main Services:

Technology solutions  
Technology training  
Free product design  
Maintenance  
Machinery, accessory and products sourcing

### THIN WALL MOLD

Multi grid takeaway/microwaveable food container mold

Cycle time 5-6s  
Mold life 10 million shots  
High quality to produce transparent product

More detail information please inquire!

### IN MOLD LABEL

IML solution available

### PREFORM MOLD

we have 20+ years experience in produce high quality preform mold

## ZHONGSHAN BOYU PRECISE MOULD MAKING CO.,LTD

A3-3119

BoYu Precise Mould Making Co.,Ltd was founded at Fusha Town Zhongshan City Guangdong Province in April 2010, and passed ISO 9001 management system.

The company cover a area more than 10000m2, R&D and management team total more than 30 persons, and skillful workers more than 120 persons. Also have set up sale service office at north, central and east China.

The company is focusing on R&D and manufacturing auto deflash blow moulds, and got utility patent on the auto deflashing system.

### JERRYCAN BLOW MOULD

Top, bottom is 3D design, the body is classic cooling design.

Neck 3D print.  
Separate cooling on neck, body and bottom.  
High strength on product to pass top load and drop test.

brands.  
3D cooling design for faster cycle time.

### PERSONAL CARE BOTTLE BLOW MOULD

Cavity is individual, center distance is adjustable.  
Cooling design is separate for each cavity.  
Same volume, different shape of bottle is available in one mould.  
3D cooling design.

# EXHIBITING COMPANIES

ZTECH PLASTIC MACHINERY TECHNOLOGY CO.,LTD.

D2-9429

Ztech Plastic Machinery Technology Co., Ltd. is a high-tech enterprise specializing in the design, research and development, production, sales, and service of "high-quality bubble film machines". Our product quality has been certified as a national high-tech product and is sold to markets in Europe, America, and Southeast Asia.

#### AIR BUBBLE FILM MACHINE

The production capacity of the bubble film machine is very high. The packaging quality is very good. Easier operation process.

#### AIR BUBBLE WRAP MACHINE

5 layer bubble film's thermal insulation effect is an improvement, which can be used to block sunlight. It is a novel environmental friendly thermal insulation material which is soft, light, and easy to install.

#### AIR BUBBLE WRAP MAKING MACHINE

2 layer bubble film is an excellent packing material because of its low cost nature and because its floppy bubble acts as a shockproof buffer to make sure that customers can get intact products and to prevent unnecessary loss. It is widely used in countless products including machine part, electric part, cosmetics, radiator and artistic sculptures.

# Sustainability Acts at Plastics & Rubber Indonesia 2023

Sustainability is not just a concept – it's a commitment. We are excited to introduce our sustainable acts that will be carried out with our vision for a greener and more responsible event experience.

## 1. EV Shuttle Bus by VKTR

As part of our commitment to reducing our carbon footprint, we're introducing EV Shuttle Bus services provided by VKTR. Embrace the future of transportation as you journey to Plastics & Rubber Indonesia 2023 in style and sustainability. Let's make every ride count for a greener tomorrow!

Official EV Shuttle Partner

### SHUTTLE BUS SERVICES

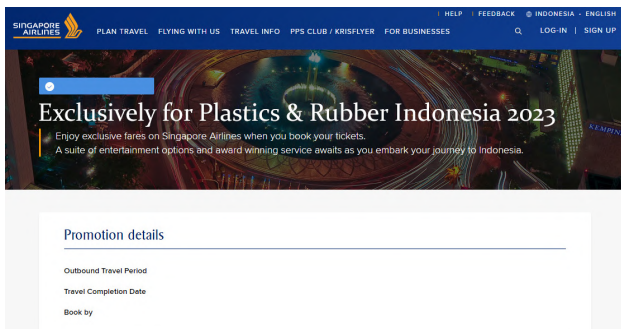

- Shuttle Bus Services to PRI 2023 is FREE OF CHARGE
- Points to JIEXPO, Kemayoran based on the schedule below:

TO JIEXPO		
KIIC 9.00	▶	GIIC 9.30
	▶	Arrive JIEXPO 11.00
FROM JIEXPO		
Depart JIEXPO 16.00	▶	KIIC 17.30
	▶	GIIC 18.00

- Shuttle Bus Station on JIEXPO: Drop off Trade Mall area
- Schedule may be delayed and change according to conditions

## 2. Your Flight to Plastics & Rubber Indonesia 2023 Just Got Better with Singapore Airlines

We are thrilled to announce that Singapore Airlines is the Official Airline Partner for Plastics & Rubber Indonesia 2023. As part of this programme, we offer a carbon offsetting initiative, contributing to a greener tomorrow with every flight you take.

## 3. Waste Management Programme with EcoLoop

As part of our commitment to sustainability, we will implement a Waste Management Programme aimed at reducing waste sent to landfills and promoting eco-friendly practices. We collaborate with EcoLoop to manage all waste generated during the event, including exhibitor booth construction waste, organic and non-organic waste at Plastics & Rubber Indonesia, for recycling purposes. This initiative covers the following activities:

Onsite  
Waste Management

Event Waste  
Report

Waste  
Transportation Support

# How are Pamerindo's events sustainable?

Pamerindo's Events are powered by renewable energy making the electricity usage carbon neutral

We facilitate the discussion and knowledge on sustainability. Visit our website for more details

We are carefully designing our feature areas to minimise the level of waste generated

Catering fresh and locally sourced

Partner with different organization for sustainability business

Promote reused items to participants eg. reused bottle, reused bag, reused pallet

Working with suppliers to focus on environmental impact

Hand in your lanyard for reuse

We upcycle and repurpose exhibition materials into creative interior design by collaborating with a local agency

Informa Better Stands, working together to move away from disposable stands

Digital adoption to reduce paper

Organised by:
